Vijaya Diagnostic Centre Ltd

Concall Tracker · Q2 FY2027 (quarter ended 30 Sep 2026) · NSE: VIJAYA · BSE: 543350 · Report prepared 7 Nov 2026

Not investment advice. Do your own due diligence. An AI-generated reading of the company's public concall transcripts and filings. This report continues from our Q1-2027 report.

1. Snapshot

What it does: Vijaya runs medical-testing centres, mostly in Hyderabad and the rest of Andhra and Telangana, plus Pune, Kolkata and Bengaluru. Walk-in patients get blood tests and scans (X-ray, CT, MRI, PET-CT) under one roof. About 92% of revenue comes straight from patients, not hospitals or labs.

Measure	Value	Plain read
Market cap	₹15,126 cr	What the whole company is worth on the market.
P/E	~73	About ₹73 paid for each ₹1 of yearly profit. Expensive; the market already expects years of strong growth.
Q2 FY27 revenue	~₹255 cr (+26.7%)	Fastest growth in a while. Tests up 16.5%, richer test mix about 4-5%, government (CGHS) price revision about 3%.
Q2 operating profit (EBITDA)	~₹113 cr, 44.1% margin	Keeps 44 paise of every rupee before interest, tax and depreciation. Up 3.5 points on last year.
Q2 net profit	₹59 cr (+37.4%)	Profit growing faster than sales.
Surplus cash	~₹355 cr	Up from ~₹330 cr last quarter. Expansion is paid from its own cash.
ROCE	~25%	Earns ₹25 a year on every ₹100 tied up in the business.

2. Concall coverage

Quarter	Date	Transcript read?
Q1 FY24 → Q4 FY26 (12 calls)	Aug 2023 – May 2026	Carried forward from earlier reports
Q1 FY27 (prior boundary)	7 Aug 2026	Read in the Q1-2027 report
Q2 FY27	Early Nov 2026	Newly deep-read in full ★ (NSE filing, 6 Nov 2026)

Only the Q2 call was read in full this time; the backstory comes from the prior reports.

★ Latest concall highlights — Q2 FY27 (Nov 2026)

- **Results:** revenue up 26.7%, EBITDA up 37.8%, margin 44.1%. Existing centres alone grew 20%. Hyderabad grew over 20%; Pune about 15.5%.
- **Guidance raised a notch:** at least 20% growth this year (was "high teens to 20%"), EBITDA margin 42%+ for the year, and above 15% a year for the next three to five years.
- **Expansion re-phased:** 8 hubs and 14 spokes by Q1 FY28. Two hubs and seven spokes open, three more hubs by March, three in Q1 FY28. A third Hyderabad flagship lease is signed (6-8 months). Panjagutta central lab goes live in a few months.
- **First step beyond the South and West:** agreed to buy Arya Wellness Centre in Guwahati (revenue over ₹25 cr, EBITDA above 20%), closing in about two months. Kadapa land bought; a Pune building bought for ₹19 cr.
- **Tone:** confident and specific. New hubs "achieving break-even within the timelines"; Pune's PH business now earns above 35% margin.

Business mix & capacity. Essentially 100% domestic. Hyderabad 67% of revenue (down from 69%), rest of AP/ Telangana ~20%, Pune 5%, West Bengal 5%, others 3%. 168 centres: 51 hubs, 117 spokes. Utilisation isn't

reported as a percentage; management adds second MRIs and ultrasounds where waiting times rise (Kurnool done, Tirupati next).

★ Since our last report (builds on the Q1-2027 report, call of 7 Aug 2026)

Prior verdicts: **Trigger YES · Consistency YES.**

Prior read	What we said then	What the new call shows	Movement
Trigger: hub-and-spoke rollout	Proven, new hubs break even early	Growth sped up to 26.7%, margin up again, no drag from new hubs	Confirmed
Consistency	Says what it'll do, then does slightly better	Beat its own growth and margin lines again	Confirmed
High double-digit growth this year	Guided "high teens to 20%"	H1 ~25%; FY27 now "at least 20%"	Confirmed
Nine hubs in FY27	Raised from 4-5 in May	Now 8 hubs by Q1 FY28: five in FY27, three in the quarter after	Slipping
Risk: opening many hubs at once	Could dent margins	Margin up 3.5 points; "no much drag"	Improving

Checkpoint results: Partly I Delivered (growth delivered but hub count re-phased into next year; the many-hubs margin risk didn't show).

