GPT Healthcare Ltd

Concall tracker report · Q2 2027 (Sep 2026 quarter) · prepared 11 Nov 2026

1. Snapshot

Runs the ILS chain of mid-sized multi-specialty hospitals in Eastern and Central India: Salt Lake, Dumdum and Howrah around Kolkata, Agartala in Tripura, and Raipur in Chhattisgarh, with Jamshedpur under construction. About 90% of revenue comes from cash and insurance patients.

- Market cap about Rs 1,182 cr: what the market values the whole company at.
- FY26 sales Rs 473 cr, up 16%: growth picked up after a flat FY25.
- Operating margin slipped from 22% (FY24) to 18% (FY26): start-up losses at the new Raipur hospital.
- Sep 2026 quarter: sales Rs 136 cr, up 14%; net profit Rs 15 cr vs Rs 11 cr; margin back to about 20%.
- Borrowings about Rs 92 cr; Jamshedpur adds about Rs 25 cr of debt this year.

2. Concall coverage

Quarter / source	Date	Read?
Q4 FY24	May 2024	Yes (skimmed)
Q1 FY25	Aug 2024	Yes (skimmed)
Q2 FY25	Nov 2024	Yes (skimmed)
Q3 FY25	12 Feb 2025	Yes (skimmed)
Q4 FY25	May 2025	Yes (skimmed)
Q1 FY26	Aug 2025	Yes (skimmed)
Q2 FY26	Nov 2025	Yes (skimmed)
Q3 FY26	Feb 2026	Yes
Q4 FY26	May 2026	Yes
Q1 FY27	4 Aug 2026	Yes, in full
Q2 FY27	Nov 2026	Transcript not yet published

Ten calls across about two and a half years. The Q2 FY27 transcript isn't out yet, so the latest call read is Q1 FY27 plus the Q2 FY27 numbers.

Latest concall highlights - Q1 FY27 (4 Aug 2026)

- Total income up 18% and profit up 66% on a year ago; EBITDA margin 20.4%.
- Mature hospitals at about 58% occupancy; network 45.5% including Raipur. Average revenue per occupied bed (ARPOB) up to Rs 42,350 from a richer case mix (cardiology, oncology, neurosciences, transplants), with no tariff increase.
- Raipur occupancy 17% vs 7% a year ago, aiming for about 30% by year end; still losing about Rs 3 cr a quarter. First liver transplant done there.
- Jamshedpur 155-bed hospital on schedule for Q4 FY27. A seventh hospital is being evaluated in cities such as Cuttack, Ranchi, Patna, Banaras or Prayagraj, to take the network past 1,000 beds in about two years.
- Long-term target of about 25% ROE and ROCE.

Business mix & capacity

- Domestic vs export: all hospitals are in India; Agartala gets some patients from Bangladesh. No split given.
- Capacity: mature hospitals about 58% occupied, network 45.5% with Raipur; Raipur at 17%, aiming for about 30% by FY27 end. Jamshedpur (155 beds) due Q4 FY27.

3. Earning trigger thesis

The earnings story is more beds and better beds: Raipur filling up and turning profitable, Jamshedpur opening in Q4 FY27, and a shift to complex, higher-paying procedures (robotic surgery, transplants, cancer care) at the older hospitals. The mix shift is already showing in ARPOB and margins. Raipur is slower to break even than first said, and the 1,000-bed goal keeps sliding.

Trigger	What management said	Evidence so far	Time horizon	Strength
Raipur ramp-up	Opened May 2025; EBITDA breakeven 'in the next 6 to 8 months' (Feb 2026)	Occupancy 17%; still about Rs 3 cr loss in Q1 FY27	FY27	Moderate: slower than promised
Jamshedpur hospital	155 beds, commissioning Q4 FY27	Construction on schedule (Aug 2026)	Q4 FY27	Moderate
Richer case mix	High-end tertiary care lifting ARPOB	ARPOB up across hospitals with no tariff increase	Ongoing	Strong
1,000-bed chain	Goal 'in the next 2-3 years' since May 2024	Still 'next 2 years' in Aug 2026; seventh hospital not picked	2-3 years	Weak: keeps sliding

3b. Trigger check

Trigger type	Yes/ No	What was said (date)
Debt cut	No	Debt to rise by about Rs 25 cr for Jamshedpur
New business	No	Not stated
Margin up	Yes	ARPOB up on 'incremental change in case mix' toward high-end tertiary care, no tariff increase (Aug 2026)
New management	No	Not stated
New capacity	Yes	Raipur ramping (17% occupancy); Jamshedpur 155 beds 'expected to be commissioned during Q4 FY27' (Aug 2026)
Big orders	No	Not applicable
Turnaround	No	Dumdum's turnaround already done in the prior year
Promoter buying	No	Not stated

Single concrete driver: The new Raipur hospital filling up toward breakeven and the Jamshedpur hospital opening in Q4 FY27, plus richer case mix at the Kolkata hospitals.

3c. Margin bridge

EBITDA margin was about 20% in the Sep 2026 quarter against about 19% a year ago and 18% for FY26. The older hospitals earned more per bed from complex procedures while Raipur's losses held at about Rs 3 cr a quarter; management expects those losses to taper through the year (lasting).

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
May 2024	Expand in Raipur and Ranchi; 1,000 beds in 2-3 years	Raipur opened May 2025; Ranchi dropped (only a candidate city by 2026); 1,000-bed goal still two years away	Partly
Feb 2025	Raipur to open early April 2025; Jamshedpur MoU	Raipur opened 2 May 2025; Jamshedpur under construction	Delivered
Feb 2026	Raipur EBITDA breakeven in 6-8 months	Still losing about Rs 3 cr in Q1 FY27; losses to 'taper down'	Slipping
Aug 2026	Jamshedpur in Q4 FY27; Raipur about 30% occupancy by year end	On schedule so far	Too early

The core plan, right-sized hospitals in underserved Eastern and Central Indian cities, hasn't changed. But the details move: Ranchi quietly fell away, the 1,000-bed target has been 'two to three years away' for over two years, and Raipur's breakeven is later than said.

5. Bottom line

Durable earning trigger? → MAYBE

There's a named driver (Raipur filling up, Jamshedpur opening, richer case mix) and the mix shift is in the numbers, but Raipur is still losing money and Jamshedpur is two quarters away.

Management consistent? → MAYBE

Raipur and Jamshedpur came roughly on time, but Ranchi was dropped, the 1,000-bed goal keeps sliding and the Raipur breakeven promise is slipping.

6. Checkpoints for next quarter

- Raipur occupancy keeps rising toward the year-end goal
- Raipur quarterly loss shrinks from about Rs 3 cr
- Jamshedpur stays on schedule for Q4 FY27
