Skipper Limited: Concall Tracker

Power transmission towers, transmission EPC and polymer pipes · Ticker SKIPPER (BSE 538562) · Quarter folder Q2-2027 · Builds on the Q1-2027 report (coverage to the 12 Aug 2026 call) · New call deep-read: Q2 FY27, 30 Oct 2026

1. Snapshot

What the business does: Skipper is India's biggest maker of the steel towers that carry high-voltage power lines. It also builds whole transmission lines as a contractor (EPC: engineering, procurement and construction) and has a smaller plastic-pipes arm. Customers are grid developers such as Power Grid and private transmission companies, plus a growing export book.

Measure	Value	Plain-English read
Market value	≈ ₹6,325 cr	What the stock market values the company at (Screener, Nov 2026).
Q2 FY27 revenue	₹1,384 cr (+10% YoY)	Best-ever second quarter, faster than Q1's +4.5%, but still short of the yearly 15% pace.
H1 FY27 revenue	₹2,694 cr (+7%)	First half grew about half the full-year guide, so the second half has to do the heavy lifting.
Q2 FY27 EBITDA	₹145 cr (+11%), margin 10.5%	Operating profit before interest, tax and depreciation. Margin up on last year, a touch below Q1's 10.7%.
Q2 FY27 profit	₹57.5 cr (+56%)	Profit grew far faster than sales, mostly because interest costs fell after the equity raise.
Order book (Sep 2026)	₹10,066 cr	A record, about 1.8 years of sales in hand.
Debt-to-equity	0.38×	Down from 0.64× before the ₹433.5 cr equity raise. Gross debt down ₹358 cr in a year.

2. Concall coverage

Quarter	Call date	How it was read
Q4 FY24 → Q4 FY26	May 2024 → Apr 2026	Carried forward from the Q4-2026 and Q1-2027 reports
Q1 FY27 (prior boundary)	12 Aug 2026	Read in full for the Q1-2027 report
Q2 FY27	30 Oct 2026	Newly deep-read in full ★

Only the Q2 FY27 call was read in full this quarter; the backstory comes from the prior reports.

★ Latest concall highlights: Q2 FY27 (30 Oct 2026)

- **Sales picking up, profit racing ahead.** Revenue +10%, EBITDA +11%, profit +56%. Finance cost fell to 3.2% of sales from 4.2% a year ago.
- **Export orders jumped, export shipments fell.** A record ₹1,055 cr of export orders in one quarter, more than all of FY26, mostly from the US and Australia. North America is now about 44% of the export book and the Middle East under 18%. But export sales fell 46% to ₹106 cr as buyers held back shipments until freight rates ease.
- **Guidance softened a little.** FY27 revenue growth still "15%", but "at worst" 13-14%. Order inflow guide held at ₹7,500 cr, with ₹3,786 cr booked in H1. Margin promised at 10-11% "come what may"; the 12% aim is long term.
- **Capacity slipped again.** The 75,000 t expansion to 4.5 lakh t is now due end of Q3 or early Q4 (it was March, then June, then end of Q2). The 6 lakh t target moved to FY29 and needs a new greenfield site, to be picked "within this quarter".
- **Small buy:** announced a ₹15-16 cr acquisition of a manufacturing company in South India. Tone: upbeat on demand, a bit defensive on timing.

Business mix & capacity (quick facts)
Domestic vs export: exports are about 17% of the order book; export sales this quarter were under a tenth of revenue. The rest is India.
Capacity use: about 80% of the 3.75 lakh t tower capacity. It has run at 90% before; export deferrals held it back. Capacity goes to 4.5 lakh t around end of Q3.

★ Since our last report

Builds on the Q1-2027 report (call of 12 Aug 2026). Prior verdicts: trigger YES, consistency MAYBE.

Prior read	What we said then	What the new call shows	Movement
Trigger (YES)	Record book, ordering picking up.	Book above ₹10,000 cr; record Q2 inflow (+70%); export orders from developed markets.	Confirmed
Consistency (MAYBE)	Profit kept, revenue and capacity dates slip.	Same pattern: profit up, revenue guide hedged to 13-14% at worst, capacity late a third time.	Unchanged
H2-weighted growth	Growth to come mostly in H2.	Q2 sped up to +10%; H2 needs about 20%+. Not yet testable.	Too early
4.5 lakh t capacity by Q2 end	Promised at the Q1 call.	Now end of Q3 / start of Q4.	Slipping
Exports	Shipments held up by freight.	Orders at a record; shipments still down by almost half.	Improving (orders), Slipping (sales)
Debt	Equity raised to repay debt.	D/E 0.38×; finance cost 3.2% of sales, inside the 3.2-3.5% guide.	Confirmed

Checkpoints from the last report: it had no checkpoints box. The journal's one promise (growth comes mostly in H2) can't be scored until H2 results. **Checkpoint results: none scored**.