Verdict change: both unchanged. The hub plan moving a quarter later is the only soft spot.

★ 3. Earning-trigger thesis

The recipe is unchanged: open a big hub with high-end scanners, then ring it with small spokes, so fixed costs get spread over more tests. About 65-70% of costs are fixed, so every bit of growth above about 15-18% drops to profit. It's working in old Hyderabad (existing centres growing 20%) and in the new markets (Pune turned around, Kolkata tier-2 towns, Bengaluru's JP Nagar flagship). Guwahati adds a seventh state.

Trigger	What management said	Evidence so far	Horizon	Strength	Change since last report
New hubs and spokes	8 hubs + 14 spokes by Q1 FY28; 4-5 hubs a year after	FY26's 10 hubs ramped "as expected or faster"	Now-FY28	Strong	Unchanged (re-phased)
Operating leverage	42%+ margin this year	44.1% in Q2	Now	Strong	↑
Richer test mix	Cardiac CT, high-end MRI, genomics	Mix adds 4-5% to growth	Ongoing	Moderate	↑
Guwahati / Northeast	Platform for the region	Deal signed, closing in ~2 months	FY28	Unproven	New

3b. Trigger check

Trigger type	Yes/ No	What was said (date)
Debt cut	No	Already net cash
New business	Yes	Buying Arya Wellness Centre, Guwahati, "our entry into the Northeast region" (Nov 2026)
Margin up	Yes	"EBITDA margin stood healthy at 44.1%, reflecting an improvement of 350 basis points ... driven by operating leverage" (Nov 2026)

New management	No	Not mentioned
New capacity	Yes	Two hubs and seven spokes open in H1; three hubs by March, three in Q1 FY28; third Hyderabad flagship in 6-8 months (Nov 2026)
Big orders	No	Not applicable
Turnaround	No	Pune "turnaround" mentioned, but it's a region, not the company
Promoter buying	No	Not mentioned

Single concrete driver: new hubs and spokes in Hyderabad, Pune, Kolkata and Bengaluru filling up fast, so mostly fixed costs get spread over more tests.

3c. Margin bridge

EBITDA margin 44.1% vs 40.6% a year ago. Mostly operating leverage, with about 2 points from the CGHS tariff hike, which laps from Q3. Management guides 42%+ for the full year. (lasting)

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
FY26	Add new hubs without hurting margin	10 hubs added; margin rose	Delivered
May 2026	FY27 growth "high teens to 20%"	H1 ~25%	Delivered
May 2026	Margin 40%+	43.4% in H1	Delivered
Aug 2026	Nine hubs this year	Re-phased: 5 in FY27, 3 in Q1 FY28	Partly
Aug 2026	Pune to keep improving	PH margin above 35%, steady double-digit growth	Delivered
Aug 2026	Panjagutta central lab	Going live "in the next few months"	Too-early

Narrative drift. None worth worrying about. The story has been the same for three years and the numbers keep coming in at or above guidance. Management even warned analysts not to model ten hubs a year.

5. Bottom line

Durable earning trigger? → YES vs last quarter: unchanged

The hub rollout is visibly paying: faster growth, higher margin, cash pile still rising. The only thing that moved is timing on a few hubs. The real question is price, not the business, at around 73 times earnings.

Management consistent? → YES vs last quarter: unchanged

Beat its own guidance again. Shifting three hubs into Q1 FY28 is a small slip, explained openly.

★ 6. Checkpoints for next quarter

- Three more hubs open by March 2027
- Guwahati deal closes and Panjagutta central lab goes live
- Growth stays at 20%+ and margin at 42%+ as the CGHS benefit laps
