Timken India Ltd

Concall Tracker · Q2 2027 · first report

1. Snapshot

Indian arm of the US bearing maker Timken. Makes tapered roller bearings for railways, trucks, tractors and industrial machines, and now spherical and cylindrical roller bearings at a new Bharuch plant. A large share is exported to its parent's customers worldwide.

Number	Value	What it means
Market cap	Rs 23,112 cr	What the market values the whole company at.
Q2 FY27 revenue	Rs 969 cr	Sales for the quarter, up 25%.
Q2 FY27 PBT margin	16.1%	Profit before tax per Rs 100 of sales, a little better than a year ago; EBITDA margin about 19%.
Q2 FY27 profit	Rs 116 cr	Net profit, up about 30%.
ROCE	About 18%	Decent return; held back by the new plant still filling up.
Stock P/E	53x	A full price, typical for a multinational's listed arm.

2. Concall coverage

Quarter	Date	Transcript read?
Q1 FY25	Aug 2024	Yes (key passages)
Q2 FY25	Nov 2024	Yes (key passages)
Q3 FY25	Feb 2025	Yes (key passages)
Q4 FY25	May 2025	Yes (key passages)
Q1 FY26	1 Aug 2025	Yes (key passages)
Q2 FY26	Nov 2025	Not found on NSE
Q3 FY26	9 Feb 2026	Yes (key passages)
Q4 FY26	19 May 2026	Yes (key passages)
Q1 FY27	5 Aug 2026	Yes (key passages)
Q2 FY27	30 Oct 2026	Yes, read in full ★

Nine calls across about two and a half years, from NSE filings; the Q2 FY26 transcript wasn't in the NSE list.

Latest concall highlights: Q2 FY27 (call held 30 Oct 2026)

- Revenue Rs 969 cr, up 25%; profit up about 30%. PBT margin 16.1%.
- Exports up 60% on a year ago and 30% on the quarter, now 27% of sales. Management expects healthy export momentum and more from North American rail later.
- Bharuch plant: about Rs 75 cr of revenue this quarter. The spherical roller (SRB) lines hit the promised 70% use; cylindrical (CRB) lines are still below 60%.
- Gross margin hit by about 1.3 points: half from mix (rail tender delayed, distribution weaker), half from steel and gas costs not yet passed on.
- Rail capacity expansion at Jamshedpur (about Rs 120 cr) and a plain-bearing line at Bharuch are on target, with commissioning soon.
- Merger of Timken GGB into Timken India is under way.

Business mix & capacity

Domestic vs export: Q2 FY27: exports 27%, mobile 21%, process industry 20%, rail 16%, distribution 15%.

> **Capacity use:** Bharuch SRB lines at about 70%, CRB below 60%.

3. Earning Trigger thesis

The trigger is the new Bharuch plant, which adds spherical and cylindrical roller bearings for industry that Timken India used to import or not sell, and lets the parent source more from India for export. It's showing: Bharuch revenue is rising and exports grew 60%. Rail expansion and plain bearings come next.

Trigger	What management said	Evidence so far	Time horizon	Strength
Bharuch SRB/CRB	70% use by September 2026	SRB 70%, CRB below 60%; Rs 75 cr a quarter	FY27	Strong
Exports to parent	Export momentum healthy	Up 60% this quarter	Ongoing	Strong
Rail expansion	Jamshedpur line on target	Not yet commissioned	Q3-Q4 FY27	Moderate
Plain bearings (GGB)	First line at Bharuch	On target	FY27-FY28	Unproven

3b. Trigger check

Trigger type	Yes/No	What was said (date)
Debt cut	No	Already debt-free
New business	Yes	Plain bearings line at Bharuch and GGB merger (30 Oct 2026)
Margin up	No	Gross margin down on mix and input costs
New management	No	
New capacity	Yes	Bharuch SRB lines at 70%, Jamshedpur rail expansion close to commissioning (30 Oct 2026)
Big orders	No	
Turnaround	No	
Promoter buying	No	

The single concrete driver: The new Bharuch plant filling up with industrial bearings that also feed the parent's exports.

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Aug 2024	Bharuch greenfield on schedule	Lines capitalised and producing	Delivered
2025	Steady rail growth	Rail up 17% in FY25 but tender delayed this quarter	Partly
Aug 2026	Bharuch about 70% use by September	SRB yes, CRB below 60%	Partly
May 2026	Broad-based growth in FY27	H1 revenue up about 20%	Delivered

Narrative drift: The story is steady: localise the parent's product range, build Bharuch, grow exports. Management is matter-of-fact about misses like the delayed rail tender. No big changes in the narrative over two years.

5. Bottom line

Durable earning trigger? → YES

Bharuch and exports are already in the numbers, with rail and plain bearings still to come.

Management consistent? → YES

The plant came in on schedule and most targets were hit or nearly hit.

6. Checkpoints for next quarter

- Bharuch CRB lines catch up toward 70% use
- Jamshedpur rail expansion commissions by December
- Steel and gas cost rises get passed on and margin holds
