Rushil Decor Ltd

Concall Tracker · Q2 2027 · first report

1. Snapshot

Ahmedabad maker of MDF boards (wood-fibre panels for furniture) and decorative laminates sold under the VIR brand to furniture makers, carpenters and dealers in India and abroad. Its big new bets are the Andhra Pradesh MDF plant and a jumbo-size laminate line in Gandhinagar.

Number	Value	What it means
Market cap	Rs 627 cr	What the market values the whole company at; a small company.
Q2 FY27 revenue	Rs 295 cr	Record quarterly sales, up 25%.
Q2 FY27 EBITDA margin	9.5%	Operating profit per Rs 100 of sales, low for this business, which earned more before resin costs rose and a plant fire.
Q2 FY27 profit	Rs 10 cr	Net profit, about double a year ago.
Net debt to equity	About 0.4x	Borrowings minus cash are moderate.
ROCE	About 5%	Weak return on the money tied up; the new plants aren't paying yet.

2. Concall coverage

Quarter	Date	Transcript read?
Q2 FY25	28 Oct 2024	Yes (key passages)
Q3 FY25	Jan 2025	Yes (key passages)
Q4 FY25	15 May 2025	Yes (key passages)
Q1 FY26	11 Aug 2025	Yes (key passages)
Q2 FY26	10 Nov 2025	Yes (key passages)
Q3 FY26	29 Jan 2026	Yes (key passages)
Q4 FY26	3 Jun 2026	Yes (key passages)
Q1 FY27	10 Aug 2026	Yes (key passages)
Q2 FY27	4 Nov 2026	Yes, read in full ★

Nine calls across two years, from NSE filings.

Latest concall highlights: Q2 FY27 (call held 4 Nov 2026)

- Record revenue Rs 295 cr, up 25%; EBITDA margin 9.5%; profit nearly doubled.
- Laminates hit a record Rs 88 cr, up 62%, with price per sheet up 22% on a richer mix. Laminate margin 9.6% against 7.7% a year ago.
- Jumbo laminates: revenue doubled on the quarter to Rs 22 cr at 19.4% margin; capacity use 41%.
- MDF revenue a record Rs 196 cr, up 16%, all domestic: India MDF up 41%. No MDF exports at all this quarter because of trade uncertainty and freight costs.
- MDF capacity use 87%, up from 66% in Q1. Value-added products are 55% of MDF revenue, target 60% for FY27.

Business mix & capacity

Domestic vs export: MDF exports paused this quarter; laminates export steadily. Before FY26, MDF exports were growing fast.

Capacity use: MDF 87%; jumbo laminates 41% (target about 85% by end FY27).

3. Earning Trigger thesis

The trigger is filling two new plants: the Andhra Pradesh MDF plant, now near full after a fire and an export collapse, and the jumbo laminate line, which earns about twice the margin of the rest. Sales are growing well. Margins are still thin, and MDF exports have stopped.

Trigger	What management said	Evidence so far	Time horizon	Strength
Jumbo laminates	Start Q4 FY25; 85% use by end FY27; 14-16% margin	Started Q2 FY26; 41% use; 19% margin	FY27	Moderate: behind on use, ahead on margin
AP MDF plant	Optimise utilisation	87% now after the FY26 fire	Done	Moderate
Laminate margin	13-15%	9.6%	FY27-FY28	Weak
MDF exports	Keep growing	Zero this quarter	Unknown	Weak

3b. Trigger check

Trigger type	Yes/No	What was said (date)
Debt cut	No	
New business	No	
Margin up	Yes	Laminate EBITDA margin up to 9.6% from 7.7%; jumbo laminates at 19.4% (4 Nov 2026)
New management	No	
New capacity	Yes	Jumbo laminate line scaling: revenue doubled on the quarter, use at 41% (4 Nov 2026)
Big orders	No	
Turnaround	No	
Promoter buying	No	

The single concrete driver: The new jumbo laminate line ramping up at about twice the margin of the rest of the business.

3c. Margin bridge

EBITDA margin is 9.5%, about the same as a year ago and up from 4.9% for H1 FY26 when the fire hit. Fuller MDF plants and the high-margin jumbo line helped; resin prices stayed high. Management sees it improving as jumbo fills. (lasting)

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Feb 2025	Jumbo laminate starts by end Q4 FY25	Revenue began in Q2 FY26	Partly
Nov 2025	Jumbo at about 85% use by end FY27	41% at half year	Too-early
May 2025	Laminate margin to 13-15%	9.6%	Missed
2024-2025	MDF exports keep growing	Stopped this quarter	Missed
Jun 2026	Value-added MDF 60% of revenue in FY27	55% now	Too-early

Narrative drift: The story is steady: more value-added products, fill the new plants. But a plant fire, resin costs and trade disruption have pushed every margin target out, and management won't give guidance now.

5. Bottom line

Durable earning trigger? → MAYBE

The jumbo line is scaling and record sales show it, but overall margins are thin and MDF exports have vanished.

Management consistent? → MAYBE

Some of it was bad luck, like the fire, but the margin and start-date promises mostly slipped.

6. Checkpoints for next quarter

- Jumbo laminate capacity use keeps rising
- EBITDA margin holds near or above this quarter's level
- MDF exports restart or domestic MDF keeps the plant near full
