Sanghvi Movers Ltd

Concall Tracker: earning trigger and management consistency check · Quarter folder Q1-2027 · Report date 6 Nov 2026 · Ticker SANGHVIMOV (NSE) / 530073 (BSE) · Builds on the Q4-2026 report

1. Snapshot

What it does, in plain words: Sanghvi Movers is India's largest crane-rental company. It owns a fleet of very large mobile cranes and hires them out, with operators, to lift heavy equipment at project sites: wind turbines, cement and steel plants, refineries, power plants and bridges. Customers pay a monthly rent per crane. Two newer arms sit beside it: Sangreen, which erects and commissions whole wind farms (an "engineering and construction" business that needs little capital but earns thinner margins), and a crane-rental business in Saudi Arabia, Qatar and Botswana, where rents are much higher than in India.

Number	Value	What it means
Market value	₹3,240 cr (share ₹373)	What the stock market says the whole company is worth today.
Price to earnings (P/E)	about 20x	You pay about ₹20 for every ₹1 of yearly profit. A middle-of-the-road price for a company growing this fast.
Q1 FY27 sales (consolidated)	₹380 cr, up 39%	Sales for April to June 2026, and up from ₹350 cr in the March quarter too.
Q1 FY27 operating profit (EBITDA)	₹139 cr, margin 35%	Up 30% on a year ago, but the margin fell from 40% in the March quarter. Sales grew; margin was given back.
Q1 FY27 net profit	₹65 cr, up 30%	What was left after all costs and tax; slightly below the March quarter's ₹69 cr.
Crane fleet utilisation	86% (India and Botswana; Gulf also 86%)	Share of the year cranes were out on hire. Management says that, after moving and maintenance time, this is close to full.
Gross debt to equity	0.54x (own ceiling 0.72x)	About 54 paise borrowed for every ₹1 of owners' money, below the limit it set itself; it also holds over ₹300 cr of cash.

2. Concall coverage

Quarter	Call date	How it was read
Q1 FY26 to Q3 FY26 (3 calls)	8 Aug 2025 to 9 Feb 2026	Carried forward from the Q4-2026 report
Q4 FY26 (full-year FY26), the prior boundary	22 May 2026	Read in full for the Q4-2026 report
Q1 FY27 (Apr to Jun 2026)	**3 Aug 2026**	**Newly deep-read in full ★**

Only the Q1 FY27 call was read in full this time; the backstory comes from the Q4-2026 report (which used web sources for years before FY26, as older transcripts were not available on Screener). Calls after 30 Sep 2026 are left for the next report.

★ Latest concall highlights - Q1 FY27 (call held 3 Aug 2026)

- **Sales up, margin down.** Sales up 39% to ₹380 cr, EBITDA up 30% to ₹139 cr, profit up 30% to ₹65 cr. The CFO opened by saying the honest outcome was "we grew the top line and gave back margin".
- **Why the core crane margin fell (53% in FY26 to 47%).** About 2 points from a bigger provision for overdue customer bills (₹6.2 cr, mostly India), 1 point from a currency loss on paper, 1 point from a one-off staff bonus for crossing ₹1,000 cr of sales, and 2 points from renting extra cranes and kit from others instead of buying more. Management says the underlying margin is about 49%, and above 51% once the overdue bills are collected.
- **Clear, published guidance.** FY27: sales ₹1,400-1,500 cr, EBITDA ₹525-575 cr (FY26 was ₹429 cr), return on capital 16.25-16.5%. FY28: sales up another 30-40% and EBITDA up 20-30%, to ₹650-700 cr. Most of this year's ₹652 cr of new cranes arrive in the second half.
- **Saudi hit its milestone.** The Gulf business is now EBITDA-positive since launch, earning a 4.1% monthly rent on crane cost against 2.29% in India. Botswana finished on schedule. But Gulf customers take about 201 days to pay, against 124 in Indian crane rental.
- **Order book and tone.** Order book about ₹1,250 cr (all to be done this year) and an inquiry pipeline of about ₹5,600 cr. Sangreen alone has ₹686 cr of orders and expects to double sales again. The MD was back on the call, with the CEO and CFO; tone confident and much more open with numbers.

Business mix and capacity

By business (Q1 FY27): crane rental about 60%, wind-farm construction (Sangreen) about 37%, project work 3%. For the full year management expects roughly two-thirds crane rental and one-third wind. *Plain read: the newer, thinner-margin wind work ran ahead early in the year, which pulls the blended margin down.*
Domestic vs overseas: not given as a percentage. Gulf income was ₹19 cr in the quarter, so overseas is still a small slice (about 5% of sales). *Plain read: still overwhelmingly an Indian business.*
Capacity utilisation: 86% in India and Botswana and 86% in the Gulf, up from about 80% for FY26. Fleet 492 cranes, gross block about ₹3,300 cr. *Plain read: the fleet is effectively full, which is why it is renting cranes from others and buying ₹652 cr of new ones this year.*

Since our last report (builds on the Q4-2026 report, call of 22 May 2026)

Prior verdicts carried forward: **Durable earning trigger: YES** · **Management consistent: MAYBE**.

