M & B Engineering Ltd

Concall Tracker · Q2 2027 · first report (Q2 FY27 transcript not yet filed)

1. Snapshot

Ahmedabad maker of pre-engineered steel buildings (Phenix: factories, warehouses, sheds designed and fabricated in its plants) and self-supported steel roofing (Proflex) for industrial, warehousing and railway customers in India, with fast-growing exports to the US and Canada. Listed in 2025.

Number	Value	What it means
Market cap	Rs 1,659 cr	What the market values the whole company at.
Q2 FY27 revenue	Rs 385 cr	Sales for July-September 2026, up 25%, right on the full-year guide.
Q2 FY27 operating margin	About 11%	Operating profit per Rs 100 of sales, steady for a year.
Q2 FY27 profit	Rs 29 cr	Net profit, up about a third, helped by a lower tax rate.
Order book (June 2026)	Rs 1,053 cr	Unexecuted orders, about a year of sales; about Rs 278 cr is exports.
Stock P/E	About 19x	A moderate price for an order-book business.

2. Concall coverage

Quarter	Date	Transcript read?
Q1 FY26	29 Aug 2025 (first call after IPO)	Yes (key passages)
Q2 FY26	11 Nov 2025	Yes (key passages)
Q3 FY26	9 Feb 2026	Yes (key passages)
Q4 FY26	May 2026	Yes (key passages)
Q1 FY27	10 Aug 2026	Yes, read in full
Q2 FY27	5 Nov 2026	Not yet: call held, transcript not filed with NSE as of 11 Nov 2026

Five calls since the 2025 listing. The consistency read is short. Q2 FY27 numbers are from Screener; the call itself is not yet transcribed.

Latest concall highlights: Q1 FY27 (call held 10 Aug 2026) plus Q2 FY27 results

- Q2 FY27 revenue Rs 385 cr, up 25%, operating margin about 11%, profit Rs 29 cr.
- Order book Rs 1,053 cr at end Q1 FY27, up about 25%. Export PEB orders Rs 278 cr, all due this year, including the big USD 24 million order announced in Oct 2025, now cleared to ship over three quarters.
- Sanand plant running at optimal use; a 20,000-tonne brownfield expansion (to 92,000 tonnes a year) was due for commissioning in October 2026. Cheyyar (Tamil Nadu) expansion follows, for Q1-Q2 FY28.
- Two new US-made Proflex roofing machines due in Q2 FY27, adding about 2 lakh sq m a year.
- FY27 revenue guide about 25% growth. Sanand is the only Indian PEB plant with US AISC certification; Canadian approval in hand, EU approval started.
- US exports carry sector tariffs paid by the US buyer; management says it's still cheaper than US makers and earns more than at home.

Business mix & capacity

Domestic vs export: FY26 Phenix exports Rs 166 cr, up 156%, about a sixth of Phenix sales; mostly the US, some Canada.

Capacity use: Sanand at optimal use before its expansion; Cheyyar running a full year since FY26.

3. Earning Trigger thesis

The trigger is exports of pre-engineered buildings to North America from the only US-certified PEB plant in India, plus fresh capacity at Sanand and Cheyyar to keep up with Indian factory and warehouse building. The order book and sales growth back it up. Margins are thin and steady, and tariffs and currency swings have bitten before.

Trigger	What management said	Evidence so far	Time horizon	Strength
US and Canada exports	Triple US exports in FY26	Up 156% in FY26; Rs 278 cr export book	FY27	Strong
Sanand expansion	20,000 tonnes by Q2 FY27	Due October 2026	Q3 FY27	Moderate
Order book	Strong inflows	Rs 1,053 cr, up 25%	Ongoing	Strong
FY27 growth	About 25%	Q1 up 22%, Q2 up 25%	FY27	Moderate

3b. Trigger check

Trigger type	Yes/No	What was said (date)
Debt cut	No	
New business	Yes	Canada approval in hand and EU approval process started for exports (9 Feb 2026)
Margin up	No	
New management	No	
New capacity	Yes	20,000-tonne Sanand expansion due Oct 2026; two Proflex machines in Q2 FY27 (10 Aug 2026)
Big orders	Yes	Order book Rs 1,053 cr incl. Rs 278 cr export orders for this year (10 Aug 2026)
Turnaround	No	
Promoter buying	No	

The single concrete driver: Export orders for pre-engineered buildings to the US and Canada, plus a bigger Sanand plant to ship them.

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Aug 2025	More than triple US exports in FY26	Exports up 156% (about 2.5x)	Partly
Aug 2025	Cheyyar adds 15,000-18,000 tonnes in FY26	Full-year operation; Phenix sales up 29%	Delivered
May 2026	FY26 broadly in line with guidance	Management says in line; margin pressure in Q4	Partly
May 2026	Sanand expansion in Q2 FY27	Now October 2026	Partly
May 2026	FY27 growth about 25%	H1 about 24%	Delivered

Narrative drift: Only five calls, but the story hasn't moved: exports from the certified plant, more capacity, strong domestic PEB demand. Targets are mostly hit, sometimes a little late. Currency and tariff costs have dented margins twice.

5. Bottom line

Durable earning trigger? → YES

Exports and the order book are growing and already in the numbers, with new capacity about to start.

Management consistent? → YES

A short record, but most promises have been hit or nearly hit. One to recheck as the history builds.

6. Checkpoints for next quarter

- Q2 FY27 transcript confirms Sanand expansion is running

- Export orders ship on schedule over the next three quarters
- Order book stays above Rs 1,000 cr
