Q1 FY27 results	Aug 2026	Press coverage
Q2 FY27 results	29 Oct 2026	Press coverage

Latest concall highlights: Latest update highlights: Q2 FY27 results (29 Oct 2026)

- Revenue Rs 451 cr, up about 29%; operating profit Rs 50 cr, up about 2.5 times.
- Operating margin 11%, from about 6% a year ago and 9% in Q1 FY27.
- Profit Rs 15 cr after an Rs 8 cr exceptional loss.
- Palghar modernisation (announced Feb 2026) is meant to raise BCF carpet yarn output; IDY and BCF expansion budgeted at about Rs 100 cr, partly funded by a preferential issue.

Business mix and capacity

- Domestic vs export split not available from public sources for the latest quarter.
- Capacity utilisation not disclosed.

3. Earning trigger thesis

> The possible trigger is a shift toward BCF carpet yarn and industrial yarn, higher-value products than plain polyester, backed by a modernised Palghar plant. Margins doubled in a year, but with no calls it's impossible to say how much is the product shift and how much is cheaper raw material.

Trigger	What management said	Evidence so far	Time horizon	Strength
BCF and IDY expansion	About Rs 100 cr capex; Palghar modernised	Margin 6% to 11%	FY26-FY27	Moderate: unverified
Margin recovery	Not stated	Record operating profit	Now	Moderate

3b. Trigger check

Trigger type	Yes/No	What was said (date)
Debt cut	Yes	Reducing long-term debt from internal accruals (Sahi, early 2026)
New business	No	-
Margin up	No	Margin rose, but no company statement on why
New management	No	-
New capacity	Yes	Palghar BCF modernisation and IDY/BCF expansion of about Rs 100 cr (Feb 2026)
Big orders	No	-
Turnaround	No	-
Promoter buying	No	Promoter stake fell from 73.4% to 66% in Dec 2024 after a preferential issue to others

Single concrete driver: A modernised Palghar plant is shifting output toward higher-value BCF carpet yarn and industrial yarn.

3c. Margin bridge

Margin went from about 6% to 11% in a year. Public sources give no reason; more BCF yarn and cheaper polyester and nylon inputs are both possible. Can't tell yet if it lasts. (one-off)

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Feb 2026	Modernise Palghar for more BCF	Record margins in Q1-Q2 FY27	Too-early
FY26	IDY and BCF expansion of about Rs 100 cr	Not updated publicly	Too-early

With no calls since 2021 and no public guidance, there's little to hold management to. Revenue has been flat at Rs 1,350-1,500 cr for five years.

5. Bottom line

Durable earning trigger? MAYBE

The BCF shift is a plausible driver and margins have jumped, but nothing from management confirms why or for how long.

Management consistent? MAYBE

Nothing promised publicly, so nothing to check. Five flat years before this one.

> **6. Checkpoints for next quarter**
>
> - Operating margin stays near 11%
> - Revenue holds above Rs 400 cr a quarter
> - Palghar BCF expansion commissioned
