Inox India Ltd

Makes cryogenic tanks and equipment (INOXCVA) for storing and moving liquefied gases: industrial gas tanks, LNG trailers, fuel stations and small terminals, beer kegs, and specialised cryogenic systems for space launch sites and science projects, sold in India and abroad.

Concall-tracker report, filed under Q2-2027. Prepared 11 Nov 2026.

1. Snapshot

Number	Value	Plain read
Market cap	Rs 17,746 cr	What the market values the company at
Q2 FY27 total income	Rs 467 cr	Up about 27% on a year ago
Q2 FY27 EBITDA margin	21.3% (19.5% excl. other income)	Down about two points on a year ago from competitive pricing and freight
Q2 FY27 profit	Rs 66 cr	Up about 8% on a year ago
Order backlog	Rs 2,268 cr	Highest ever, about 1.4 years of sales; 72% exports
Net cash	Rs 384 cr	No debt
P/E	about 69	Pricey

2. Concall coverage

All 12 calls since listing read, Feb 2024 to Nov 2026, about three years. Older calls skimmed for guidance; latest read in full.

Quarter	Date	Transcript read?
Q3 FY24	Feb 2024	Yes
Q4 FY24	May 2024	Yes
Q1 FY25	Aug 2024	Yes
Q2 FY25	Nov 2024	Yes
Q3 FY25	Feb 2025	Yes
Q4 FY25	May 2025	Yes
Q1 FY26	Aug 2025	Yes
Q2 FY26	Nov 2025	Yes
Q3 FY26	Feb 2026	Yes
Q4 FY26	May 2026	Yes
Q1 FY27	Aug 2026	Yes
Q2 FY27	4 Nov 2026	Yes, read in full

Latest concall highlights: Q2 FY27 (4 Nov 2026)

- Order backlog a record Rs 2,268 cr, about Rs 1,100 cr of it from space customers, including a large subcooler order from a US space company to be built at Savli.
- Only 10-15% of the US space order ships in FY27; 80-90% in FY28, so revenue is back-loaded.
- Beer kegs: sales up about 4.5 times, three-year global supply deal with a leading brewer; four of five target brewers have approved Inox.

- Margin dipped as standard tanks were priced to win share and freight cost rose; H1 still 22.3%, management calls it not structural.
- Bids out for an ISRO launch pad (about Rs 3,850 cr project), semiconductor fab gas piping at Dholera (first order won) and small LNG terminals in Andaman and Indonesia.

Business mix and capacity

- Order book 72% export. Standard equipment 30-40% of backlog, custom-built the rest.
- Kegs utilisation guided to 50-60% by year end and said to be on track; a new Kandla port facility due around early 2027.

3. Earning trigger thesis

The driver is a jump into high-value custom cryogenic work, above all space launch infrastructure for a US space company and possibly ISRO, on top of steady industrial gas and LNG tank demand. The record backlog gives visibility into FY28, and kegs plus semiconductor fabs are smaller new legs.

Trigger	What management said	Evidence so far	Time horizon	Strength
Space sector orders	Rs 1,100 cr in hand; more US projects in the pipeline	Tanks dispatched; most ships FY28	FY27-FY28	Strong
Beverage kegs	Utilisation to 50-60% by year end	Sales up about 4.5x; global brewer deal	FY27-FY28	Moderate
Semiconductor and ISRO	Bids pending	First Dholera order	FY28+	Unproven

3b. Trigger check

Trigger type	Yes/No	What was said (date)
Debt cut	No	Already net cash
New business	Yes	Semiconductor fab piping order at Dholera; LNG rail applications (Nov 2026)
Margin up	No	Margin dipped on pricing and freight (Nov 2026)
New management	No	-
New capacity	Yes	Kandla facility to be commissioned in 9-10 months (May 2026)
Big orders	Yes	Record backlog Rs 2,268 cr; mega subcooler order from US space company (Nov 2026)
Turnaround	No	-
Promoter buying	No	-

Single concrete driver: A record order backlog led by about Rs 1,100 cr of space-launch cryogenic equipment, mostly shipping in FY28.

3c. Margin bridge

EBITDA margin excluding other income is about 19.5% vs about 21.8% a year ago. Standard tanks were priced to hold share and freight costs rose with the West Asia conflict. Management says it's temporary; H1 margin of 22.3% is within its range. (one-off)

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
May 2024	Savli plant ramp	Commissioned in 6 months; now hosting the US space order	Delivered
Feb 2025	18-20% growth	FY26 total income up 21%	Delivered
Aug 2025	EBITDA growth above revenue	FY26 margin 23.8%, above guidance	Delivered
Aug 2026	Keg utilisation 50-60% by year end	Said on track	Too-early
May 2026	Kandla facility in 9-10 months	In progress	Too-early

The story has been steady and the numbers have matched it: 18-20% growth, margins in the low 20s, bigger custom orders. The new space and semiconductor work extends the same cryogenic skill set.

5. Bottom line

Durable earning trigger? YES

A record backlog with named space customers is a concrete, already-booked driver.

Management consistent? YES

Growth and margin guidance has been met for three years and plants came up on time.

> **6. Checkpoints for next quarter**
>
> - EBITDA margin back above 21% excluding other income
> - Order backlog stays above Rs 2,000 cr
> - Decision on ISRO launch pad or semiconductor bids
