Borosil Ltd

Concall tracker report · Q2 2027 (Sep 2026 quarter) · prepared 11 Nov 2026

1. Snapshot

A consumer kitchenware brand: Borosil borosilicate glassware (microwavable dishes, storage, tumblers), Larah opalware dinner sets, and a fast-growing non-glass range of small appliances, Hydra insulated bottles and flasks, and stainless-steel cookware. It sells through general trade, modern trade, e-commerce, B2B gifting and, from this quarter, its own brand stores.

- Market cap about Rs 3,703 cr at about 44 times profit: priced for growth.
- FY26 sales Rs 1,177 cr, up 8%; net profit Rs 76 cr.
- Operating margin about 14% in FY26; 18% in the Sep 2026 quarter, the best in the last five quarters.
- Sep 2026 quarter: sales Rs 372 cr vs Rs 344 cr (up about 8%); net profit Rs 32 cr vs Rs 23 cr.
- H1 FY27 revenue Rs 627 cr, up 8.8%; gross margin up 3.9 points to 65.2%; EBITDA up 20.5%.
- Net debt about Rs 96 cr: low.

2. Concall coverage

Quarter / source	Date	Read?
Q3 FY23 to Q4 FY25 (10 calls)	Feb 2023 - May 2025	Yes (scanned for guidance)
Q1 FY26	Aug 2025	Yes (scanned)
Q2 FY26	Nov 2025	Yes (scanned)
Q3 FY26	Feb 2026	Yes (scanned)
Q4 FY26	May 2026	Yes (scanned)
Q1 FY27	19 Aug 2026	Yes
Q2 FY27	2 Nov 2026	Yes, in full

Eighteen transcripts over almost four years; the latest was read in full.

Latest concall highlights - Q2 FY27 (2 Nov 2026)

- DGTR's final findings (24 Sep 2026) recommended a five-year anti-dumping duty on Chinese borosilicate table and kitchen glassware; it still needs the Finance Ministry's notification.
- Own Hydra (vacuum steel bottle) plant in Rajasthan started on 30 Jun 2026 with two lines, meeting BIS rules; Hydra sales up over 30% in Q2. The third line slipped to January 2027.
- Captive solar at Bikaner now 35.8 MWp with battery storage, meeting about 60% of power needs; savings rise further from Q4 FY27.
- First exclusive Borosil stores opened in Pune and Gurugram.
- Price hikes, better mix and solar savings beat West Asia-driven fuel and raw material inflation; management expects to sustain current growth and margins. Diwali fell later this year, shifting sales into October.

Business mix & capacity

- Domestic vs export: mainly a domestic consumer business; an export split wasn't given.

- Capacity: borosilicate pressware furnace runs at about 90%; a Rs 50 cr expansion from 25 to 32 tonnes a day with a third forming line is due by end Q4 FY28. The Bharuch glassware project moves to Borosil Scientific, which will supply the products.

3. Earning trigger thesis

Three things should lift earnings: protection from Chinese glassware dumping if the duty is notified, bringing Hydra bottle manufacturing in-house after BIS rules cut imports, and power savings from captive solar. Appliances and cookware keep growing faster than glass. The catch: glass growth was soft this half and the company has missed its own growth targets before.

Trigger	What management said	Evidence so far	Time horizon	Strength
Anti-dumping duty on Chinese borosilicate glass	Will help restore a level field and improve utilisation	DGTR recommended a five-year duty; not yet notified	Pending	Moderate: needs notification
Hydra plant in-house	Fix the BIS-led supply gap	Two lines running since 30 Jun 2026; Hydra up 30%+ in Q2; third line pushed to Jan 2027	Now	Moderate
Captive solar	Cut power cost	About 60% of power from solar; further savings from Q4 FY27	Now	Strong, mechanical
Glassware capacity	Jaipur furnace expansion by end Q4 FY28	Approved, on plan	FY28	Unproven

3b. Trigger check

Trigger type	Yes/ No	What was said (date)
Debt cut	No	-
New business	Yes	First exclusive brand stores in Pune and Gurugram (Nov 2026)
Margin up	Yes	H1 gross margin up 3.9 points; EBITDA up 20.5% on price hikes, mix and solar (Nov 2026)
New management	No	-
New capacity	Yes	Hydra plant started 30 Jun 2026; third line due Jan 2027; Jaipur furnace expansion by Q4 FY28 (Nov 2026)
Big orders	No	-
Turnaround	No	-
Promoter buying	No	-

Single concrete driver: An in-house Hydra bottle plant, captive solar savings and a possible anti-dumping duty on Chinese borosilicate glass, on top of faster-growing appliances and cookware.

3c. Margin bridge

EBITDA margin rose to about 18% in Q2 from about 15% a year ago. Price hikes passed through better in Q2, LPG and raw material costs eased from Q1, mix improved toward appliances and cookware, and solar phase 3 cut power costs. Management expects these margins to hold. (lasting)

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Jun 2024	Glassware growth well above last year's 11% with the new plant	Glass growth uneven; 2.7% in H1 FY27	Partly
FY26	Revenue growth of 15-20%	FY26 sales up 8%	Missed
Feb 2026	Move appliance sourcing local ahead of BIS to avoid a repeat of Hydra	No appliance disruption reported; appliances growing	Delivered
2026	Hydra third double wall line by end Q4	Slipped to January 2027	Partly
Aug 2026	EBITDA margin about 18% for the year	Q2 about 18%, H1 lower	Too-early
2025	Bharuch glassware plant	Shifted to Borosil Scientific to build	Dropped

The core story, a premium kitchen brand expanding beyond glass, has held. But growth targets have been missed, the Hydra business was hurt by BIS rules before the plant was ready, and plans like Bharuch have changed shape. Tone is confident about margins now that costs eased.

5. Bottom line

Durable earning trigger? → MAYBE

Margins are already improving from solar, pricing and the new Hydra plant, and the anti-dumping duty could help glass. But the duty isn't notified yet, glass growth is soft, and sales growth is still single digit.

Management consistent? → MAYBE

Some promises delivered (local sourcing, solar, the Hydra plant), but the FY26 growth target was missed, the third Hydra line slipped and the Bharuch plan changed.

6. Checkpoints for next quarter

- Finance Ministry notifies the anti-dumping duty on Chinese borosilicate glassware
- Third Hydra double wall line starts production in January
- December quarter margin holds near the September quarter level
