Blue Dart Express Ltd

Concall tracker report · Q2 2027 (Sep 2026 quarter) · prepared 11 Nov 2026

1. Snapshot

India's time-critical express courier, part of the DHL group. It runs its own freighter aircraft and a ground network, moving documents, small packages and parcels for businesses (about 70% of revenue) and online shoppers (about 30%).

- Market cap about Rs 10,632 cr: what the market values the whole company at.
- FY26 sales Rs 6,141 cr, up 7%: slow growth.
- Operating margin about 9% in FY25 and FY26, down from 12% in FY23: costs from new aircraft and hubs ate into profit.
- Jun and Sep 2026 quarters: sales up 15% and 14% on a year ago; Sep 2026 net profit Rs 102 cr vs Rs 80 cr.
- Operating margin 10-11% in the last two quarters, back above the FY26 level.

2. Concall coverage

Quarter / source	Date	Read?
Q1 FY24	Aug 2023	Not read (older)
Q2 FY24, Q4 FY24, Q1 FY25	Nov 2023, May 2024, Jul 2024	Transcripts missing on Screener
Q3 FY24, Q3 FY25	Feb 2024, Feb 2025	Only a cover letter on Screener
Q2 FY25	Nov 2024	Yes (skimmed)
Q4 FY25	May 2025	Yes (skimmed)
Q2 FY26	Nov 2025	Yes (skimmed)
Q3 FY26	Feb 2026	Yes (skimmed)
Q4 FY26	May 2026	Yes (skimmed)
Q1 FY27	5 Aug 2026	Yes, in full
Q2 FY27	Results 6 Nov 2026	Transcript not yet published

Six usable calls across about two years. The Q2 FY27 call transcript isn't out yet (results came on 6 Nov 2026), so the latest call read is Q1 FY27 plus the Q2 FY27 results. Several older transcripts are missing, so the consistency read is limited.

Latest concall highlights - Q1 FY27 (5 Aug 2026), plus Q2 FY27 results

- Q1 FY27 revenue Rs 1,658 cr vs Rs 1,442 cr a year ago; profit Rs 87 cr. Q2 FY27 revenue Rs 1,774 cr, up 14.5%, profit about Rs 102 cr vs Rs 80 cr.
- Much of the growth came from pricing: a general price increase of about 4-5%, sharper increases on loss-making lanes and customers, and fuel surcharges that rose with diesel and jet fuel. Shipment count grew only about 2%, tonnage about 7%.
- Ground B2B grew about 14%; air volumes grew only about 2.6%. E-commerce is a growth driver but not where Blue Dart wants to be a mass player.
- No guidance: management only aims for 'stable, consistent improvement in the margins'. Freighter pallet utilisation 85-90%.
- New hubs: two major hubs in the North (including the green hub at Pataudi, Haryana); South and Mumbai hubs being looked at, a few quarters away.

Business mix & capacity

- Domestic vs export: a domestic express network; no export split given. Air about 60% / ground about 40% of revenue, but ground is about three-quarters of the weight carried.
- Capacity: freighter pallet utilisation 85-90%. Capex about Rs 100-150 cr a year for the standalone business, mostly replacement.

3. Earning trigger thesis

The earnings story is margin repair: pricing up on loss-making lanes and customers, fuel surcharges passed on, and filling the new aircraft and hubs added over the last two years. Ground B2B is the fastest-growing part. It's showing in the last two quarters, but much of the growth is price, not volume, and management gives no targets.

Trigger	What management said	Evidence so far	Time horizon	Strength
Price and yield repair	Price increases, sharper on loss-making lanes and customers	Revenue up about 15% while shipments grew about 2%	Ongoing	Moderate: price-led
Ground B2B growth	Ground will continue to be the growth driver	Ground B2B up about 14% in Q1 FY27	Ongoing	Moderate
Filling aircraft and hubs	Operating leverage from capacity already added	Pallet utilisation 85-90%; margin back to 10-11%	1-2 years	Moderate

3b. Trigger check

Trigger type	Yes/ No	What was said (date)
Debt cut	No	Not stated
New business	No	E-commerce 'not a completely focus area'
Margin up	Yes	Yield and cost actions and a better mix helped improve margin (Nov 2025); aim of 'stable, consistent improvement in the margins' (Aug 2026)
New management	No	Not stated
New capacity	No	Pataudi hub already running; new South and Mumbai hubs 'a few quarters away' (Aug 2026)
Big orders	No	Not applicable
Turnaround	No	Not stated
Promoter buying	No	Not stated

Single concrete driver: Price increases on loss-making lanes and customers, plus fuel surcharges, lifting yield while the new aircraft and hubs fill up.

3c. Margin bridge

Operating margin was about 11% in the Sep 2026 quarter against about 10% a year ago, and 9% for FY26. Management puts it down to price corrections on loss-making lanes, a better mix of customers and lanes, and cost actions. It speaks of steady improvement, but part of the revenue lift is fuel surcharge that also raises cost (lasting).

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
FY25 (Nov 2024, May 2025)	New aircraft to break even and fill up	Margin fell to 9% in FY25 as aircraft costs came in; utilisation improved	Partly
FY26 (Nov 2025, Feb 2026)	Margin improvement from yield and cost actions; ground hub at Pataudi	Pataudi hub opened; FY26 margin still about 9%	Partly
FY27 (Aug 2026)	Stable, consistent improvement in margins	Margin 10-11% in Q1 and Q2 FY27, profit up	Delivered so far

The message has been steady: be a premium, time-critical player, don't chase e-commerce volume, improve margins through price and cost. Management avoids guidance, so there's little to hold it to; the margin dip after the aircraft additions took about two years to start reversing.

5. Bottom line

Durable earning trigger? → MAYBE

Margins are improving and growth picked up, but much of it is price and fuel surcharge rather than volume, and there's no new capacity or big growth lever coming in the next few quarters.

Management consistent? → MAYBE

Management keeps saying the same thing and margins have now turned up, but it gives no targets and the recovery after the aircraft additions was slow. Several older transcripts are missing.

6. Checkpoints for next quarter

- December quarter margin is higher than a year ago
- Shipment volumes grow faster than the low single digits seen in Q1 FY27
- Profit grows on a year ago for a third quarter running
