Gujarat Kidney & Super Speciality Ltd

Concall Tracker, Q1 2027 · NSE/BSE: GKSL · written 6 Nov 2026 · builds on our Q4-2026 report · NO-CONCALL PATH (web deep-dive, sources up to 30 Sep 2026)

> **Plain-word key. Standalone**: the parent company's own hospitals only. **Consolidated (group)**: parent plus the hospitals it has bought. **EBITDA / operating margin**: operating profit before interest, tax and depreciation, as a share of sales. **IPO**: the company's first sale of shares to the public, in December 2025. **NCLT**: India's company-law court.

1. Snapshot

A chain of mid-sized hospitals in central Gujarat (Vadodara, Godhra, Bharuch, Anand area, and now Ahmedabad through Parekhs Hospital). It started in kidney care and urology and grows mainly by buying hospitals with its IPO money, not by building them.

Number	Value	What it means
Market value	₹1,216 cr	What the market says the company is worth today (share price ₹156; IPO price was ₹114).
Q1 FY27 group sales	₹34.3 cr	Apr-Jun 2026, more than double last year's ₹15.3 cr. Almost all of that jump is hospitals it bought.
Q1 FY27 group operating profit	₹8.4 cr	Slightly *lower* than last year's ₹8.6 cr, despite double the sales.
Group operating margin	24%	₹24 of operating profit on every ₹100 of sales, down from 56% a year ago. Better than the 21% of the March quarter.
Q1 FY27 group profit after tax	₹5.3 cr	Flat on last year's ₹5.4 cr. More sales, same profit.
Parent's own sales	₹9.2 cr	The original hospitals alone, down 19% on last year. Margin 32%, down from 55%.

Quarter figures from Screener.in's consolidated and standalone result tables (cross-checked with a Univest results write-up of Sep 2026). Market value from Screener.in today.

2. Concall coverage

> **No concall transcripts were available on Screener up to 30 Sep 2026, so this report is based on a web deep-dive.** Sources used:

> - Screener.in consolidated and standalone quarterly tables, shareholding table.
> - Univest, "Is Gujarat Kidney a good buy after Q1 FY27 results" (updated 11 Sep 2026), and StockGro results summary.
> - Whalesbook filings coverage: FY26 results and CEO search (28 May 2026), Bharuch subsidiary (Apr 2026), auditor changes (Mar 2026).
> - AngelOne, HDFC Sky, ScanX coverage of the Parekhs Hospital and Harmony Medicare deals and the IPO-objects postal ballot.
> - Trendlyne filing list (results filed mid-August 2026; independent director appointed August 2026).
>
> Builds on our Q4-2026 report (dated 5 Jul 2026, covering up to the March 2026 quarter). This report covers the Apr-Jun 2026 quarter and news up to 30 Sep 2026.

★ Latest update highlights: Q1 FY27 (Apr-Jun 2026, results filed Aug 2026)

- **Sales up, profit flat.** Group sales ₹34.3 cr, more than double last year and up about 12% on the March quarter. Profit ₹5.3 cr, flat. Margin 24% versus 56% a year ago. Bigger, but not more profitable.
- **The original hospitals shrank.** Parent-only sales fell 19% to ₹9.2 cr. That's the second warning in a row after the March quarter's margin drop.
- **Bought hospitals are doing the lifting.** Parekhs Hospital in Ahmedabad (₹77 cr, completed March 2026) and the rest of Harmony Medicare explain most of the jump. No new deal was announced between July and September.
- **Still no CEO.** In May the company said it had put off appointing one while the search goes on. An independent director joined in August.
- **No guidance.** No earnings call, no targets, no commentary that we could find for the quarter.

Business mix & capacity

India vs abroad: 100% domestic. A local Gujarat hospital chain with no export income.

Capacity: the last public figure was about 490 beds across roughly seven hospitals, around 340 of them running. Bed occupancy hasn't been disclosed, so we can't say how full the hospitals are.

★ Since our last report

Builds on the Q4-2026 report (5 Jul 2026, covering to March 2026). Prior verdicts: trigger **MAYBE**, management **MAYBE**.

Prior read	What we said then	What's new	Movement
Trigger: MAYBE	Growth is bought, not organic	Even more so. Group sales doubled, own hospitals fell 19%.	Slipping
Management: MAYBE	Too new to judge; governance flags	No new red flags found. No CEO yet, no guidance.	Unchanged
Parent margin slip (17% in Q4 FY26)	A warning sign	Parent margin 32%, better than Q4 but far below 55% a year ago	Mixed
Deploy leftover IPO cash	₹109 cr still parked	No new acquisition announced Jul-Sep	Too early
Institutions leaving	FIIs and DIIs cut hard after listing	June holdings unchanged from March (FIIs 4.9%, DIIs 0.6%)	Stable

Verdict change: both unchanged, but the trigger leans weaker. Buying hospitals is adding sales without adding profit so far.

3. The earnings trigger

The plan is the same as at the IPO: use the ₹250 cr raised to buy hospitals and bolt them on. It's working for sales. It isn't working for profit yet. Group profit was flat on twice the sales, the bought hospitals clearly earn much thinner margins than the old ones, and the old hospitals' own sales went backwards. For this to become a real trigger, the new hospitals have to start earning closer to what the original ones used to.

Driver	What the record says	Evidence so far	Horizon	Strength	Change since last report
Buy hospitals with IPO cash	Parekhs, Harmony, Bharuch subsidiary, more to come	Group sales more than doubled; profit flat	1-3 years	Moderate	↓ sales without profit
	Founding high-value specialty		Ongoing	Moderate	

Kidney and urology focus		Parent margin still decent at 32%, but falling			↓ margin lower year on year
Growth of existing hospitals	More beds to switch on	Parent sales down 19%	1-2 years	Weak	↓ went backwards

4. Has management been consistent?

No transcripts exist for the period, and the company is under a year old as a listed stock, so this judges the public record.

Period	What was promised or stated	What actually happened	Verdict
IPO (Dec 2025)	Use IPO money to buy and build hospitals	Parekhs done; Harmony stake raised; ₹109 cr was still parked at March; objects changed via postal ballot	Partly
FY22-FY24 (carried forward)	Clean pre-IPO accounts	Had to revise three years of reports through the NCLT	Missed
Feb-Mar 2026 (carried forward)	Follow stock-exchange disclosure rules	Board had to ratify actions after a rules slip-up	Missed
May 2026	Appoint a CEO	Deferred; search ongoing	Too early
Q1 FY27	Growth through scale	Sales doubled, profit flat, own hospitals shrank	Partly

Has the story drifted? The story is steady (buy and grow) but there's very little of it told. No calls, no guidance, no occupancy numbers, and the IPO money's uses have already been changed once. Nothing new went wrong on governance this quarter that we could find, which is good. But "trust us" is a hard ask from a company with a restatement behind it and a top job still empty.

5. Bottom line

Durable earning trigger? → MAYBE vs last quarter: unchanged (leaning weaker)

There's a funded plan and sales are growing fast. But profit didn't grow at all, and the old hospitals shrank. Buying hospitals that earn half the margin isn't a trigger by itself. It becomes one only if management lifts those margins, and there's no sign of that yet.

Management consistent? → MAYBE vs last quarter: unchanged

No fresh red flags this quarter, which counts for something. But there's still no CEO, no public targets to hold them to, and the earlier restatement and listing-rule slip haven't been earned back. Watch the next couple of quarters for whether the bought hospitals start making money.

Built from public sources up to 30 Sep 2026; no concall transcripts were available. Figures rounded. Not investment advice.
