Skipper Limited: Concall Tracker

Power transmission towers, transmission EPC and polymer pipes · Ticker SKIPPER (BSE 538562) · Quarter folder Q1-2027 · Builds on the Q4-2026 report (transcripts to Q3 FY26, Q4 FY26 from public results) · New calls deep-read: Q4 FY26 (28 Apr 2026) and Q1 FY27 (12 Aug 2026)

1. Snapshot

What the business does: Skipper is India's biggest maker of the steel towers that carry high-voltage power lines. It also builds whole transmission lines as a contractor (EPC: engineering, procurement and construction) and has a smaller plastic-pipes arm. Most money comes from towers and line-building for grid developers such as Power Grid and private transmission companies, with a small but growing export book.

Measure	Value	Plain-English read
Market value today	≈ ₹6,333 cr	What the stock market values the company at (Screener, Nov 2026).
Valuation (P/E)	≈ 26×	The share price is about 26 times yearly profit, reasonable next to its growth.
FY26 revenue / profit	₹5,553 cr / ~₹207 cr	Last full year: sales up about a fifth, profit up about two-fifths.
Q1 FY27 revenue	₹1,310 cr (+4.5% YoY)	Highest-ever first quarter, but growth was slow because exports stalled.
Q1 FY27 EBITDA	₹140 cr (+10%), 10.7% margin	Operating profit grew faster than sales; margin up 0.6 points as old low-margin contracts roll off.
Q1 FY27 profit	₹56.5 cr (+26%)	Profit up about a quarter, helped by lower interest costs.
Order book (Jun 2026)	> ₹9,200 cr	Record work in hand, about 1.7 years of sales, up from ₹8,502 cr in March.

2. Concall coverage

Quarter	Call date	Transcript read?
Q4 FY24 → Q3 FY26 (5 transcripts)	May 2024 → Jan 2026	Carried forward from the Q4-2026 report
Q4 FY26	28 Apr 2026	**Newly read ★** (the prior report built this quarter from results and press, as the transcript failed to download)
Q1 FY27	**12 Aug 2026**	**Newly deep-read in full ★**

The Q4 FY26 and Q1 FY27 transcripts were read this time; the earlier backstory comes from the prior report. Screener also lists a Q2 FY27 call (Nov 2026); it is past this report's 30 Sep 2026 cut-off and was not used. Old 2016-2018 transcripts failed to download and aren't needed.

★ Latest concall highlights: Q1 FY27 (12 Aug 2026)

- **Slow sales, better profit.** Revenue ₹1,310 cr (+4.5%), EBITDA ₹140 cr (+10%) at 10.7%, profit ₹56.5 cr (+26%). Export shipments were held up by the Middle East situation and high freight (buyers are delaying pickups), and West Bengal elections hit work. Line-building (infra) grew; the tower business was soft.
- **Record order book, better ordering.** Orders over ₹9,200 cr; ₹1,674 cr won in the quarter, including two 765 kV lines in Maharashtra; bid pipeline a record ₹35,000 cr. Management expects ₹90,000 cr to ₹1 lakh cr of transmission bids in India this year (versus ₹50,000-60,000 cr last year) and FY27 order inflow of ₹7,000 cr+, with export orders up by half to about ₹1,100 cr.
- **Balance sheet reset.** Raised ₹433.5 cr of fresh equity from long-only institutions, all used to repay debt; CRISIL upgraded it to A+ in July. Interest cost guided at 3.2-3.5% of sales for FY27.
- **Guidance held, capacity late again.** FY27 revenue growth still guided at about 15%, now "H2 weighted". The 75,000-tonne expansion to 4.5 lakh tonnes, promised for March then June 2026, is now due by end of Q2 FY27. Polymer pipes guided to grow about a fifth.
- **New markets:** passed supplier audits in the USA, Finland and Australia; subsidiaries set up in Brazil and UAE, US entity soon. Tone confident on demand, careful on timing.

Business mix & capacity (quick facts)

Domestic vs export: exports are about 9-10% of the order book; roughly nine-tenths of work is in India. Management's long-run aim is half of order inflow from exports, with no date. Of the ₹9,200 cr book, about ₹1,800 cr is line-building (infra) work.
Capacity use: tower plants were running above 85% at the Q4 call. Capacity rises from 3.75 to 4.5 lakh tonnes by end of Q2 FY27, with two more 75,000-tonne steps planned to reach about 6 lakh tonnes by FY28.

★ Since our last report

Builds on the Q4-2026 report (transcripts to the 29 Jan 2026 call, Q4 FY26 from public results). Prior verdicts: **trigger YES**, **consistency MAYBE**.

