Greenply Industries Ltd

Concall tracker report · Q2 2027 (Sep 2026 quarter) · prepared 11 Nov 2026

1. Snapshot

Kolkata-based plywood maker (Greenply Gold, Ecotec brands) that has added MDF board (medium-density fibreboard) from a plant at Vadodara, sold through dealers to carpenters, architects and furniture makers.

- Market cap about Rs 3,423 cr.
- Q2 FY27 consolidated revenue Rs 799.7 cr, up 16.1%; core EBITDA Rs 89.2 cr, margin 11.2%, up 300 bps (call figures).
- Plywood Q2: revenue Rs 625.7 cr, value +15.5%, volume +6.1%; core EBITDA margin 10.05%. MDF Q2: revenue Rs 173.9 cr, value +18.4%, volume +16.1%, EBITDA margin 15.2%.
- Net debt Rs 544 cr, debt to equity 0.56x, within the guided 0.7-0.75x ceiling, while a big capex programme runs.
- Operating margin has sat at 8-11% for years; it reached 10-11% in the last three quarters.

2. Concall coverage

Quarter	Date	Transcript read?
Q3 FY25 → Q3 FY26 (5 calls)	Feb 2025 → Feb 2026	Skimmed for guidance and promises
Q4 FY26	30 Apr 2026	Key sections
Q1 FY27	24 Jul 2026	Key sections
Q2 FY27	30 Oct 2026	Yes, in full ★

About two years of quarterly calls, latest read in full.

Latest concall highlights: Q2 FY27 (30 Oct 2026)

- Revenue +16%, core EBITDA margin 11.2%, up 300 bps. Plywood margin above 10% on premium products like the new TermiVax anti-termite plywood.
- Plywood plants ran above 100% utilization, which held volume growth to 6%; plywood guidance (more than 10% volume growth, double-digit margin) maintained.
- MDF volume guidance cut to about 20% for FY27 after monsoon and a maintenance shutdown hurt output; 15-16% margin guidance kept. A Q1 price rise of about 15.5% was fully rolled back on competition.
- New capacity: HDF flooring line started July 2026; Odisha plywood plant due Q4 FY27; second Vadodara MDF line Q2 FY28; new Sandila (Lucknow) plywood expansion of 15 mn sq m, Rs 125 cr capex, start Q4 FY28.
- Furniture-fittings JV with Samet: Greenply will cut its stake to 19% by 5 Jan 2027 and stopped funding its losses from Q1.

Business mix & capacity

- Domestic vs export: almost entirely domestic; split not given.
- Capacity utilization: plywood above 100% in Q2 FY27 (capacity-constrained until Odisha); MDF producing about 60,000 cubic metres a quarter, selling everything it makes. Total plywood capacity 81.3 mn sq m from Q4 FY28.

3. Earning trigger thesis

Greenply's trigger is a mix of premium plywood (better realisation and margin) and new capacity: plywood is sold out until the Odisha plant starts, MDF is growing in volume, HDF flooring has begun, and two more plants are booked. Exiting the loss-making Samet JV removes a drag. The catch is MDF, where new competitor capacity has pushed prices back down.

Trigger	What management said	Evidence so far	Time horizon	Strength
Premium plywood mix	TermiVax and premium focus lift margin; 10%+ margin at Rs 600 cr+ quarterly sales	Plywood margin 10.05% in Q2, up 180 bps	Ongoing	Strong
Odisha plywood plant	Commissioning Q4 FY27, on track	Under construction, orders placed	2 quarters	Moderate
MDF volume growth and new line	About 20% volume growth FY27; second Vadodara line Q2 FY28	Q2 volume +16%; margins held 15%+ despite price rollback	FY27-FY28	Moderate: price war
Exit from Samet JV losses	Dilute to 19% by 5 Jan 2027	Greenply stopped funding losses from Q1 FY27	Q4 FY27	Strong

3b. Trigger check

Trigger type	Yes/ No	What was said (date)
Debt cut	No	Net debt rising with capex, within guided range
New business	Yes	HDF flooring line commenced commercial production July 2026; prelam plywood full-scale production from November (Oct 2026)
Margin up	Yes	Core EBITDA margin up 300 bps to 11.2%; premium products 'will contribute to margin expansion' (Oct 2026)
New management	No	A Chief Strategy Officer was hired, not a CEO/MD/CFO change
New capacity	Yes	Odisha plywood Q4 FY27, Vadodara MDF Q2 FY28, Sandila plywood Q4 FY28 (Oct 2026)
Big orders	No	Not applicable
Turnaround	No	Not applicable
Promoter buying	No	Not discussed

Single concrete driver: Premium plywood lifting margins while new plywood and MDF plants (Odisha first, in Q4 FY27) lift a business now capacity-bound.

3c. Margin bridge

Consolidated core EBITDA margin 11.2% vs about 8.2% a year ago. Plywood gained on premium products (TermiVax, Green range); MDF held about 15% by shifting to pre-laminated boards and cutting energy cost, even after rolling back price rises. Management expects premium mix to keep expanding margin (lasting).

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
			Missed

Start of FY26	10% volume growth and 10% margin in plywood for FY26	Missed in H1 FY26; management admitted it in Nov 2025	
Nov 2025 call	Double-digit volume growth in H2 FY26 in both segments	Delivered in Q3 and Q4 FY26	Delivered
FY27 start	Plywood 10%+ volume, MDF higher growth	Plywood H1 +9.2% volume; MDF guidance cut to about 20%	Partly
Feb 2026 call	Vadodara MDF line 2 in Q2 FY28, Odisha on track	Still on track per Oct 2026	On track
Q1 FY27 call	HDF flooring production from 20 July 2026	Started July 2026	Delivered

The story (premiumise plywood, scale MDF, build own capacity) has been steady for two years. Execution on plants is on time; volume guidance has been missed and reset more than once.

5. Bottom line

Durable earning trigger? → YES

A concrete driver already showing: premium plywood margins and strong MDF volumes, with Odisha capacity due in two quarters to unlock the capacity limit.

Management consistent? → MAYBE

Plants come on time and H2 FY26 was delivered, but FY26 started with a miss and MDF volume guidance was cut this quarter.

6. Checkpoints for next quarter

- Plywood core margin stays at or above ten percent
- Odisha plywood plant starts on schedule in the March quarter
- Samet JV stake cut to nineteen percent by early January
