Endurance Technologies Ltd (ENDURANCE)

Concall tracker, Q2 2027 (Jul-Sep 2026) · Aurangabad-based maker of two-wheeler parts (aluminium castings, suspension, brakes, ABS, clutches, alloy wheels) for Bajaj, Royal Enfield, Honda and others, with a European castings business.

1. Snapshot

Number	Value	Plain read
Market cap	₹35,554 cr	A large auto parts maker by stock-market value.
Q2 sales (standalone)	₹3,753 cr, up 40%	Its fastest growth in years, riding record two-wheeler sales.
Q2 operating margin	10% (12% a year ago)	Margin slipped even as sales jumped.
P/E	44.2	Investors pay a premium for its growth pipeline.
Promoter holding	75%	The Jain family owns three-quarters.
FY27 India capex	About ₹800 cr, same as FY26	Heavy spending on new plants and products.

2. Concall coverage

Quarter	Date	Transcript read?
Q4 FY23 to Q4 FY25	May 2023 to May 2025	Skimmed for promises (8 calls)
Q2 FY26	Nov 2025	Yes
Q3 FY26	Feb 2026	Skimmed
Q4 FY26	May 2026	Yes
Q1 FY27	14 Aug 2026	Yes, in full
Q2 FY27	Nov 2026	Transcript not yet published; Q2 read from reported numbers

Thirty-nine calls on Screener; the last three years were read. The Q2 FY27 transcript wasn't on Screener or NSE yet, so latest commentary is from August 2026.

Latest update highlights — Q2 FY27 results and Q1 FY27 call (Aug 2026)

- Q2 results: sales up 40% to ₹3,753 cr, but margin slipped to about 10% from 12%. Why will only be clear when the Q2 call comes out.
- ABS capacity addition cut from 12 lakh to 9 lakh units a year because machines were moved to brake assembly, where orders jumped. ABS expansion SOP was due Sept/Oct 2026 even before final government rules.
- Dozens of new programs: Chennai disc brake plant (Royal Enfield), Tata Motors car brakes, four-wheeler castings with ₹513 cr peak potential, Hero battery packs (started June 2026), solar dampers and actuators (₹345 cr booked).
- Maxwell (battery management systems) grew 21% quarter on quarter; ₹4,526 cr of quotes in hand.
- Europe: tougher with high energy costs and Chinese carmakers.

Business mix & capacity

- Domestic vs international: mostly India; Europe is a smaller castings and machining business. Exact split not given in the call read.
- Capacity: brake assembly heading to 9 million a year by Q1 FY28; inverted forks to 100,000 a month by end FY27.

3. Earning trigger thesis

Endurance keeps adding content per two-wheeler: ABS as rules spread to smaller bikes, disc brakes, inverted forks, alloy wheels, battery packs. It is also branching into four-wheeler castings, solar trackers and electronics. The pipeline is long; the open question is margin, which fell in Q2 even as sales soared.

Trigger	What management said	Evidence so far	Time horizon	Strength
ABS for smaller bikes	Draft rule June 2025; capacity added	SOP for expansion due Sept/Oct 2026; final rule still pending	FY27-28	Moderate: rule not final
Brakes and disc brakes	Grown over 30% a year for four years	New Chennai plant, KTM, Hero, TVS lines	FY27	Strong
Four-wheeler castings	₹513 cr peak annual potential	SOP Sept 2026, pickup in Q4 FY27	FY28	Moderate
Solar dampers/ actuators, battery packs	₹345 cr solar booked; Hero battery packs started	Early	FY27-28	Moderate

3b. Trigger check

Trigger type	Yes/No	What was said (date)
Debt cut	No	Not discussed.
New business	Yes	Battery packs for Hero, solar dampers and actuators, four-wheeler driveshafts (Aug 2026).
Margin up	No	Margin fell in Q2 results.
New management	No	No change mentioned.
New capacity	Yes	ABS and brake expansion, Chennai brake plant, fifth forging press (Aug 2026).
Big orders	Yes	Four-wheeler casting bookings with ₹513 cr peak potential; ₹4,526 cr of quotes (Aug 2026).
Turnaround	No	Not applicable.
Promoter buying	No	Promoter stake flat at 75%.

The single concrete driver: More content per two-wheeler (ABS, disc brakes, inverted forks, alloy wheels) plus new four-wheeler castings and battery packs coming on stream through FY27.

3c. Margin bridge

Margin fell from about 12% to 10% in Q2 while sales grew 40%. The Q1 call pointed to costlier energy and freight in Europe and new-plant start-up costs, but the Q2 reason won't be known until its call is published.

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Nov 2025	First 1.2 million ABS line live in Q1 FY27	Now SOP Sept/Oct 2026, and the addition cut to 9 lakh	Partly
Nov 2025	Dual-channel ABS SOP Dec 2025 and Jan 2026	Pushed to June 2026, then Q2 FY27	Missed (slipped)
May 2025	Grow four-wheeler and new businesses	Castings, solar, battery packs all booked	Delivered
2022-26	Brakes growth	Over 30% a year for four years	Delivered

The direction is consistent (more content per vehicle, more four-wheeler and non-auto), but specific start dates keep sliding by a quarter or two, and the ABS plan was trimmed. Lots of programs are announced each call, which makes promises hard to track one by one.

5. Bottom line

Durable earning trigger? → YES

Sales are growing far faster than bike volumes and there's a long list of programs starting this year.

Management consistent? → MAYBE

Big picture delivered, but start dates for ABS and several programs keep slipping, and margin fell in Q2 without an explanation yet.

6. Checkpoints for next quarter

- ABS expansion starts production as promised
- Four-wheeler castings show a pickup by Q4 FY27
- Margin gets back to twelve percent
