Jindal Stainless Ltd

Concall tracker · filed under Q2-2027 · 11 Nov 2026

1. Snapshot

Jindal Stainless makes stainless steel. It sells flat stainless steel (200, 300 and 400 series grades) and value-added products such as pipes and tubes to automotive, railway, metro, lift and elevator, white goods and construction users, and exports to markets including the US, South Korea, Japan and the Middle East. It also has nickel and melt shop investments in Indonesia.

- Market cap about Rs 59,181 cr at a P/E of about 21.
- Q2 FY27 consolidated revenue, EBITDA and PAT up about 14%, 8% and 17% on Q1 as operations normalised after Q1's industrial gas and logistics disruptions.
- Q2 FY27 consolidated EBITDA Rs 2,762 cr, up about 2% year on year; PAT Rs 1,666 cr, up about 9%: modest growth versus last year.
- Sales volume up 14% on Q1 and 3% on last year; H1 deliveries 1.25 million tonnes, down 2%.
- Exports up 36% year on year, 11% of Q2 volumes.
- Net debt Rs 3,121 cr, net debt to EBITDA 0.55x, net debt to equity 0.15x: a strong balance sheet; CARE upgraded the rating to AA+.

2. Concall coverage

Screener lists 21 JSL calls with 20 transcripts (Aug 2023 missing, outside the core period). This report reads the last 12 (Q3 FY24 to Q2 FY27, about three years), with the latest call (23 Oct 2026) read in full and earlier calls read for guidance and delivery.

Quarter / call	Date	Transcript read?
Q3 FY24 to Q4 FY25 (6 calls)	Jan 2024 - May 2025	Yes, read for promises
Q1 FY26 to Q3 FY26	Aug 2025 - Jan 2026	Yes
Q4 FY26	May 2026	Yes
Q1 FY27	4 Aug 2026	Yes
Q2 FY27	23 Oct 2026	Yes, read in full

2b. Latest concall highlights: Q2 FY27 (23 Oct 2026)

- Strong recovery from Q1: volumes up 14% quarter on quarter on automotive and ornamental pipe and tube demand; exports up 20% q-o-q.
- FY27 volume growth guidance cut to 4-6% from 7-9% (Q1 disruptions), but EBITDA per tonne guidance raised to Rs 20,000-22,000 from Rs 18,000-20,000 on a richer product mix. Capex (Rs 2,400-2,600 cr) and net debt guidance unchanged.
- Target of 3.5 million tonnes a year of sales by FY29 reaffirmed; all announced projects on schedule.
- Cheap imports, mostly 200 series from China, rose sharply after the quality control order was suspended in April 2026; an anti-dumping decision has been extended to March 2027.
- Technical assistance deal with Japan's JFE Steel for ferritic (400 series) grades; board approved merging four wholly owned subsidiaries into JSL.

2c. Business mix & capacity

- Domestic about 89% / exports about 11% of Q2 FY27 volumes.
- Capacity: total melting capacity 4.2 million tonnes a year including 3 million in India, after the 1.2 million tonne Indonesia melt shop was commissioned ahead of schedule (May 2026).

3. Earning trigger thesis

The plan is volume: from today's levels to 3.5 million tonnes of sales a year by FY29, helped by new upstream and downstream capacity, a richer mix of pipes, tubes and special grades, and more exports. The balance sheet can carry it. The near-term problems are Chinese 200 series imports flooding in without quality rules, and a first half that lost volume to gas shortages, so profit grew only slightly over last year.

Trigger	What management said	Evidence so far	Time horizon	Strength
Capacity to 3.5 Mt sales by FY29	Double-digit compounded volume growth over three years	Indonesia melt shop commissioned early; projects on schedule	FY27-29	Moderate
Value-added mix	Higher EBITDA per tonne	FY27 EBITDA/t guidance raised to Rs 20,000-22,000	FY27	Moderate
Exports	Diversify to South Korea, Colombia, South Africa, Brazil, Japan	Exports up 36% y-o-y	Now	Moderate: EU quota cut

3b. Trigger check

Trigger type	Yes/ No	What was said (date)
Debt cut	No	Net debt guided to stay in a Rs 2,500-2,800 cr range
New business	Yes	India's first high-aluminium stainless grade for catalytic converters; a new 400 series grade opened a new market in South Africa (23 Oct 2026)
Margin up	Yes	EBITDA per tonne guidance raised to Rs 20,000-22,000 from Rs 18,000-20,000 on value-added mix (23 Oct 2026)
New management	No	No change
New capacity	Yes	1.2 million tonne Indonesia melt shop commissioned ahead of schedule (May 2026); Jindal Lifestyle powder coating facility at Pathredi commissioned (23 Oct 2026)
Big orders	No	No order book
Turnaround	No	Not applicable
Promoter buying	No	Not said

Single concrete driver: New capacity, including the Indonesia melt shop, and a richer product mix are meant to take sales to 3.5 million tonnes a year by FY29 at a higher profit per tonne.

3c. Margin bridge

EBITDA per tonne guidance was raised because more of what JSL sells is value-added (pipes, tubes, special grades), even as volume guidance came down. Consolidated EBITDA grew only about 2% year on year in Q2 as volume was barely up. Management treats the mix gain as structural. (lasting)

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Q4 FY24 call (May 2024)	FY25 volume growth 20%, EBITDA/t Rs 18,000-20,000	Cut mid-year to about 10% and about Rs 17,000	Missed
Q1 FY26 call (Aug 2025)	FY26 volume growth 9-10%, guidance held after Q4	Held through Q3 FY26 ('extremely confident')	Delivered (per management)

Q4 FY26 call (May 2026)	Indonesia melt shop commissioning	Commissioned ahead of schedule	Delivered
Q4 FY26 call	FY27 volume growth 7-9%	Cut to 4-6% in Oct 2026 after Q1 gas disruption	Missed
Q4 FY26 call	FY27 EBITDA/t Rs 18,000-20,000	Raised to Rs 20,000-22,000	Delivered (beat)

The long-term story (grow volume, add capacity, push value-added and exports) hasn't changed. But volume guidance has been cut mid-year in two of the last three years, once for its own reasons and once for gas shortages it didn't control. Projects themselves run on time or early. Profit-per-tonne calls have been better than volume calls.

5. Bottom line

Durable earning trigger? → MAYBE

Capacity is real and arriving on time, and the mix is lifting profit per tonne. But volume growth keeps getting cut, imports are pressuring the home market, and Q2 profit was barely above last year's.

Management consistent? → MAYBE

Projects land on schedule and EBITDA per tonne guidance was raised. Volume guidance has been cut twice in three years. A mixed record.

6. Checkpoints for next quarter

- FY27 volume growth of 4-6% is held
- EBITDA per tonne stays within the raised Rs 20,000-22,000 range
- Anti-dumping or quality-control decision on stainless imports comes through
