Premier Polyfilm Ltd

Concall Tracker · Q2 2027 (quarter ended Sep 2026) · Global web deep-dive (no concall transcripts) · NSE: PREMIERPOL · BSE: 514354 · Prepared 11 Nov 2026

1. Snapshot

What the business does: Premier Polyfilm (founded 1992) rolls PVC (polyvinyl chloride, a common plastic) into sheets and rolls by calendering. It sells artificial leather cloth (car, bus and rail seats, furniture), vinyl flooring, PVC films and sheeting, PVC geomembranes (big waterproof liners for ponds, canals and landfills), pool liners and wallpaper. Two plants in Uttar Pradesh (Sahibabad and Sikandrabad), mostly selling in India with some exports. It earns the margin between PVC resin and the finished roll.

Market cap	₹958 cr at ₹91.5 a share. The market's price for the whole company, a small-cap; up from about ₹831 cr at our last report.
P/E	26.1x. Buyers pay about ₹26 for each ₹1 of yearly profit, a little richer than three months ago.
Revenue	FY26 ₹296 cr, trailing twelve months ₹351 cr (Screener net sales). Sales were flat from FY23 to FY25 and have sped up sharply since late 2025.
Net profit	FY26 ₹32 cr, trailing twelve months ₹37 cr. Profit has roughly tripled since FY23.
Operating margin	16% for FY26, but slipping each quarter since Dec 2025: 16.8%, 16.2%, 15.4%, now 14.2%.
Debt	Borrowings nil in Sep 2026 (₹19 cr in Mar 2026). CRISIL reaffirmed BBB+/Stable in Aug 2026. It funds itself from profits.
Returns	ROCE 28.9%. It earns about 29 paise of operating profit per rupee of capital, a high return.

2. Coverage

No concall transcripts available: global web deep-dive

Premier Polyfilm doesn't hold investor calls, and Screener lists no transcripts. This report reads the published results and exchange filings and carries the backstory forward from our Q1-2027 report. Sources: Screener.in financials; NSE filings Jul-Oct 2026 (results of 10 Oct, CRISIL rating letter of 10 Aug, AGM outcome of 24 Sep, three NSE price/volume clarifications); MultiBagg and other results coverage of Q2 FY27.

Period	Source	Note
FY23 → Q1 FY27	Carried forward from Q1-2027 report	Backstory: numbers trend, Tamil Nadu land, promoter buying
Q1 FY27 (Jun 2026)	Prior report boundary	Record quarter, sales up about a third
Q2 FY27 (Sep 2026) ★	Results filed 10 Oct 2026 + filings since Jul	Newly read in full this quarter

Latest update highlights: Q2 FY27 (Sep 2026)

- **Another record.** Net sales ₹102.6 cr, up 39% on last year (gross "revenue from operations" is ₹115 cr including taxes). The fourth quarter in a row of fast growth.
- **Profit lagged.** Net profit ₹9.8 cr, up 22%. Good, but well behind sales.
- **Margin keeps sliding.** Operating margin 14.2% vs 16.7% a year ago and 15.4% last quarter. The company gave no reason; PVC resin prices and a lower-priced mix are the likely causes, but that's our guess, not theirs.

- **Debt cleared** and CRISIL reaffirmed its rating. Promoters hold 70.8%, about where they were after last year's buying.
- **Nothing on Tamil Nadu.** No filing on the new plant's cost or start date. A small ₹4 cr of construction work in progress appeared on the books in Sep 2026, the first since FY23. The stock jumped in Aug and Sep and NSE asked twice; the company said there was no undisclosed news.

2d. Since our last report (builds on Q1-2027, results to Jun 2026)

Prior verdicts: **Trigger MAYBE** (leaning positive) · **Consistency YES** (with a caveat).

Prior read	What we said then	What Q2 shows	Movement
Trigger	Demand-led growth real; next leg needs the Tamil Nadu plant	Growth even faster; plant still silent	On-track
Consistency	Delivers on numbers; plant slow	Same	Confirmed
Promise: sales growth	Record quarter, share gains	Sales up 39%, new record	Confirmed
Promise: margins hold	Healthy but not expanding	Down a third quarter in a row	Slipping
Promise: Tamil Nadu plant	Land only, no capex or date	Still no capex or date; small work in progress	Slipping

The last report had no checkpoints box, so the promise rows above are scored instead. **Checkpoint results: Delivered I Missed I Missed** (sales growth / margin / Tamil Nadu plant).

