Windlas Biotech Ltd

Concall tracker · filed under Q2-2027 · 11 Nov 2026

1. Snapshot

Windlas Biotech is a Dehradun-based contract maker of generic medicines (CDMO): it develops and manufactures tablets, capsules, liquids and injectables for 8 of India's top 10 pharma companies. It also sells its own trade generics and institutional products, and exports to about 10 countries.

- Market cap about Rs 2,055 cr at a P/E of about 31.
- Q2 FY27 revenue Rs 264 cr, up 19%: the 15th straight record quarter.
- Generic formulations CDMO Rs 215 cr, up 34%; trade generics and institutional Rs 36 cr, down 30% after codeine-based products were dropped; exports Rs 12 cr, up 26%.
- Adjusted EBITDA (before non-cash ESOP costs) Rs 36 cr, margin 13.7%; reported EBITDA Rs 29 cr, margin 11.1% vs 12.8%: the ESOP charge hides underlying growth.
- Reported PAT Rs 18 cr, flat; adjusted PAT Rs 25 cr, up 29%.
- Net liquidity Rs 223 cr, net debt free, after a Rs 47 cr buyback (promoters did not take part) and a Rs 13 cr dividend.

2. Concall coverage

Screener lists 21 Windlas transcripts since the 2021 listing. This report reads the last 9 (Q2 FY25 to Q1 FY27) for promises and delivery. The Q2 FY27 call was held (audio is out) but its transcript is not yet on Screener, the exchanges or the company site, so the latest quarter is read from the Q2 FY27 investor presentation (5 Nov 2026).

Quarter / call	Date	Transcript read?
Q2 FY25 to Q4 FY25	Nov 2024 - May 2025	Yes, read for promises
Q1 FY26	Aug 2025	Yes
Q2 FY26	7 Nov 2025	Yes
Q3 FY26	6 Feb 2026	Yes
Q4 FY26	May 2026	Yes
Q1 FY27	Aug 2026	Yes, latest transcript read
Q2 FY27 investor presentation (call transcript pending)	5 Nov 2026	Presentation read

2b. Latest update highlights: Q2 FY27 investor presentation (Nov 2026)

- Revenue up 19% to a record Rs 264 cr while the Indian pharma market grew volumes only 2.3%; H1 revenue crossed Rs 500 cr for the first time.
- CDMO up 34% as customers handed over more of their portfolios and new products.
- Plant-6 commercialised in September 2026. Plant-4 and Plant-5 (the injectables facility) received EU GMP certification, which supports exports.
- Trade generics are being rebuilt with new launches to replace codeine-based products.
- Management gives no numerical guidance, as on earlier calls.

2c. Business mix & capacity

- Domestic about 96% / exports about 4% of H1 FY27 revenue (Rs 23 cr of Rs 512 cr): almost all sales are in India.
- Capacity: 5 WHO-GMP plants with 8,522 million tablets and capsules a year plus pouch and liquid lines (FY26); Plant-6 adds capacity from September 2026.

3. Earning trigger thesis

Windlas grows by making more of its pharma customers' products: they keep handing over more brands and new launches, so CDMO revenue grows far faster than the Indian pharma market. New capacity (Plant-6, the injectables facility, the Plant-2 extension) gives room to keep that going, and EU GMP opens export doors. The drag is trade generics after the codeine exit, and ESOP charges that pull reported profit down.

Trigger	What management said	Evidence so far	Time horizon	Strength
CDMO share gains	Customers entrusting a larger share of portfolios	CDMO up 34% in Q2, 32% in H1	Now	Strong
Plant-6 and injectables	New capacity to support growth; EU GMP for exports	Plant-6 commercialised Sep 2026; EU GMP for Plants 4 and 5	FY27-28	Moderate: just started
Exports	Dossiers, registrations and site approvals	Exports up 46% in H1, still small	Long lead times	Unproven

3b. Trigger check

Trigger type	Yes/No	What was said (date)
Debt cut	No	Already net debt free
New business	No	Trade generics being rebuilt, not new
Margin up	Yes	Adjusted EBITDA margin 13.7% vs 13.2% in H1 (Nov 2026 presentation)
New management	No	No change
New capacity	Yes	'Commercialization of Plant-6 in September 2026' (Nov 2026 presentation)
Big orders	No	No order book given
Turnaround	No	Not applicable
Promoter buying	No	Rs 47 cr buyback done 'without promoter participation'

Single concrete driver: Pharma customers keep moving more of their products to Windlas, so its contract-manufacturing revenue is growing far faster than the Indian pharma market, with Plant-6 adding room.

3c. Margin bridge

Adjusted EBITDA margin rose to 13.7% from 13.5% in Q2 on scale and a better mix, but reported margin fell to 11.1% from 12.8% because of about Rs 7 cr of non-cash ESOP charges in the quarter. (lasting)

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Q2 FY25 call (Nov 2024)	Move toward 14-15% margins as injectables and scale add	Adjusted 13.7% in Q2 FY27	Partly
Q2 FY26 call (Nov 2025)	Commission Plant-6 within FY26	Mechanical completion by end FY26; commercialised Sep 2026	Partly (late by about six months)
Q2 FY26 call	Injectables ramp with more customer approvals	EU GMP for Plants 4 and 5; injectables contributing	Delivered
Q4 FY26 / Q1 FY27 calls	Replace codeine products in trade generics	Trade generics still down 30% in Q2	Too early

The story has been the same for two years: steady CDMO share gains, new plants, slowly building exports. Management refuses to give numbers, which limits scoring, but the growth record is long and steady. The one slip is Plant-6, which moved from 'within FY26' to September 2026.

5. Bottom line

Durable earning trigger? → YES

CDMO share gains are concrete, repeated every quarter and clearly in the numbers, with fresh capacity now live. Trade generics and exports are side stories.

Management consistent? → YES

Fifteen straight record quarters and a consistent story. Plant-6 ran a few months late and margins are below the hoped-for band, but nothing has been oversold.

6. Checkpoints for next quarter

- Plant-6 adds to revenue in the December quarter
- CDMO revenue keeps growing faster than the Indian pharma market
- Trade generics stop shrinking as new launches replace codeine products
