Park Medi World Ltd - Concall Tracker

Do the earnings calls show a durable earning trigger, and has management been consistent about it?

Ticker: PARKHOSPS (NSE/BSE 544645) | Quarter: Q1 2027 (Apr-Jun 2026) | Report date: 6 Nov 2026 | Source: Screener.in earnings-call transcripts

1. Snapshot

What the business does: Park Medi World runs the "Park Hospitals" chain in North India: 16 multi-specialty hospitals with about 3,960 beds at June 2026 across Haryana, Punjab, Delhi-NCR, Rajasthan and Uttar Pradesh, with Uttarakhand added in August. It earns by treating patients, and roughly three-quarters of its billing comes from government health-insurance schemes (mainly CGHS, the central-government employees' scheme, and ECHS for ex-servicemen). Its edge is cost: it buys or builds hospitals for about ₹36-37 lakh a bed, well under listed peers, and keeps prices affordable.

MARKET VALUE
₹10,864 cr
What the market prices the whole company at today. Down from about ₹12,700 cr at our last report.

Q1 FY27 REVENUE
₹476 cr
Sales for Apr-Jun 2026, up 19% on a year ago. Solid, a touch slower than Q4's 30%.

Q1 FY27 NET PROFIT
₹89 cr
Up 35%. Profit grew faster than sales because the interest bill nearly vanished after debt repayment.

OPERATING MARGIN (EBITDA)
26.5%
About 26 paise of operating profit per ₹1 of sales (before interest, tax, depreciation). Flat and healthy.

FY27 GUIDANCE
₹2,080 cr / ₹360 cr
Management's first full-year target: revenue +24%, profit +32%. A number to hold them to.

DEBT / CASH
₹26 cr / ₹300 cr
Term debt is tiny and fixed deposits are about ₹300 cr, so the balance sheet is effectively net cash.

Market value from Screener (6 Nov 2026). Quarterly figures are consolidated, as stated on the call. At FY26 profit of ₹274 cr the stock trades at about 40 times a year's profit, which is pricey and assumes fast growth.

2. Concall coverage

Quarter	Call date	Transcript read?
Q3 FY26 (Oct-Dec 2025), maiden call after Dec 2025 listing	29 Jan 2026	Carried forward from Q4-2026 report
Q4 & full-year FY26 (prior report's boundary)	13 May 2026	Carried forward from Q4-2026 report
Q1 FY27 (Apr-Jun 2026)	**4 Aug 2026**	**Newly deep-read in full ★**

Only the Q1 FY27 call was read in full this quarter; the backstory comes from the Q4-2026 report. Three calls in all since listing, so the track record is still short. Calls after 30 Sep 2026 are left for the next report.

Latest concall highlights - Q1 FY27 (4 Aug 2026)

- **Steady quarter.** Revenue ₹476 cr (+19%), EBITDA ₹126 cr (+20%, margin 26.5%), profit ₹89 cr (+35%, margin 18.6%). Plain read: sales grew at a good clip and profit grew faster as interest costs fell away.
- **First hard full-year guidance.** FY27 revenue ₹2,080 cr (+24%), EBITDA ₹530 cr (+25%), profit ₹360 cr (+32%). The CFO said they expect to beat it. Plain read: management has now put a public number on the year.
- **Three more hospitals lined up.** Bought the 330-bed Medicity hospital in Rudrapur, Uttarakhand for ~₹177 cr (opened 2 Aug 2026, a sixth state), agreed to buy 150-bed Mehar Hospital in Zirakpur for ~₹107 cr, and is adding 100 beds at Palam Vihar, Gurgaon. Bed target lifted to 4,740 by Mar-2027 and 5,740 by Mar-2028 (was 5,460).
- **Occupancy dipped on purpose.** Network occupancy fell to 56% from 68% a year ago because 960 new beds (Bathinda, Agra, Panchkula) entered the count at once. Revenue per occupied bed (ARPOB) rose 12% to ₹30,444 a day, and high-end specialties are now 62% of revenue.
- **Tone:** very confident ("super confident in the growth roadmap"), with margin guidance held at EBITDA 26-27% and net margin 17-18%.

Business mix & capacity (quick facts)

- **Domestic vs export:** 100% domestic. All hospitals are in North India. Plain read: a pure India hospital story.
- **Capacity utilisation:** about 56% network occupancy in Q1 FY27 on 3,960 beds; management expects the full-year figure to come in below FY26's 64%. Plain read: close to half the beds are empty on an average day, mostly the new ones still filling up, so there's plenty of room to grow without building more.
- **Expansion:** 4,290 beds after Rudrapur, 4,740 by Mar-2027 (Narela, Zirakpur, Palam Vihar in Nov-Dec 2026), 5,740 by Mar-2028. Capex of ~₹767 cr for 2,130 beds over FY27-28, all from cash and IPO money.

Since our last report ★

Builds on the Q4-2026 report (boundary call 13 May 2026). Prior verdicts: **Durable trigger: YES** | **Management consistent: MAYBE**.

