Lenskart Solutions Ltd (LENSKART)

Concall tracker, Q2 2027 (Jul-Sep 2026) · India's biggest eyewear chain: it designs, makes and sells its own glasses and lenses through about 3,600 stores in India and abroad (OWNDAYS, John Jacobs, Meller).

1. Snapshot

Number	Value	Plain read
Market cap	₹1,25,829 cr	One of India's most valuable consumer companies.
Q2 revenue (group)	₹2,845 cr, up 33%	Sales are growing by about a third a year.
Q2 operating profit before rent accounting	Margin 13.8% vs 11.1% a year ago	It keeps more of each sale as stores and factories scale up.
Q2 net profit (group)	₹232 cr, more than doubled	Profit is growing far faster than sales.
P/E	About 212 (Screener, standalone)	Investors pay a very high price for each rupee of profit, betting on many years of growth.
Promoter holding	About 17.5%	Founders own a small stake; it's a widely held, venture-backed company.

2. Concall coverage

Quarter	Date	Transcript read?
Q2 FY26	Dec 2025	Yes (first call after the Nov 2025 listing)
Q3 FY26	Feb 2026	Yes
Q4 FY26	May 2026	Yes
Q1 FY27	Aug 2026	Yes
Q2 FY27	4 Nov 2026	Yes, in full ★

Five calls, about a year, since the stock listed. The consistency read is limited to that year.

Latest concall highlights — Q2 FY27 (4 Nov 2026)

- Revenue up 33% to ₹2,845 cr, profit more than doubled to ₹232 cr. India sales up 35%, same-store sales up 21%.
- Added 165 net stores, to 3,624. Remote eye tests now in 934 stores, up from 303 a year ago.
- Customer satisfaction score back to 79.6 after a dip in June, which management had promised to fix.
- In-house frame output up 72% and lenses up 52%; the big Hyderabad plant is about a year from starting.
- Management laid out why it thinks a 25% margin is possible long term, but won't put a date on it and plans to spend more on marketing.

Business mix & capacity

- Domestic vs international: India about ₹1,668 cr and international about ₹1,201 cr of Q2 revenue, roughly 58% / 42%.
- Capacity: Bhiwadi runs at about 75% automation; the Hyderabad plant, built for 50 million pairs a year, is about 12 months from commissioning.

3. Earning trigger thesis

The trigger is scale feeding margins. Each new store and each pair made in its own factories adds profit because rent and staff are mostly fixed, and owning the frame, lens and store keeps margin in-house. Same-store growth is running far ahead of cost growth, so profit is rising about twice as fast as sales.

Trigger	What management said	Evidence so far	Time horizon	Strength
Store rollout	India needs 10,000+ stores	3,624 stores, 165 added in the quarter	Ongoing	Strong: shows every quarter
In-house manufacturing	Make more frames and lenses in India	Frames up 72%, lenses up 52%	Ongoing	Strong
Hyderabad mega plant	18-24 months away (Dec 2025)	About 12 months away (Nov 2026)	Late 2027	Moderate: on track
Margin path to 25%	Long-term goal, no date	13.8% now from 11.1%	Years	Moderate

3b. Trigger check

Trigger type	Yes/No	What was said (date)
Debt cut	No	Not discussed.
New business	Yes	New brands and collabs, smart glasses, myopia lenses for kids (Nov 2026).
Margin up	Yes	Margin up to 13.8% from 11.1% on in-house manufacturing and store scale (Nov 2026).
New management	No	No change mentioned.
New capacity	Yes	165 net new stores; Hyderabad plant about 12 months from commissioning (Nov 2026).
Big orders	No	Retail business, not applicable.
Turnaround	No	Not applicable.
Promoter buying	No	Promoter stake flat.

The single concrete driver: Fast store openings plus more frames and lenses made in its own factories are pushing profit up about twice as fast as sales.

3c. Margin bridge

Margin rose from 11.1% to 13.8% as same-store sales outran fixed rent and staff costs and more product was made in-house. A weaker rupee ate most of this quarter's manufacturing gain in India. Management will spend some of the gain on marketing (lasting).

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Dec 2025	Hyderabad plant 18-24 months away	Now about 12 months away	Delivered
Feb 2026	Smart glasses soft launch in Q4	Smart glasses mentioned as part of the plan; launch progress not detailed	Too-early
Aug 2026	Fix the June dip in customer satisfaction	Back to 79.6 from 77.6	Delivered
FY26	Speed up store openings	542 net stores in FY26, twice the year before; 165 in Q2	Delivered

In a year of calls the story hasn't moved: more stores, own the supply chain, margins follow volume. Management avoids quarterly guidance and keeps saying judge it over years. No promise from the calls read has slipped.

5. Bottom line

Durable earning trigger? → YES

The driver is concrete and visible every quarter: store count, same-store growth and in-house output all keep rising, and margins with them.

Management consistent? → YES

Short record, but what was promised (plant timeline, store pace, fixing satisfaction scores) has happened. Caveat: only one year as a listed company.

6. Checkpoints for next quarter

- India same-store sales keep growing in high teens or better
- Margin before rent accounting stays above last year's level
- Hyderabad plant stays on schedule for late 2027