Prior read	What we said then	What the new call shows	Movement
Trigger: India's heavy-lift demand from the capex cycle	Concrete and delivering	Sales up 39%, utilisation 86%, yields up to 2.29% from 2.12%, order book and pipeline both bigger	Confirmed
Consistency	Delivered on growth, but churn and less disclosure	Same leaders on the call; much fuller guidance and a quarterly KPI dashboard; Saudi milestone hit. Margin fell again.	Improving
FY27 growth of about 30%	Rare explicit guide	Now formal: sales ₹1,400-1,500 cr (about 31-40% up); Q1 at 39%	On-track
Saudi cumulative breakeven in H1 FY27	Too early	Achieved in Q1	Confirmed
Thinner margins and negative free cash flow	A watch point	Margin down to 35%; overdue bills forced a bigger provision; Gulf receivables long	Slipping
Capex under-spent, shipping delays to the Gulf	Planned spends kept getting pushed	₹92 cr of ₹652 cr done; Gulf cranes all ordered, now expected to earn in Q3-Q4	On-track, but back-loaded again
Withdrawn sector and order-book splits	Less transparency	Order book split by business, Gulf pipeline breakdown and KPIs now published; still won't share lifting capacity	Improving

Verdict change this quarter: trigger unchanged at YES. Consistency stays MAYBE but leans better: Saudi breakeven landed on time, guidance became detailed and public, and the leadership turnover settled. What still holds it back is the falling margin, slow-paying customers and another year where most of the capex lands in the second half.

3. Earning trigger thesis

The driver is still India's building cycle: wind farms (a record 6 GW added last year, about 29 GW under construction), thermal and nuclear power, steel, cement and refineries all need very heavy lifts, and Sanghvi owns the biggest fleet to do them. The fleet is full, rents per crane are rising, and the company is adding ₹652 cr of cranes this year. Sangreen sells whole wind-farm builds on top of the crane hire without needing much capital, and the Gulf earns almost twice India's rent per crane. Management's own maths: EBITDA from ₹429 cr in FY26 to ₹525-575 cr in FY27 and ₹650-700 cr in FY28.

Trigger	What management said	Evidence so far	Horizon	Strength	Change since last report
India crane-rental demand	Broad capex cycle across power, steel, cement, wind	Utilisation 86%, India yield up to 2.29%, order book ~₹1,250 cr	Now to FY28+	Strong: delivering	↑ improving (rents rising)
Sangreen wind construction	Double sales again; margin 12-15% over time	Order book ₹686 cr, more than last year's sales; pipeline ₹4,656 cr	Now to 3 yrs	Moderate: growing fast, thin and lumpy	↑ improving
Saudi / Gulf expansion	Higher rents; ₹324 cr of cranes earning from Q3-Q4	EBITDA-positive since launch; 86% utilisation at 4.1% yield; 201-day collections	2-5 yrs	Moderate: milestone met, still small	↑ improving

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Q4 FY25 call	FY26 revenue growth 25-30%	+37%	Delivered
FY26	Utilisation in a 75-80% band	79% for FY26; 86% in Q1 FY27	Delivered
FY26	Big capex plan, raised twice	Under-spent, carried into FY27; FY27 again mostly second-half	Partly
FY26	Saudi cumulative breakeven by H1 FY27	Achieved in Q1 FY27	Delivered
Q1 FY26 onward	Fewer disclosures ("competitive")	Reversed in Q1 FY27: detailed guidance, KPI dashboard, segment order books	Improved
Ongoing	Blended margin to normalise; core crane margin intact	Core crane margin 53% to 47%; blended 40% to 35% quarter on quarter	Missed (so far)
Aug 2026 (new)	FY27 EBITDA ₹525-575 cr; FY28 ₹650-700 cr; overdue bills to be collected this year	Q1 run-rate of ₹139 cr is in line with the low end; not yet testable	Too early

Narrative drift: the big story ("Elevate 2030", a multi-country heavy-lift group) is the same as last quarter, and this call was the steadiest yet: same leadership on the line, numbers explained before analysts asked, and guidance put in writing. One loose end: the CFO put the Gulf EBITDA margin at 23% for the quarter while the MD called it around 47%, which nobody reconciled. The two real worries are money, not story: customers paying slower (provisions up, Gulf at 201 days) and margins that keep slipping as the mix shifts toward wind construction and rented-in kit.

5. Bottom line - two verdicts

Durable earning trigger? → YES

vs last quarter: unchanged

Nothing on the call weakened it. The fleet is close to full, rents in India went up, the order book and pipeline both grew, and there's a written two-year EBITDA path backed by ₹652 cr of new cranes this year. Watch the quality of that growth: more of it now comes from lower-margin wind construction and rented-in equipment, so profit grows slower than sales.

Management consistent? → MAYBE (leaning yes)

vs last quarter: unchanged

Moved in the right direction. Saudi breakeven arrived on time, the disclosure cut that worried us last time has been largely reversed, and the leadership team looked settled. It isn't a YES yet because margins fell again, bad-debt provisions went up, and capex is back-loaded for the second year running. Next quarter, check that overdue bills come down as promised and that the Gulf cranes actually arrive and start earning.
