Olectra Greentech Ltd

Concall tracker report · Q2 2027 (Sep 2026 quarter) · prepared 11 Nov 2026

1. Snapshot

India's largest maker of electric buses by deliveries (over 4,000 so far), sold mostly to state transport undertakings on long contracts, plus an Energy division that is the number one maker of polymer insulators for power transmission lines (domestic EPC firms and exports, e.g. MacLean Power Systems in the US). It is developing next-generation bus and electric truck platforms.

- Market cap about Rs 8,643 cr at about 50 times profit: priced for strong growth.
- FY26 sales Rs 2,274 cr, up 29%; net profit Rs 173 cr.
- Operating margin about 14% for four years: steady but not rising.
- Sep 2026 quarter: sales Rs 677 cr vs Rs 647 cr (up about 5%); net profit Rs 51 cr vs Rs 53 cr, slightly down.
- June 2026 quarter: revenue up 66% but profit up only 4% as raw material costs, depreciation and interest on new capex rose.
- Return on capital about 21%.

2. Concall coverage

The Q2 FY27 call is scheduled for 12 Nov 2026, after this report was written, so its transcript is not available. Transcripts are hosted only on the company website, which now returns errors; the Q2 FY25, Q3 FY25, Q4 FY25, Q1 FY26, Q2 FY26 and Q1 FY27 transcripts were recovered from web archives. The Q3 FY26 (Feb 2026) and Q4 FY26 (Jun 2026) transcripts could not be found. The Sep 2026 quarter numbers come from the 9 Nov 2026 results filing.

Quarter / source	Date	Read?
Q2 FY25	25 Oct 2024	Yes (from archive)
Q3 FY25	31 Jan 2025	Yes (from archive)
Q4 FY25	28 May 2025	Yes (from archive)
Q1 FY26	13 Aug 2025	Yes (from archive)
Q2 FY26	12 Nov 2025	Yes (from archive)
Q3 FY26	3 Feb 2026	Not found
Q4 FY26	1 Jun 2026	Not found
Q1 FY27	17 Aug 2026	Yes, in full (from archive)
Q2 FY27	12 Nov 2026	Call not yet held; results filing read

Six transcripts across two years; two recent calls missing.

Latest concall highlights - Q1 FY27 (17 Aug 2026), plus Q2 FY27 results

- Q1 FY27: delivered 358 buses vs 161 a year ago; revenue up 66%, but PBT up only 3% on raw material spikes, supply disruptions and capex-related costs.
- Order book about 8,000 buses (about 4,000 for MSRTC and 2,000 for BEST, both old orders with execution issues being worked out), plus 1,085 Telangana buses and an L1 position for 155 in Rajasthan on the new 9-metre platform.
- FY27 delivery target 2,500 buses; management admitted earlier 2,500 targets were missed.

- Next-generation bus and electric truck platforms, with a localised battery, to launch from Q4 FY27, one or two products a quarter.
- Energy division: aims for five times growth in three years with hollow and solid core insulators and a new shed; about Rs 300 cr of orders in hand. Q2 FY27 results (9 Nov 2026): sales up about 5%, profit slightly down.

Business mix & capacity

- Domestic vs export: buses are domestic; the Energy division's exports were about 36% last year and are expected at 35-40%.
- Capacity: over 350 buses a quarter for four quarters from the new plant; insulator capacity expansion under way (new building about Rs 30-35 cr plus about Rs 15 cr equipment this year).

3. Earning trigger thesis

The earnings driver is a big e-bus order book and growing government tenders, with next-generation buses and trucks from Q4 FY27 and an insulator business targeting fast growth. The problem is turning orders into deliveries: the two biggest orders are old and stuck on contract gaps, delivery depends on depot and power readiness, and the delivery target has been cut or missed for two years running.

Trigger	What management said	Evidence so far	Time horizon	Strength
E-bus order book	About 8,000 buses to deliver over two years	350+ buses a quarter; old MSRTC/ BEST orders slow	FY27-FY29	Moderate: big but slow
New bus and truck platforms	Launch from Q4 FY27 with localised battery	Telangana and Rajasthan wins tied to the new 9-metre platform	Q4 FY27 onwards	Unproven
Insulator expansion	Five times growth in three years	Capex started; Q1 margins hit by raw materials	FY27-FY29	Unproven

3b. Trigger check

Trigger type	Yes/No	What was said (date)
Debt cut	No	Term loans taken for capex (Aug 2026)
New business	Yes	Electric truck platform and new hollow and solid core insulators (Aug 2026)
Margin up	No	Energy margins hit by raw material spikes (Aug 2026)
New management	No	-
New capacity	Yes	Insulator shed expansion under way; new bus plant running at 350+ a quarter (Aug 2026)
Big orders	Yes	About 8,000 buses in order book, 1,085 Telangana order, L1 for 155 in Rajasthan (Aug 2026)
Turnaround	No	-
Promoter buying	No	-

Single concrete driver: A large e-bus order book and new government tenders, with next-generation bus and truck platforms from Q4 FY27 and an insulator expansion.

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict

Oct 2024	FY25 deliveries about 1,500	Cut to about 1,200 by Jan 2025	Missed
Oct 2024 / Jan 2025	FY26 deliveries 2,500 (called conservative)	Cut to 2,000-2,500 in May 2025, then 2,000; management later said 2,500 was not achieved	Missed
Earlier calls	Battery pack localisation at the new plant	Folded into a next-generation platform due Q4 FY27	Dropped
Aug 2026	Q2 and FY27 to grow faster than before	Q2 sales up about 5%, profit slightly down	Missed
Aug 2026	Energy margins to recover as raw materials ease	Not yet visible in Q2 numbers	Too-early

The e-bus story itself hasn't changed, but the delivery numbers keep slipping and the battery plan was reshaped into a new platform. Old orders with execution gaps are the recurring problem. Tone is consistently upbeat, which the results haven't matched lately.

5. Bottom line

Durable earning trigger? → MAYBE

The order book and tender pipeline are real and large, and new products are coming. But deliveries are capped by customers' readiness and stuck old contracts, and profit has stopped growing.

Management consistent? → NO

Delivery targets have been cut or missed two years running, and the latest quarter fell short of the growth management promised in August.

6. Checkpoints for next quarter

- Full-year bus deliveries on track for the guided number at the Q3 call
- Next-generation bus platform launches in the March quarter
- Energy division margins recover in the December quarter
