Glass Wall Systems (India) Ltd

Concall Tracker · Q2 2027 · first report

1. Snapshot

Mumbai-based facade maker. It designs, makes and installs the glass-and-aluminium outer skin of office buildings for large developers in Indian big cities, makes ready-to-install facade panels for facade contractors in the US and Australia, and fits imported luxury windows and doors in high-end homes. One factory at Vile Bhagad, Mangaon (Maharashtra). Newly listed; its first earnings call was on 7 October 2026.

Number	Value	What it means
Market cap	Rs 2,151 cr	What the market values the whole company at.
Sales, FY26	Rs 430 cr	Up about three-quarters on FY25's Rs 245 cr, a big jump after a dip the year before.
Net profit, FY26	Rs 76 cr	Up from Rs 44 cr; profit is now a healthy slice of sales.
Operating margin, FY26	22%	Up from 5% in FY23. Management credits exports, luxury windows, commercial-only domestic work and metal-price pass-through clauses.
Sep 2026 quarter sales	Rs 116 cr	About 2% lower than a year ago; management says the first half is usually slow and the second half heavy.
Sep 2026 quarter operating margin	27%	Up from 21% a year ago, helped by price-escalation claims booked this quarter and more luxury window work.
Order book, 30 Sep 2026	Rs 957 cr	Work in hand worth a bit over two years of FY26 sales, to be executed over 18-24 months.
Debt	Debt-free (per management)	Interest cost is about Rs 1 cr a quarter.

2. Concall coverage

Quarter	Date	Transcript read?
Q1 FY27	7 Oct 2026	Yes, read in full (first call after listing)
Q2 FY27	Nov 2026 (filed 7 Nov 2026)	Yes, read in full

Only two calls exist because the company listed only recently. The consistency read is therefore thin: it can only compare the first call's promises with the second.

Latest concall highlights: Q2 FY27 (Nov 2026)

- First-half revenue Rs 239 cr, up 16% on last year. Domestic facades up 33%, luxury windows (fenestration) up 82%, exports down 14% on timing of deliveries.
- First-half EBITDA (operating profit) margin 25.3%, or 26.9% if the pass-through freight now billed to export clients is stripped out. About Rs 6 cr of price-escalation claims came through this quarter for costs booked earlier.
- Order book Rs 957 cr at end-September; Rs 291 cr of new orders booked so far this year, including a Mumbai hotel job of close to Rs 90 cr and two data-centre jobs in south India. Target: about Rs 500 cr more in the next two quarters.
- Revenue growth guidance for FY27 given as 20-22% with EBITDA margin 23-25%; the October call had said about 25% growth. The MD agreed the second half could grow over 30%.
- New US export orders are being held back by developers waiting out the war-driven shipping and commodity costs and the US midterm elections; orders already on the floor are shipping. A first Israel order, probably under Rs 50 cr, is hoped for in the next two quarters.
- The in-house glass processing unit (IPO money) is in advanced civil construction, with machinery ordered; commissioning is targeted for July-August 2027, adding an estimated 1-1.5% to EBITDA margin.

Business mix & capacity

Domestic vs export: FY26 revenue: domestic facades 49%, international (export panels, mostly US) 45%, luxury windows 6%. Management expects FY27 in a similar range, with exports almost all US this year.

Capacity use: Factory running at about 55-60% utilisation (Nov 2026), with about 130 panels a day across four lines. Management says it can reach Rs 1,000 cr-plus of revenue from the same facility without major new capex.

3. Earning Trigger thesis

The earnings driver management keeps pointing to is a full order book: Rs 957 cr of facade work in hand, mostly for large commercial developers, plus higher-margin exports and luxury windows. Management promises a much stronger second half as export jobs on the floor ship, and a margin lift from its own glass processing unit from late 2027. The catch is that new US export orders have slowed, and the company has only two calls of track record.

