NIBE Ltd

Concall Tracker · Q1-2027 update · Prepared 6 Nov 2026 · Ticker: NIBE · Builds on the Q4-2026 report · NO-CONCALL PATH

No concall transcripts were available on Screener. This report is based on a global web deep-dive (results coverage, exchange-filing news and order announcements published up to 30 Sep 2026), plus Screener's financial tables. Without management's own words, the promised-vs-delivered read stays limited.

1. Snapshot

What the business does: NIBE, based in Pune, makes metal structures and sub-assemblies for defence: rocket-launcher parts, naval and armour parts, and electronic box assemblies. It also assembles electric two- and three-wheelers and does a little software work. Defence fabrication is the main earner.

Number	Value	What it means
Market value	~₹1,770 cr	What the market says the company is worth, down from ~₹2,450 cr at our last report. Investors have cooled.
Share price	~₹1,143	Down about 30% from ₹1,608 in July.
Q1 FY27 total income (consolidated)	~₹65 cr	Sales for Apr-Jun 2026, down about 22% on the same quarter last year and a quarter of the ₹261 cr in Q4 FY26.
Q1 FY27 net profit	loss of ~₹12 cr	Back in the red after one profitable quarter. Three of the last four quarters were losses.
Q1 FY27 operating margin	about -11 to -13%	Costs ran above sales even before interest. The plant can't cover its fixed costs at this sales level.
Price-to-earnings (P/E)	~418x	Last-12-month profit is tiny, so the ratio is meaningless except to say the price assumes a big turnaround.
Return on capital (ROCE)	~11%	Earns about ₹11 a year on each ₹100 of capital. Modest.

2. Coverage

NO-CONCALL PATH. NIBE holds no earnings calls on record. Sources this quarter: Kotak Neo and Univest summaries of the Q1 FY27 results (announced mid-Aug 2026); ANI/Tribune report of NIBE's exchange filing on the Suryastra criticism (16 Jun 2026); Angel One and Construction World coverage of the Shirdi complex (late May 2026); Raksha Anirveda and Construction World on the Suryastra test firing (May 2026); Screener tables. Earlier history is carried forward from the Q4-2026 report.

Latest update highlights - Q1 FY27 (results announced ~14-16 Aug 2026)

- **Sales collapsed again.** Consolidated income ~₹65 cr versus ₹261 cr in Q4 and ₹84 cr a year ago. The big Q4 was not a new run-rate.
- **Back to a loss.** Net loss ~₹12 cr versus a ₹28 cr profit in Q4. Operating profit before interest was about -₹7.5 cr.
- **Suryastra tested, then criticised.** The 300 km rocket launcher for the Army order completed test firing at Chandipur on 18-19 May 2026. In June a defence website called it "screwdriver" assembly of foreign kit and questioned the fast-track buy. NIBE filed a rebuttal saying it meets every Army requirement,

admits the first version relies on a foreign tech partner (from a March 2025 agreement) and says local content will rise in phases.

- **Big new complex.** The NIBE Group opened a defence manufacturing complex at Shirdi in May 2026 (155mm shell plant, explosives tech, rocket systems), inaugurated by the Defence Minister. How much of it sits in the listed company wasn't clear from public sources.
- **No new big orders** were reported between July and September 2026. No management comment on the weak quarter was found.

Business mix & capacity. Segment split, domestic vs export split and plant utilisation are **not disclosed**. Mostly Indian Army work, with an export leg through an Israeli defence maker (Elbit). Capacity is still being built, so utilisation is likely low, which fits the losses in weak quarters.

Since our last report

Builds on the Q4-2026 report (Q4 FY26 results, May 2026). Prior verdicts: trigger **MAYBE**, consistency **MAYBE**.

Prior read	What we said then	What's new	Movement
Trigger: MAYBE	Real orders, lumpy delivery, cash burn.	Orders still there, but Q1 shows how thin it is between deliveries.	Slipping
Consistency: MAYBE	Story steady, delivery jerky.	Another loss quarter; public questions over how "indigenous" Suryastra is.	Slipping
Army order (12-month delivery from Jan 2026)	Should drive revenue within a year.	Test-fired in May; little revenue in Q1. Bulk of delivery still ahead.	Too early
Israeli export order (by Nov 2027)	Two years to deliver.	No update found.	No news
Cash burn and debt	Free cash flow -₹118 cr in FY26.	A loss quarter adds to the strain. No new balance-sheet data until the half-year.	Unchanged

Verdict change: both verdicts **unchanged at MAYBE**, but closer to NO than last time. The orders haven't gone away, so it's not a NO yet. Next two quarters are the real test, since the Army order should be delivered by around Jan 2027.

3. Earning-trigger thesis

The trigger is still defence orders, mainly the Suryastra rocket launcher for the Indian Army and the Israeli export launcher order. If NIBE ships the Army order on time, the next two quarters should look like Q4 FY26, not Q1. The worry is that between big deliveries the company loses money, and now there's a public question mark over how much of the launcher is really made in India.

Trigger	What the record says	Evidence so far	Horizon	Strength	Change since last report
Indian Army Suryastra order	Rocket-launcher system, 12-month delivery from Jan 2026.	Test-fired May 2026; drove part of Q4; little in Q1.	By ~Jan 2027	Moderate	↓ criticism of local content
Israeli OEM export order	300 km launchers, delivery by Nov 2027.	No update.	FY27-28	Moderate	unchanged

Shirdi complex / capacity	Shells, explosives, rockets.	Opened May 2026; unclear what sits in the listed company.	2-3 yrs	Unproven	unchanged
EV assembly	Small side business.	No disclosure.	Long	Weak	unchanged

4. Management-consistency scorecard

Period	Implied promise	What happened	Verdict
FY22 → FY25	Rapid scale-up	Sales went from ~₹21 cr to ₹481 cr	Delivered
FY26	Growth on order book	Sales fell ~13%; two loss quarters, then a big Q4	Missed
Q1 FY27	Order book converts steadily	Sales down ~22% YoY, back to a loss	Missed
Suryastra	Indigenous 300 km launcher	Tested; but company admits the first version leans on a foreign partner	Partly
Cash generation	Growth funds itself	Still burning cash	Missed

Narrative drift: the headline story, "fast-growing defence order winner", is unchanged and the big events (Shirdi opening, Suryastra test) keep it in the news. But the quarterly numbers keep swinging from loss to profit and back. And with no calls, there's no place where management explains a bad quarter.

5. Bottom line

Durable earning trigger? → MAYBE vs last quarter: unchanged

Nothing new was won and Q1 showed the business loses money between big deliveries. The Army and Israeli orders are still live, so there is a driver. But it's lumpy and now carries a local-content question. It needs the Army deliveries to show up in Q2-Q3 to hold even this rating.

Management consistent? → MAYBE vs last quarter: unchanged

The story hasn't changed. Delivery has: three loss quarters out of four against a growth pitch. They did answer the Suryastra criticism quickly and openly through an exchange filing, which counts for something. No concalls means there's no way to hold them to specific promises.
