SJS Enterprises Ltd: Concall Tracker

Decorative and aesthetic parts for vehicles and appliances · Screener: SJS · Quarter folder Q1-2027 · Builds on the Q4-2026 report (coverage to the 6 May 2026 call) · New call deep-read: Q1 FY27, 7 Aug 2026

1. Snapshot

What the business does: SJS makes the good-looking parts on vehicles and appliances: logos and badges, instrument dials, chrome-plated trims and in-mould decorated plastic panels. It sells to car, two-wheeler and appliance makers and earns more as buyers want fancier finishes. It's now adding car display cover glass with a licence from BOE Varitronix of Hong Kong.

Measure	Value	Plain-English read
Market value today	≈ ₹6,621 cr	What the stock market values the company at (Screener, Nov 2026).
Valuation (P/E)	≈ 44×	The share price is about 44 times yearly profit, a premium price that assumes growth keeps coming.
Q1 FY27 revenue	₹261 cr (+24.5% YoY)	Highest-ever quarter, up about a quarter on last year.
Q1 FY27 EBITDA margin	30.0%	About ₹30 of operating profit per ₹100 of sales, up 2.4 points on last year, despite higher input costs.
Q1 FY27 profit	₹74.4 cr reported / ₹50.3 cr adjusted	Reported profit more than doubled thanks to a one-off ₹24.2 cr gain from selling an old unused factory. Without it, profit grew about 45%.
Net cash (30 Jun 2026)	≈ ₹329 cr	It holds far more cash than debt, so it can fund plants and deals itself.
ROCE / ROE (annualised)	37.2% / 20.3%	Very high returns on the money in the business.

Screener's tables show the standalone parent; figures above are consolidated, as management reports them.

2. Concall coverage

Quarter	Call date	Transcript read?
Q3 FY22 → Q3 FY26 (19 calls; 6 read closely)	Feb 2022 → Jan 2026	Carried forward from the Q4-2026 report
Q4 & FY26 (prior boundary)	6 May 2026	Read for the Q4-2026 report
Q1 FY27	**7 Aug 2026**	**Newly deep-read in full ★**

Only the new Q1 FY27 call was read in full this quarter; the backstory comes from the prior report. No call after 30 Sep 2026 was used.

★ Latest concall highlights: Q1 FY27 (7 Aug 2026)

- **Record quarter.** Revenue ₹261 cr (+24.5%), EBITDA ₹80 cr (+36%) at a 30% margin. The auto business grew 32% against 22% for the car and two-wheeler industry, the 27th straight quarter it's beaten the industry. Cars led (+45%); two-wheelers +20%.
- **Exports jumped 83%** to ₹25.6 cr, about a tenth of sales. The FY28 target of 14-15% of sales is unchanged, but exports and Walter Pack have been stuck in a narrow range for four quarters while new business waits on customer launches.
- **New chrome plant live.** The new SJS Decoplast plant in Pune started commercial production in August 2026. It adds room for about ₹200-250 cr of yearly sales (about 1.75 times the old capacity, which was full), and management aims to double Decoplast sales in 3-4 years.
- **Display bet structured.** A separate subsidiary was approved for cover glass and displays. Equipment is on order; supplies are due from Q2 FY28. SJS has four-wheeler exclusivity with BOE and aims for at least a tenth of an Indian display market it sees growing to ₹5,000-7,000 cr by 2030. It also bought the rest of Walter Pack India, making it fully owned.
- **Guidance and tone:** keep beating the auto industry by 1.5-2 times in FY27; margin guided at 27-28% for the year as new products start up. Higher raw-material costs shaved about half a point off margin, with recovery from customers lagging a quarter or two. Tone confident.

Business mix & capacity (quick facts)

By segment (Q1 FY27): cars 44.6%, two-wheelers 36.6%, appliances and others 18.8%. **Domestic vs export:** exports 9.8% of consolidated sales, about nine-tenths sold in India. The two subsidiaries are almost all domestic, so the parent's export share is higher.
Capacity use: the old chrome plant was full; the new Pune plant should reach 85-90% use in about three years. Walter Pack runs around 75%, so no new capex is planned there yet.

★ Since our last report

Builds on the Q4-2026 report (call of 6 May 2026). Prior verdicts: **trigger YES**, **consistency YES**.

