Sanghvi Movers Ltd: Concall Tracker

Crane rental, wind-farm construction and Gulf crane hire · Screener: SANGHVIMOV · BSE 530073 · Quarter folder Q2-2027 · Builds on the Q1-2027 report (coverage to the 3 Aug 2026 call) · New call deep-read: Q2 FY27, 3 Nov 2026

1. Snapshot

What the business does: Sanghvi Movers is India's largest crane-rental company. It hires out very large mobile cranes, with operators, to lift heavy kit at wind farms, cement and steel plants, refineries, power plants and bridges, and charges a monthly rent per crane. Beside it sit Sangreen, which builds whole wind farms for power producers (little capital, thinner margin), and a crane-hire arm in Saudi Arabia and Qatar where rents per crane are much higher than in India.

Measure	Value	Plain-English read
Market value	₹3,164 cr	What the market values the whole company at today, at about ₹366 a share.
Q2 FY27 revenue	₹277 cr, up 32%	Sales for Jul-Sep 2026. Lower than Q1's ₹380 cr because of the monsoon and the timing of wind projects.
Q2 FY27 EBITDA	₹106 cr, up 20%	Operating profit before interest, tax and depreciation; margin about 36% of total income.
Q2 FY27 net profit	₹40 cr	Up from ₹36 cr a year ago; H1 profit ₹106 cr, up 22%.
Order book	₹1,582 cr	Work in hand for FY27, up 26% in just 13 weeks. Inquiry pipeline about ₹6,700 cr.
Customer collection days	81 days (116 in Q1)	How long customers take to pay. A big improvement; Gulf down to 165 days from 201.
Gross debt to equity	0.58x	About 58 paise borrowed per ₹1 of owners' money, within its own 0.72x ceiling.

2. Concall coverage

Quarter	Call date	Transcript read?
Q1 FY26 → Q4 FY26 (4 calls)	Aug 2025 → May 2026	Carried forward from earlier reports
Q1 FY27 (prior boundary)	3 Aug 2026	Read for the Q1-2027 report
Q2 FY27	3 Nov 2026	Newly deep-read in full ★

Only the Q2 FY27 call was read in full this quarter; the backstory comes from the prior report.

★ Latest concall highlights: Q2 FY27 (3 Nov 2026)

- **Growth on the year, dip on the quarter.** H1 revenue ₹657 cr (+36%), EBITDA ₹245 cr (+25%), profit ₹106 cr (+22%). Q2 was below Q1 because of the monsoon, wind-project phasing and late Gulf crane deliveries; management calls it timing, not demand.
- **Order book up 26% in 13 weeks.** ₹1,582 cr: ₹683 cr India/Botswana cranes, ₹45 cr Gulf cranes, ₹854 cr wind construction. FY27 guidance reaffirmed (income ₹1,400-1,500 cr, EBITDA ₹525-575 cr), with 8-10% of the wind work possibly slipping into next year.
- **Saudi capex pushed out.** Shipping and port disruption from the West Asia conflict delayed crane deliveries; about ₹80-90 cr of Gulf capex moved to FY28. FY27 capex ceiling cut to ₹583 cr (₹182 cr done in H1). The Gulf cranes that are there run at 86-87% utilisation, 3.8% monthly yield, 24% EBITDA margin.
- **Collections fixed.** Group collection days 81 from 116, H1 operating cash flow ₹231 cr (82% of all of FY26), no working-capital lines drawn this year.
- **Mix shifts to wind.** Full-year mix now about 60:40 crane rental to wind construction (was two-thirds/one-third). Better return on capital, lower blended margin. India crane margin 46% in H1 vs 53% in FY26; India utilisation 71% in Q2 (monsoon) vs 86% in Q1.

Business mix & capacity

By business (H1 FY27): Crane rental about 62%, wind construction about 36%, project EPC 2% (being wound up). Full year now seen near 60:40.

Domestic vs overseas: Not given as a percentage. Gulf income ₹39 cr in H1 and under 5% of gross block, so still overwhelmingly Indian.

Capacity utilisation: India and Botswana 78% for H1 (86% in Q1, 71% in the monsoon Q2); Gulf 86%. H2 is the busy season.

★ Since our last report

Builds on the Q1-2027 report (call of 3 Aug 2026). Prior verdicts: trigger YES, consistency MAYBE (leaning yes).

Prior read	What we said then	What the new call shows	Movement
Trigger (YES)	India heavy-lift demand from the capex cycle.	H1 growth +36%, order book +26% in 13 weeks, pipeline ₹6,700 cr.	Confirmed
Consistency (MAYBE)	Better disclosure, Saudi breakeven on time, but margin and capex slipping.	Guidance reaffirmed, collections much better, but Gulf capex deferred again.	On-track
Order book covers FY27; new cranes earn in H2	₹1,250 cr order book; ₹652 cr capex mostly in H2.	Order book ₹1,582 cr; capex cut to ₹583 cr, part of Gulf moved to FY28.	Partly
Margins slipping, slow payers	Margin down to 35%; Gulf 201 days.	Collection days 81 (from 116), Gulf 165; crane margin 46% vs 47% in Q1.	Partly

Checkpoint results: Partly I Partly

Verdict change: Both verdicts unchanged. Collections and the order book improved, but the Gulf crane build-out slipped again, this time for reasons outside their hands.