Prior read	What we said then	What the new call shows	Movement
Trigger: YES	Cheap, fast bed addition plus filling the beds	Bed target raised again, Rudrapur live, profit +35%, FY27 guide +32% profit	Confirmed
Consistency: MAYBE	Too little history; one small timing slip	Margins and ARPOB on guidance again; but the FY27 bed count changed shape (an expected Kanpur unit dropped out, replaced by Zirakpur and Palam Vihar)	On-track
Occupancy ramp	64% for FY26, climbing	56% in Q1 as 960 new beds diluted the average; FY27 to come in lower	Slipping (expected)
CGHS rate hike	~5-7.5% net benefit from FY27	Partly flowing from Q1, fuller from Q2-Q3, but most of it will be spent on equipment and upkeep rather than drop to profit	Slipping
Debt-free / Narela opening	Repay last ₹28 cr this quarter; Narela bought	Debt only down to ₹25.6 cr; Narela "on track" for Nov-Dec 2026	On-track, slow

Verdict change this quarter: both unchanged. The growth engine is working and getting bigger. The CGHS story got quietly weaker, which keeps consistency at Maybe.

3. Earning trigger thesis

The headline: Park grows earnings by **adding beds cheaply and then filling them** with higher-value treatments. It keeps buying hospitals (now Rudrapur and Zirakpur) and bolting beds onto existing clusters, then ramps occupancy and shifts the mix toward heart, brain, cancer and transplant work. All of it is paid for from cash and IPO money. This quarter the price per bed on the two acquisitions was higher than its usual level, but management says the blended cost stays around ₹36 lakh a bed.

Trigger	What management said	Evidence so far	Horizon	Strength	Change since last report
Bed addition	4,740 beds by Mar-27; 5,740 by Mar-28	Panchkula and Rudrapur live; 450 more beds dated for Nov-Dec 2026	FY27-28	Strong: on plan and self-funded	↑ target raised by 280 beds
Occupancy ramp	New units to fill over several quarters; FY27 occupancy lower	Network 56% vs 68%; Agra and Panchkula "in line with expectations"	2-3 yrs	Moderate: the lever is there but the numbers are going the wrong way for now	↓ diluted by new beds
Case mix / ARPOB	ARPOB growth 10-12% a year for two years	ARPOB +12% to ₹30,444; high-end mix 62% (+440 bps)	Ongoing	Strong: showing up every quarter	↑ now a stated guide
Payer mix shift	Government share 77% to 70% in 12-18 months	77:23 today	FY27-28	Unproven: stated, not yet visible	new

CGHS rate hike	~7-7.5% boost to rates, mostly reinvested	Partial in Q1	FY27	Weak as a profit driver	↓ benefit won't reach profit

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Jan 2026 call	Add 660 beds in FY26 (Agra, Panchkula by March)	610 added; Panchkula slipped ~5 weeks to Apr-2026	Partly
Jan 2026 call	Debt-free by end-Feb	₹28 cr at Mar-26, ₹25.6 cr at Jun-26	Partly
May 2026 call	EBITDA margin 26-27%, net margin 15-17%	Q1 FY27 EBITDA 26.5%, net 18.6%	Delivered
May 2026 call	ARPOB rising with case mix	ARPOB +12%, high-end mix 62%	Delivered
May 2026 call	~5,460 beds by Mar-2028	Raised to 5,740; FY27-end mix changed (Kanpur gone, Zirakpur and Palam Vihar in)	Delivered, story shifted
May 2026 call	CGHS benefit of 5-7.5% from FY27	Flowing in, but now mostly spent on capex and upkeep	Partly
Aug 2026 call	FY27: revenue ₹2,080 cr, profit ₹360 cr; Narela, Zirakpur, Palam Vihar in Nov-Dec	Not yet testable	Too early

Narrative drift: The core story hasn't moved in three calls: buy cheap, fill beds, keep prices affordable, no new debt. Numbers have landed on guidance each time. The wobbles are at the edges. Bed lists get reshuffled between calls, the CGHS gain went from a profit boost to something mostly reinvested, and the last bit of debt is lingering. Acquisition prices per bed are also creeping up, from the low ₹30 lakhs to ₹54-71 lakh on the latest two. Promoters must also sell about 8% of the company by Dec 2028 to meet listing rules, so a share sale is coming at some point.

5. Bottom line - two verdicts

Durable earning trigger? → YES (vs last quarter: unchanged)

Nothing this quarter weakened the main driver; if anything it got bigger. Two more hospitals, a raised bed target and a first full-year profit guide of +32% all point the same way, and profit is already rising faster than sales. The catch is occupancy: it fell to 56% and will stay low for a while as new beds pile in, so the payoff depends on filling them over the next two to three years.

Management consistent? → MAYBE (vs last quarter: unchanged)

Still a short record with mostly good delivery. Margins and pricing hit guidance again. What holds this at Maybe is the softer edges: the CGHS gain was talked up and is now mostly going back into the hospitals, the bed list changes shape every call, and debt-free took longer than promised. The FY27 guidance gives a clean test; if they hit it, this moves to Yes.

Concall-tracker report generated 6 Nov 2026 from Park Medi World's Q1 FY27 earnings-call transcript (4 Aug 2026), building on the Q4-2026 report.