Verdict change: both verdicts unchanged.

3. Earning Trigger thesis ★

India has to keep spending on its grid (management sees ₹1 lakh cr+ of bids a year to 2032-33), and as the biggest tower maker Skipper takes a slice. Profit is growing faster than sales because interest costs are lower and old low-margin contracts are gone. The new part this quarter is exports to the US and Australia, where AI data-centre power lines are being built. Those orders carry better margins but ship mostly next year.

Trigger	What management said	Evidence so far	Horizon	Strength	Change since last report
India grid build-out	₹1 lakh cr+ of bids a year; ₹7,500 cr inflow in FY27.	Book ₹10,066 cr; pipeline ₹35,000 cr+.	To 2032	Strong	↑ book crossed ₹10,000 cr
Developed-market exports	More US, Canada, Australia orders; ₹1,500 cr export inflow guide.	₹1,055 cr won in Q2; over 60% of export book now developed markets.	FY28	Moderate	↑ first big wins
Lower interest cost	3.2-3.5% of sales.	3.2% in Q2; profit +56%.	FY27	Strong	unchanged
Margin climb to 12%	10-11% now, 12% long term.	10.5%, up on last year, flat-ish on Q1; cost pressure from fuel and commodities.	2-3 years	Moderate	↓ expansion slowing
Capacity to 6 lakh t	4.5 lakh t by Q3-Q4, 6 lakh t by FY29.	First step late a third time.	FY27-29	Moderate	↓ delayed again

The catch: the revenue line keeps lagging the book. Export shipments are hostage to freight, the expansion is late again, and the full-year guide leans on a much stronger second half.

3b. Trigger check

Trigger type	Yes/ No	What was said (date)
Debt cut	Yes	D/E "0.38x", gross debt down "approximately INR358 crores year-on-year" (30 Oct 2026).
New business	Yes	Export orders now mostly from the US and Australia; "record quarterly export order inflow of INR1,055 crores" (30 Oct 2026).
Margin up	Yes	"in both the quarters, we have seen EBITDA margins improve"; 12% aim (30 Oct 2026).
New management	No	No change.
New capacity	Yes	75,000 t expansion to 4.5 lakh t, "end of quarter 3 itself or latest, at the beginning part of quarter 4" (30 Oct 2026).
Big orders	Yes	Order book "INR10,066 crores", Q2 inflow ₹2,111 cr up 70% (30 Oct 2026).
Turnaround	No	Not applicable.
Promoter buying	No	The ₹433.5 cr preferential issue went to institutions, not promoters.

Single concrete driver: a record order book from India's grid build-out, now topped up by higher-margin tower orders from the US and Australia.

3c. Margin bridge

EBITDA margin is 10.5% versus about 10.4% a year ago and 10.7% last quarter. Better-quality contracts lifted it, while fuel and commodity costs and a one-time salary arrears payout held it back. Management calls 10-11% the floor and says export orders take it higher next year (lasting).

4. Management Consistency scorecard

Period	What was promised	What actually happened	Verdict
FY24 (May 2024)	25% revenue growth.	FY25 +41%.	Delivered
FY25 (Apr 2025)	25% growth in FY26.	FY26 +20%.	Partly
Q4 FY26 (Apr 2026)	FY27 revenue +15%, profit +30%.	H1 revenue +7%, profit +40%; revenue guide now 13-15%.	Partly
Capacity 4.5 lakh t	March, then June, then Q2 end.	Now end Q3 / early Q4.	Missed
Q1 FY27 (Aug 2026)	Interest cost 3.2-3.5% of sales.	3.2% in Q2.	Delivered
Exports	Export orders up by half to ~₹1,100 cr.	About ₹1,100 cr booked in H1 alone.	Delivered
6 lakh t capacity	By FY28 (Q1 call).	Now FY29, on a site still to be chosen.	Partly

Narrative drift: the story is steady (grid spend, exports, bigger plant), and profit and debt promises keep landing. What drifts are dates and revenue growth. Every slip has a fair excuse, but the expansion is now three dates late and the big capacity target moved out a year.

5. Bottom line: two verdicts

Durable earning trigger? → **YES** (vs last quarter: unchanged)

The book crossed ₹10,000 cr, export wins came from the markets management has been chasing for years, and profit grew about half on lower interest. The work is booked; it's the shipping that's slow.

Management consistent? → **MAYBE** (vs last quarter: unchanged)

Nothing new fixed the pattern. Profit, margin and debt promises keep getting met. Revenue growth and plant dates keep slipping, and the revenue guide now carries an "at worst" clause.

6. Checkpoints for next quarter ★

- 4.5 lakh t capacity is running by early Q4
- Q3 revenue growth is clearly faster than Q2's
- Export shipments recover from this quarter's slump
