Paramount Communications Ltd

Makes power cables, telecom and railway cables and overhead conductors at two plants in Rajasthan and Haryana, selling to Indian utilities, builders and dealers, plus a US distributor channel.

Concall-tracker report, filed under Q2-2027. Prepared 11 Nov 2026.

1. Snapshot

Number	Value	Plain read
Market cap	Rs 2,219 cr	What the whole company is valued at on the market
Q2 FY27 revenue	Rs 560 cr	Quarterly sales, up about 31% on a year ago
Q2 FY27 operating margin	7.3%	Profit before interest, tax and depreciation per Rs 100 of sales; back from 1.3% a year ago
Q2 FY27 profit	Rs 24 cr	Up from Rs 13 cr a year ago
Debt to equity	0.14x	Very little borrowing after the Q1 FY27 equity raise
P/E	about 31	Investors pay about 31 rupees per rupee of yearly profit

2. Concall coverage

Six calls read, spanning two years. The company held no calls in Q1 to Q3 FY26, during the US tariff shock.

Quarter	Date	Transcript read?
Q2 FY25	Nov 2024	Yes
Q3 FY25	Feb 2025	Yes
Q4 FY25	May 2025	Yes
Q4 FY26	May 2026	Yes
Q1 FY27	Aug 2026	Yes
Q2 FY27	27 Oct 2026	Yes, read in full

Latest concall highlights: Q2 FY27 (27 Oct 2026)

- Revenue up 31% to Rs 560 cr; operating margin up to 7.3% from 6.6% last quarter and 1.3% a year ago. The tariff damage is mostly repaired.
- HTLS conductors (high-temperature wires that let a utility carry more power on its existing towers): order book above Rs 200 cr, with better margins than ordinary cable.
- Narmadapuram plant in Madhya Pradesh on schedule for partial start in Q1 FY28; Rs 500 cr revenue expected in FY28, Rs 1,200 cr in FY29.
- Order book Rs 731 cr, deliberately kept to 3-4 months so metal prices can be locked in.
- FY27 revenue growth guided at 15-18% from the existing plants, which are full. Margin to beat FY25 levels by Q4 FY27.

Business mix and capacity

- Domestic about 72% / exports about 28% of Q2 FY27 revenue; US exports guided at 25-30% of FY27 sales (cut from an older 40% goal).

- Both plants running at full utilisation and out of physical space; Narmadapuram is the only route to big volume growth.

3. Earning trigger thesis

The earnings driver is the third plant at Narmadapuram, which adds extra-high-voltage cables up to 220 kV, HTLS conductors and e-beam cables, all higher-margin products. Until it starts in FY28, growth is capped by two full plants, so the near-term story is margin recovery after the US tariff hit plus a better product mix from HTLS.

Trigger	What management said	Evidence so far	Time horizon	Strength
Narmadapuram plant	Partial start Q1 FY28; Rs 500 cr FY28, Rs 1,200 cr FY29	Civil works and machinery orders on track	FY28-FY29	Moderate: real, but the start date already slipped from FY26
HTLS conductors	Rs 200 cr+ orders, double-digit margins possible	Orders in hand	FY27-FY28	Moderate
Margin recovery	Beat FY25 margin by Q4 FY27	1.3% to 7.3% in a year	FY27	Strong: already showing

3b. Trigger check

Trigger type	Yes/No	What was said (date)
Debt cut	No	Debt low after equity raise but no repayment plan stated
New business	Yes	HTLS conductors and data-centre cable approvals (Oct 2026)
Margin up	Yes	Operating margin 7.3% vs 1.3% a year ago; to exceed FY25 margins by Q4 (Oct 2026)
New management	No	-
New capacity	Yes	Narmadapuram partial commissioning Q1 FY28 (Oct 2026)
Big orders	Yes	HTLS order book over Rs 200 cr; total Rs 731 cr (Oct 2026)
Turnaround	Yes	Recovery from the FY26 US tariff losses (Aug and Oct 2026)
Promoter buying	No	-

Single concrete driver: The new Narmadapuram plant, starting in Q1 FY28, adds high-voltage cables and HTLS conductors that the two full existing plants can't make.

3c. Margin bridge

Margin went from 1.3% a year ago to 7.3% now. The US tariff losses are gone since the US Supreme Court struck the tariffs down in Feb 2026, customers now bear tariff changes, and aluminium (three-quarters of metal used) softened. Management sees further gains from HTLS. (lasting)

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Nov 2024	Rs 1,800 cr revenue by FY26 from existing capacity	FY26 revenue about Rs 1,900 cr	Delivered

May 2025	Narmadapuram to start production within FY26	Now partial start Q1 FY28	Missed
May 2025	US exports about 40% of revenue	Tariffs hit; target cut to 25-30%	Dropped
May 2025	30% revenue growth a year for 5 years	FY26 about 23%; FY27 guided 15-18%	Partly
Aug 2026	Margin back to FY25 level by Q4 FY27	7.3% by Q2, on track	Too-early

The core story (more capacity, more power cable, exports) has stayed steady, but timelines have slipped and the US push was scaled back after a shock outside its control. Tone is confident and more cautious on exports than a year ago.

5. Bottom line

Durable earning trigger? MAYBE

Margin recovery is real and in the numbers, and HTLS orders exist. The big growth step, Narmadapuram, is still a construction site and was already delayed once.

Management consistent? MAYBE

Revenue targets were roughly met, but the new plant slipped by about two years and the export goal was cut. The tariff shock explains part of it.

> **6. Checkpoints for next quarter**
>
> - Operating margin holds at or above Q2 FY27 level
> - Narmadapuram machinery installed, partial start still Q1 FY28
> - HTLS order book keeps growing