Verdict change: both unchanged. Sales growth got stronger, the margin slide got a bit worse, and the plant is still only land.

2c. Business mix & capacity

Domestic vs export: not broken out; mainly domestic with some exports. **Capacity utilisation:** not disclosed. With sales up about 40% on the same two plants and little new spending, the existing lines are being run much harder, which makes the Tamil Nadu plant matter more.

3. Earning-trigger thesis

The driver is volume: vinyl flooring, leather cloth and geomembranes selling into construction, cars and furniture, with sales growing faster each quarter on the same plants. Profits follow, but less than fully, because margins have slipped for three quarters. The next leg needs new capacity, and the Tamil Nadu greenfield plant, two years after the land purchase, still has no public cost or timeline. Debt-free with high returns, it can afford it easily.

Trigger	Record says	Evidence	Horizon	Strength	Change since last report
Volume growth on existing plants	Share gains in flooring and leather cloth	Q2 sales up 39%, TTM ₹351 cr	Now	Strong	↑ faster growth
Margin step-up	Margins doubled FY22 → FY26	14.2% now from a 16.8% peak	Ongoing	Weak	↓ third quarterly drop
Tamil Nadu greenfield plant	Land bought Oct 2024	No capex or date; ₹4 cr work in progress	Multi-year	Unproven	unchanged

3b. Trigger check

Trigger type	Yes/No	What the record says (date)
Debt cut	No	Borrowings went to nil, but the company made no statement about it
New business	No	Nothing announced
Margin up	No	Margins falling
New management	No	Executive Director R B Verma re-appointed (AGM, 24 Sep 2026); no new CEO/MD/CFO
New capacity	No	Tamil Nadu plant announced in 2024 but no start date filed
Big orders	No	No order book disclosed
Turnaround	No	n/a
Promoter buying	No	No new buying this quarter; stake 70.8% after rising from 67.6% earlier in 2026

Single concrete driver: fast-rising sales of vinyl flooring and artificial leather on its two Uttar Pradesh plants, with a planned Tamil Nadu plant as the next step.

3c. Margin bridge

Operating margin is 14.2% now vs 16.7% a year ago. The company doesn't explain it. PVC resin prices and a cheaper product mix are the usual causes in this business, and staff costs rose earlier in the year, but with no call there's no management word on whether it lasts. (one-off, unconfirmed)

4. Management consistency scorecard

No calls, so this reads consistency from results and disclosed actions.

Period	Implied intent	What happened	Verdict
FY22 → FY26	Grow and improve profitability	Sales ₹212 cr → ₹296 cr; profit ₹10 cr → ₹32 cr; margin 9% → 16%	Delivered
FY24 → Sep 2026	Keep the balance sheet clean	Borrowings nil; CRISIL BBB+ reaffirmed	Delivered
Oct 2024 →	Build a Tamil Nadu plant	Two years on, land and a small work-in-progress entry	Slipping
Recent quarters	Keep growing profitably	Sales up 35-39%, profit up 22-51%, margins slipping	Partly

Narrative drift: there is no spoken story to drift. The record is a steady, quiet compounder that keeps its balance sheet clean. The weak spots are that it tells investors almost nothing (no calls, no capex plan) and that the one expansion it announced hasn't moved visibly in two years.

5. Bottom line: two verdicts

Durable earning trigger? → MAYBE · vs last quarter: unchanged

Sales growth got stronger this quarter and it's real. What keeps it at MAYBE is that margins are sliding and the capacity that would carry growth past the current plants is still only land in Tamil Nadu. A filed capex plan or a start date upgrades it.

Management consistent? → YES (with a caveat) · vs last quarter: unchanged

Nothing new moved it. The numbers keep coming in, debt is gone, and the rating held. The caveat stays: no calls to test promises against, and the Tamil Nadu plant is slow.

6. Checkpoints for next quarter

- Operating margin stops falling (Dec 2026 quarter at or above 14.2%)
- Tamil Nadu plant gets a filed cost or start date
- Sales keep growing by more than a fifth on last year

Not investment advice. Do your own due diligence. Figures from Screener.in (net sales basis) and NSE filings; data providers differ on gross vs net revenue.