Prior read	What we said then	What the new calls show	Movement
Trigger (YES)	India grid build-out plus capacity doubling; record order book.	Order book up again to ₹9,200 cr+; ordering picking up; margin and profit up.	Confirmed
Consistency (MAYBE)	Growth target walked down two years running.	15% held, but Q1 grew under 5%; capacity slipped again.	Unchanged
FY27: ~30% profit growth	Guided at Q4 call.	Q1 profit +26%; interest savings from the equity raise still to come.	On-track
4.5 lakh t capacity by Jun 2026	Due June 2026.	Now end of Q2 FY27 (already a slip from March).	Slipping
Exports	Weak, ~10% of book, 50:50 aim with no date.	Shipments still delayed by freight; export orders guided up by half.	On-track, unproven
Debt	Net debt ~0.58× equity.	₹433.5 cr equity raised and used to repay debt; rating up to A+.	Improving

Verdict change: both verdicts **unchanged**. Profit and the order book keep delivering, but the headline revenue and capacity timelines keep sliding.

3. Earning Trigger thesis ★

India has to spend heavily on its power grid to connect new solar and wind and to feed data centres. Management estimates only about 40% of the planned ₹9 lakh cr of transmission projects have been bid out so far. As the largest tower maker, Skipper wins a slice of that, while a fuller, bigger plant, old low-margin contracts rolling off and lower interest costs lift profit faster than sales. Exports to the US and Australia are the next leg if they land.

Trigger	What management said	Evidence so far	Horizon	Strength	Change since last report
India grid build-out	₹90,000 cr to ₹1 lakh cr of bids a year; ₹7,000 cr+ inflow in FY27.	Order book ₹9,200 cr+, pipeline ₹35,000 cr; ₹1,674 cr won in Q1.	To 2032	Strong	↑ ordering picking up
Margin climb to 12%	Legacy low-margin orders under 5% of book, gone this year.	Margin 10.7% in Q1, up from 10.1%.	2-3 years	Strong	↑ steady gains
Capacity to 6 lakh t	4.5 lakh t, then two more 75,000 t steps by FY28.	First step slipped from March to June to Q2 end.	FY27-FY28	Moderate	↓ delayed again
Exports	Export orders up by half to ~₹1,100 cr; 50% of inflow long term.	Audits passed in US, Finland, Australia; shipments still held up.	3-5 years	Moderate	unchanged
Lower interest cost	Finance cost 3.2-3.5% of sales.	₹433.5 cr equity used to cut debt.	FY27	Strong	↑ new

The catch: revenue growth has slowed to a crawl while the plant expansion keeps running late, and the full-year number now leans on the second half. Steel and aluminium prices, freight and finding skilled staff (which management calls its biggest worry) can all bite.

4. Management Consistency scorecard

Period	What was promised	What actually happened	Verdict
FY24 (May 2024)	25% revenue growth; margin ~9.7%.	FY25 revenue +41%; margin held.	Delivered
FY25 (Apr 2025)	25% growth in FY26.	FY26 +20%; cut mid-year.	Partly
Q3 FY26 (Jan 2026)	~30% jump in Q4; 4.5 lakh t by March.	Q4 +29% delivered; capacity pushed to June.	Partly
Q4 FY26 (Apr 2026)	FY27 revenue +15%, profit +30%; 4.5 lakh t by June.	Q1: revenue +4.5%, profit +26%; capacity now end of Q2.	Partly
Q4 FY26 (Apr 2026)	Margin up despite cost pressure.	Q1 margin 10.7%, up 0.6 points.	Delivered
Ongoing	Export 50:50 mix.	Still ~10%; no date.	Too early

Narrative drift: the story itself hasn't changed (grid spending, bigger plant, exports), and the profit side keeps showing up. What drifts are dates and growth rates. The revenue target went from 25% to about 20% to 15%, and the 75,000-tonne expansion has slipped twice. Each slip comes with a fair reason (monsoon, Middle East, freight, elections), and management says FY28 can grow faster on this year's orders. That's honest, but it's still a habit.

5. Bottom line: two verdicts

Durable earning trigger? → YES (vs last quarter: unchanged)

Nothing knocked the core driver. The order book hit another record, bidding is picking up sharply, margin rose again and profit grew about a quarter even in a weak sales quarter. The equity raise cuts interest costs too. Revenue growth is slow right now, but the work is booked.

Management consistent? → MAYBE (vs last quarter: unchanged)

Q1 didn't fix the pattern the last report flagged. Profit and margin promises are being kept, but revenue came in well short of the yearly pace, the capacity date slipped a second time, and the full-year target now depends on the back half. The explanations are reasonable and candid, so this isn't a broken story, just one where timelines need a discount. Watch whether H2 delivers the 15% and the new capacity actually starts by Q2 end.