Trigger	What management said	Evidence so far	Time horizon	Strength
Order book in hand	Rs 982 cr at 31 Jul, Rs 957 cr at 30 Sep; aim to keep 18-24 months of visibility	Opening FY27 book Rs 846 cr vs Rs 383 cr a year earlier; FY26 sales up 76%	18-24 months	Strong: the work is booked
Exports to the US, Australia, then Israel and Canada	Q3-Q4 export shipments will be strong; Israel entry hoped in next two quarters	Exports down 14% in H1 on schedule; new US orders on hold	FY28	Moderate: depends on US demand
Luxury windows (fenestration)	'can show exponential growth'; big bids in Delhi and Mumbai	H1 revenue up 82%, but still a small slice	1-3 years	Moderate
Own glass processing unit	Commission by July-August 2027; 1-1.5% better EBITDA margin	Civil work advanced, machinery ordered	Late FY28	Moderate: not yet built

3b. Trigger check

Trigger type	Yes/ No	What was said (date)
Debt cut	No	Already debt-free; no repayment plan discussed.
New business	No	Israel and Canada are being explored but no order yet (Nov 2026).
Margin up	No	Management holds margin guidance at 23-25% EBITDA; Q2's higher margin came from escalation claims and mix (Nov 2026).
New management	No	No change in the CEO, MD or CFO mentioned.
New capacity	Yes	Glass processing unit under construction, commissioning targeted July-August 2027 (Nov 2026).
Big orders	Yes	Order book Rs 957 cr at 30 Sep 2026, against FY26 sales of Rs 430 cr; Mumbai hotel job of close to Rs 90 cr booked in Q2 (Nov 2026).
Turnaround	No	Not applicable; the company is profitable.
Promoter buying	No	Not discussed; the IPO included a large offer for sale by existing holders (Oct 2026).

The single concrete driver: A facade order book worth a bit over two years of last year's sales, which management says will make the second half of FY27 much bigger than the first.

3c. Margin bridge

Operating margin was 27% in the Sep 2026 quarter against 21% a year earlier. Management put it down to about Rs 6 cr of price-escalation claims for costs incurred in the earlier quarter, plus more high-margin luxury window work. It kept full-year guidance at 23-25%, so the quarter's spike is (one-off).

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Oct 2026	Q3 and Q4 export shipments will be strong; no delay in export jobs	Nov 2026: existing export jobs 'on the floor and getting dispatched'; only new US orders held back	Too-early
Oct 2026	FY27 revenue growth about 25%, EBITDA 23-25%	Nov 2026: growth guidance stated as 20-22%, described as 'the same as it was last time'; margin guidance held	Partly
Oct 2026	'A couple of jobs' close to being won, including in new markets	Rs 291 cr booked by September including a Mumbai hotel and data-centre jobs; Israel and new US jobs still pending	Partly
Oct 2026	Glass processing unit commissioning in about 8 months	Nov 2026: timeline now July-August 2027, about 10-11 months away	Partly
Nov 2026	Book about Rs 500 cr of orders in H2 and end the year with over Rs 1,000 cr in hand	To be checked at Q3 and Q4	Too-early

Narrative drift: With only two calls, the story is consistent in shape: three verticals, a large order book, a strong second half, a glass unit for margin. Two small things drifted between the calls: the revenue growth guide went from about 25% to 20-22% while being called unchanged, and the glass unit's start moved from about eight months to July-August 2027. The project cost was given as Rs 80 cr in October and about Rs 70 cr in November. Tone is confident and promotional.

5. Bottom line

Durable earning trigger? → YES

The driver is concrete and already in the numbers: a large commercial facade order book that has more than doubled in a year, FY26 sales up about three-quarters at much better margins, and a stated plan for a heavier second half. The glass unit and luxury windows add upside later. The risk is the US export slowdown and a short public track record.

Management consistent? → MAYBE

Too early to call it consistent. Management delivered what it said on the order book and margins, but in one quarter it quietly trimmed the growth guide and pushed the glass unit's start date, while describing both as on track.

6. Checkpoints for next quarter

- Second-half revenue clearly beats the first half, as guided
- Order book stays near or above Rs 950 cr after the second-half bookings
- Glass processing unit machinery arrives on schedule