3. Earning Trigger thesis ★

Still India's building cycle: wind farms, thermal and nuclear power, cement, steel and refineries all need very heavy lifts, and Sanghvi owns the biggest fleet. On top, Sangreen now does complete wind-farm builds and has framework talks with new turbine makers, and the Gulf earns almost double India's rent per crane. This quarter the wind side carried the growth; the Gulf is stuck behind shipping problems.

Trigger	What management said	Evidence so far	Horizon	Strength	Change since last report
India crane rental	Investment cycle has years to run; H2 is the strong season.	Order book ₹683 cr; Q2 yield 2.20% vs 2.04% a year ago.	Now to FY28+	Strong	unchanged
Sangreen wind construction	Full-scope wind-farm builds, margin 12-15%.	Order book ₹854 cr; H1 margin ~14%; framework talks with new OEMs.	Now to 3 yrs	Strong	↑ improving
Saudi / Gulf	High demand and yields; scale-up when cranes can be shipped.	86% utilisation, 3.8% yield; ₹80-90 cr capex moved to FY28.	FY28+	Moderate	↓ delayed
FY27 guidance	Income ₹1,400-1,500 cr, EBITDA ₹525-575 cr.	H1 EBITDA ₹245 cr; reaffirmed.	FY27	Moderate	unchanged

The catch: More growth from fixed-price wind contracts means a lower blended margin and cost-escalation risk they can't pass on. India crane margin has stepped down from FY26 because of hired-in kit and labour costs. Gulf scale depends on shipping normalising, which they say will take a while.

3b. Trigger check

Trigger type	Yes/ No	What was said (date)
Debt cut	No	Debt rose with capex; gross debt to equity 0.58x, seen 0.7-0.75x by year end.
New business	Yes	Sangreen taking full-scope wind-farm builds; framework talks/MOUs with OEMs as exclusive partner (3 Nov 2026).
Margin up	No	India crane margin 46% vs 53% in FY26.
New management	No	Same team.
New capacity	Yes	₹583 cr FY27 capex, ₹182 cr capitalised in H1, ~₹400 cr in H2 (3 Nov 2026).
Big orders	Yes	Order book ₹1,582 cr, up 26% from ₹1,253 cr in 13 weeks; pipeline ₹6,700 cr (3 Nov 2026).
Turnaround	No	Not applicable.
Promoter buying	No	No equity raise planned.

Single concrete driver: A fast-growing wind-farm construction order book and a full Indian crane fleet, with new cranes arriving in the second half.

3c. Margin bridge

Blended margin sits around 36% against the low 40s in FY26. India crane margin fell to 46% from 53% because of more hired-in cranes and trailers, freight, insurance, a new PF rule and a one-time staff incentive; management says the mix part stays but H2 utilisation should absorb fixed costs. Wind construction is a bigger share at about 14% margin. (lasting)

4. Management Consistency scorecard

Period / theme	What was promised	What actually happened	Verdict
FY26	Revenue growth 25-30%.	+37%.	Delivered
FY26	Saudi cumulative breakeven by H1 FY27.	Achieved; Gulf EBITDA margin 24% in H1.	Delivered
Aug 2026	Collect overdue bills this year.	Collection days 116 → 81; Gulf 201 → 165.	Delivered
Aug 2026	FY27 income ₹1,400-1,500 cr, EBITDA ₹525-575 cr.	Reaffirmed; H1 on track.	Too early
FY26-FY27	Big crane capex, Gulf cranes earning in H2.	Capex cut to ₹583 cr; ₹80-90 cr of Gulf capex to FY28.	Partly
Ongoing	Core crane margin to hold.	53% (FY26) → 46% (H1 FY27).	Missed

Narrative drift: The story (Elevate 2030, India cranes plus wind plus Gulf) hasn't moved. Disclosure is now detailed and guidance was held. The repeat problem is capex timing: for the second year running the crane build-out slides, this time blamed on West Asia shipping. Management was open about it and moved spend to match orders.

5. Bottom line: two verdicts

Durable earning trigger? → YES (vs last quarter: unchanged)

The order book jumped in one quarter, the wind business keeps doubling, and India rents are up on last year. The Gulf leg is stalled by logistics, and more growth now comes from thinner fixed-price wind work, so profit grows slower than sales.

Management consistent? → MAYBE (vs last quarter: unchanged)

They did what they said on collections and kept guidance, and the Saudi milestone held. But capex slipped again and crane margins haven't come back. Q3 and Q4 are the test: busy season, H2 capex and the guided EBITDA range.

6. Checkpoints for next quarter

- Full-year EBITDA lands inside the ₹525-575 cr guidance
- India crane utilisation rebounds after the monsoon
- Most of the ~₹400 cr H2 capex gets capitalised by March