Prior read	What we said then	What the new call shows	Movement
Trigger (YES)	Premium content, Hero win, exports and new products, all showing in numbers.	Another record quarter; auto growth 1.5× the industry; margin 30%.	Confirmed
Consistency (YES)	Core promises met; exports and chrome plant had slipped before.	Chrome plant now live; export target held; guidance repeated.	Confirmed
Chrome-plating plant	In final commissioning, about two years late.	Commercial production from August 2026.	Delivered
Exports to 14-15% by FY28	Growing fast off a low base.	+83% this quarter but still under a tenth of sales; big deals "in advanced discussion".	On-track, unproven
Car displays (BOE)	Revenue expected from FY27.	Now guided to start in Q2 FY28 from the new plant.	Slipping slightly
Valuation	Priced richly (about 53× profit).	About 44× now.	Still pricey

Verdict change: both verdicts **unchanged**. The quarter delivered on the core story; the display timing moved a little later.

3. Earning Trigger thesis ★

SJS grows by putting more, and fancier, decorative content on every vehicle and appliance, faster than the industry grows. On top of that it keeps adding customers (Hero MotoCorp, new wins at Mahindra, Tata Motors, TVS, Royal Enfield, Skoda, John Deere), cross-selling between its three units, and moving into higher-value products like chrome, in-mould electronics and car display glass. Q1 FY27 shows it working again: sales up a quarter, margin at 30%, profit up about 45% on an adjusted basis.

Trigger	What management said	Evidence so far	Horizon	Strength	Change since last report
Premium content per vehicle	Beat the auto industry by 1.5-2×.	Auto +32% vs industry +22%; 27 quarters in a row.	Ongoing	Strong	unchanged
Chrome capacity (Decoplast)	Double Decoplast sales in 3-4 years.	New Pune plant live Aug 2026; old plant was sold out.	FY27-FY30	Strong	↑ plant delivered
Exports	14-15% of sales by FY28.	+83% YoY to 9.8% of sales; flat run-rate for four quarters.	FY28	Moderate	unchanged
Car displays / cover glass	10%+ of an Indian market of ₹5,000-7,000 cr by 2030.	Subsidiary set up; equipment ordered; supplies from Q2 FY28.	FY28+	Unproven	↓ start pushed to FY28
Cross-selling / M&A	Use cash for deals; sell chrome to existing 2W customers.	Walter Pack now 100% owned; cross-sell wins at Tata and Mahindra.	Ongoing	Strong	unchanged

The catch: the stock prices in a lot. Raw-material costs are rising and pass-through lags; appliances and Walter Pack have been soft; and the display business is a new, untested line. The Walter Pack Spain non-compete for BMW and Mercedes runs to January 2027, which limits some export upside until then.

4. Management Consistency scorecard

Period / theme	What was promised	What actually happened	Verdict
FY22 "double sales in 3 years"	Roughly double FY22 sales by FY25.	About 2.05× (from prior report).	Delivered
Beat the industry	Grow 1.5-2× the auto industry.	27th straight quarter of outperformance.	Delivered
Margin	Hold 27-28%+ in FY27.	30% in Q1 despite cost pressure.	Delivered
Chrome-plating capex (May 2022)	Live in 18-24 months.	Live August 2026, about two years late.	Partly / late
Exports 25% by 2025	Quarter of sales from exports.	Missed; reset to 14-15% by FY28.	Missed & reset
Displays (BOE deal)	Revenue from FY27.	Now Q2 FY28.	Too early

Narrative drift: very little. The same pitch (premium content, new customers, new products, exports, bolt-on deals, all paid from cash) has held for four and a half years, and the headline numbers keep coming in. The misses are on timelines for side bets: exports, the chrome plant and now the display start.

5. Bottom line: two verdicts

Durable earning trigger? → YES (vs last quarter: unchanged)

Another record quarter backed it up: industry-beating growth, a 30% margin, profit up about 45% before the one-off gain, and the new chrome plant live just as the old one ran out of room. Displays are still a promise, but the core engine doesn't depend on them.

Management consistent? → YES **(vs last quarter: unchanged)**

The chrome plant finally arrived, guidance was repeated, and margin held above the guided range. The display start sliding to FY28 is a small timing slip on a new bet, not a change in story. Yes, with the export target the one to hold them to.
