Hy-Tech Engineers Ltd

Concall Tracker · Q2 2027 · first report

1. Snapshot

Maker of hydraulic fittings (the small, high-pressure connectors in excavators, loaders, tractors and injection moulding machines), with about 11,000 SKUs and six plants (Shirwal near Pune, Pithampur, Nashik, Thane) that do everything from forging to plating. It sells mostly to Indian OEMs and exports to 11 countries, mainly the US and Europe. Listed on NSE and BSE on 1 September 2026.

Number	Value	What it means
Market cap	Rs 726 cr	What the market values the whole company at (Screener).
FY26 revenue	Rs 189 cr	Sales for the year, up 17% on FY25.
Q2 FY27 revenue	Rs 60.9 cr	July to September 2026 sales, up 22% on last year and 41% on the June quarter.
Q2 FY27 EBITDA	Rs 14.5 cr, 23.8% margin	Operating profit up 21%; margin flat on last year (24.0%) but well up on Q1's 19.6%.
H1 FY27	Sales up 18%, EBITDA margin 22.1%	Below the 'minimum 20%' growth and 24-25% margin management guided for FY27, though Q2 got close.
Debt / P/E	Debt to equity 0.03x; P/E about 30x	IPO money repaid most borrowings. The price is about 30 years of current earnings.

2. Concall coverage

Quarter	Date	Transcript read?
Q1 FY27 (first call as a listed company)	22 Sep 2026	Yes, read in full (key passages)
Q2 FY27	Nov 2026	Transcript not yet filed (presentation and audio only). Investor presentation of 5 Nov 2026 read in full ★

Only one earnings call exists, because the company listed in September 2026. The consistency read is therefore very limited: it compares one quarter's results against one call's promises.

Latest update highlights: Q2 FY27 investor presentation (5 Nov 2026)

- Revenue Rs 60.9 cr, up 22% on last year and 41% on Q1; EBITDA Rs 14.5 cr, margin 23.8%; profit Rs 8.5 cr, up 23%.
- A wholly owned subsidiary and warehouse in New Jersey are planned, to supply US customers locally. On the Q1 call, the chairman said John Deere has approved Hy-Tech at all its US plants and wants supply from within the US.
- H1 FY27 mix: about 76% domestic and 23% overseas; about 91% direct to OEMs.
- Balance sheet after the IPO: net worth Rs 184 cr, debt to equity 0.03x, cash and bank Rs 39 cr. Installed capacity 483 lakh pieces a year.
- From the Q1 call (22 Sep 2026): at least 20% growth in FY27, EBITDA margin 24-25%, capacity to double from 35 to 70 lakh fittings a month on IPO money, 6.5 acres bought for a new automated plant ready in about two years, and new OEMs won at bauma (Tata Hitachi, Sany, Fluidconnecto).

Business mix & capacity

Domestic vs export: Domestic about 76% / overseas about 23% of H1 FY27 revenue. The US is about 25% of business and Europe 7-8% (Q1 call). Roughly three-quarters of sales are within India.

Capacity use: Installed capacity 483 lakh pieces a year; output about 35 lakh fittings a month (Q1 call). Existing plants have 35-40% spare infrastructure; IPO capex (about Rs 30 cr) is meant to take output to 70 lakh a month.

3. Earning Trigger thesis

The possible trigger is a capacity doubling funded by the IPO, aimed at more share from existing OEMs, new OEMs won at bauma, and the US, where John Deere wants local supply through a new US subsidiary and warehouse. Management talks of doubling turnover in three to four years. Q2 sales grew 22%, but the new capacity, US unit and new OEMs aren't in the numbers yet.

Trigger	What management said	Evidence so far	Time horizon	Strength
Capacity doubling (35 to 70 lakh fittings a month)	Rs 30 cr from IPO adds about Rs 100 cr of business	Rotary transfer machines bought; more to come; new land approved	2-3 years	Moderate: just starting
US expansion (John Deere and others)	US subsidiary and warehouse; US is the major focus for 2-3 years	New Jersey subsidiary planned (Nov 2026)	FY28	Unproven
New OEMs and sectors	Tata Hitachi, Sany, Fluidconnecto from bauma; railway (IRIS) and defence registration	No revenue disclosed yet	FY27-FY28	Unproven

3b. Trigger check

Trigger type	Yes/ No	What was said (date)
Debt cut	Yes	IPO proceeds used for 'repayment of our borrowings' (Sep 2026); long-term borrowings down from Rs 17 cr to nearly nil (Nov 2026 presentation).
New business	Yes	IRIS railway certification and DRDO, Cochin Shipyard and Mazagon Dock registrations to enter railways and defence (Sep 2026).
Margin up	No	Guided 24-25% margin; Q2 FY27 was 23.8% vs 24.0% a year ago.
New management	No	Chairman and MD Hemant Mondkar since founding.
New capacity	Yes	Doubling to 70 lakh fittings a month with IPO money; 6.5 acres for a new automated plant (Sep 2026).
Big orders	Yes	John Deere approval across its US plants; new OEMs Tata Hitachi, Sany, Fluidconnecto (Sep 2026).
Turnaround	No	Profitable throughout.
Promoter buying	No	Not discussed.

The single concrete driver: IPO-funded doubling of fitting capacity, with new OEMs won at bauma and John Deere pulling Hy-Tech into local US supply.

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Sep 2026	At least 20% revenue growth in FY27	H1 up 18%; Q2 up 22%	On track
Sep 2026	EBITDA margin about 24-25% in FY27	H1 22.1%; Q2 23.8%	Partly
Sep 2026	Set up a US subsidiary	Planned New Jersey subsidiary and warehouse (Nov 2026)	On track
Sep 2026	Buy 6.5 acres within 3-4 months for a new plant	Not reported yet	Too early

Narrative drift: Too early to judge drift with one call. The story is consistent between the call and the presentation. The chairman's tone is very promotional ('double the turnover', 'tremendous' response), which is worth discounting until the numbers catch up.

5. Bottom line

Durable earning trigger? → MAYBE

The capacity doubling, US subsidiary and new OEM wins are concrete and named, but none of them is in results yet; Q2's growth came from the existing business.

Management consistent? → MAYBE

Only one call since listing. Q2 is close to the first promises on growth but below the margin guide, and the tone is promotional. Needs several quarters of record.

6. Checkpoints for next quarter

- FY27 growth stays at or above the 20% guided
- EBITDA margin reaches the guided 24-25%
- New Jersey subsidiary and warehouse are set up
