Navkar Corporation Ltd

Concall Tracker, Q2 2027 update | Report date: 6 Nov 2026 | NSE NAVKARCORP | Builds on the Q1-2027 report | About 70% owned by JSW Infrastructure

Navkar runs container yards next to the JNPT / Nhava Sheva port near Mumbai, called Container Freight Stations (CFS), where import-export containers are stored, checked by customs and moved on. It also runs an Inland Container Depot (ICD, a dry port) at Morbi in Gujarat and rail-linked cargo terminals. It earns handling, storage and rail fees. JSW Infrastructure took control in 2024 and uses Navkar as the base of its logistics arm.

1. Snapshot

Measure	Value	Plain-English read
Market value	₹1,260 cr	A small company, and down from about ₹1,536 cr in July.
Share price (52-week range)	₹84 (₹72 to ₹121)	Near the bottom of its range. Book value is ₹132 a share, so the stock trades at well under what the books say the assets are worth.
Q2 FY27 revenue (Jul-Sep 2026)	₹223 cr	Up 37% on a year ago and its biggest quarter ever, beating Q1's ₹191 cr.
Q2 FY27 operating margin	15%	About ₹15 of operating profit on every ₹100 of sales. Down from 17% in Q1 and 20% in Q4 FY26. Operating profit stayed flat at ₹33 cr even as sales jumped.
Q2 FY27 net profit	₹12 cr	Three times last year's ₹4 cr, but no better than Q1.
Return on capital (FY26)	3%	Still very low. Earns about ₹3 a year on every ₹100 tied up, because the asset base is large.
Price-to-earnings (P/E)	~27	Buyers pay ₹27 for each ₹1 of yearly profit, down from ~38 in July as profit rose and the price fell.

Figures from Screener.in (Navkar standalone). The JSW call reports the wider logistics segment, which also holds the rail rake business.

2. Concall coverage

Navkar no longer holds its own call. Since JSW took over, Navkar is discussed as part of the logistics segment on JSW Infrastructure's quarterly call, and that transcript is filed on Navkar's page.

Quarter	Call date	Transcript read?
Q2 FY24 (old owners) to Q4 FY26 (6 calls)	Nov 2023 to May 2026	Carried forward from the Q1-2027 report
Q1 FY27 (prior boundary)	21 Jul 2026	Results only in the prior report; transcript now on file, skimmed for tone
Q2 FY27 ★	27 Oct 2026	Newly deep-read in full

Only the Q2 FY27 call was read in full this time. Including the backstory, the read covers about three years, but only eight quarters of it are under JSW.

★ Latest concall highlights - Q2 FY27 (JSW Infrastructure call, 27 Oct 2026)

- **Volumes kept growing, slower than before.** Domestic cargo was 459,000 tonnes, up 16%, and import-export (EXIM) containers were 88,000 TEUs (standard 20-foot boxes), up 12%. Plain read: still growing, but domestic growth has halved from the 56% seen in Q4 FY26.
- **The rail fleet jumped.** Rakes (full freight trains) went from 42 to 78 in the quarter, though only 8 of the new ones ran in September. 72 run from October and the target is 110 by March 2027. Plain read: the extra trains barely counted in Q2, so H2 should look better.
- **Segment profit tripled.** The whole logistics segment made ₹81 cr of operating profit, up from ₹25 cr, at a 29% margin. Navkar itself was ₹223 cr of the segment's ~₹279 cr revenue; the rest is rail freight.
- **Guidance reworded, not raised.** The FY27 logistics operating-profit target stays at ₹400 cr. Revenue guidance was cut because rail haulage charges are now netted off, which pushed the margin guide to 28% from 24%. H1 delivered only ₹153 cr, so H2 needs well over double that.
- **Tone: confident, with a catch-up job ahead.** Management said it was "pretty confident" because the new trains run for the full second half. It also bought NCR Rail Infrastructure, won approval for an ICD at Ballari and a Gati Shakti terminal at Kulipalaiyam, Tamil Nadu.

Business mix & capacity

EXIM vs domestic: no revenue split given. Volume-wise both legs grew, domestic faster (16% vs 12%). Plain read: the rail-fed domestic side is still the quicker grower, but the gap narrowed.
Capacity utilisation: not stated on this call. The last figure was about 60% in Q4 FY26. Plain read: there's still idle room in the yards, but the falling Navkar margin this quarter shows filling it isn't automatically lifting profit.

★ Since our last report

Builds on the Q1-2027 report (boundary: Q1 FY27 results, 21 Jul 2026). Prior verdicts: trigger YES, consistency YES (JSW era, short record).

Prior read	What we said then	What the new call shows	Movement
Earning trigger	Filling idle capacity plus more trains and terminals	Sales a record, trains up sharply, segment profit tripled. But Navkar's own operating profit was flat and margin slipped	On-track
Consistency	JSW did what it said every quarter	Train target beaten early, new terminals won. H1 profit well behind the full-year target	On-track
Rail fleet to ~250	42 trains, 40 ordered	78 now, 110 by March. Long-term goal described as "fluid", about 267 and likely to rise	Improving
Navkar margin climbing	17% in Q1, operating leverage	15% in Q2 as costs rose faster than sales	Slipping
₹400 cr FY27 logistics profit	Repeated target	Kept, but H1 was ₹153 cr. Needs a big H2	Watch

Verdict change this quarter: both unchanged. The trigger is still live, and the train build-out is ahead of plan. The new worry is that Navkar's own margin stopped rising, and the full-year target now depends on a much stronger second half.

★ 3. Earning-trigger thesis

The story hasn't changed. JSW is turning Navkar from a loss-making yard operator into the hub of a nationwide rail-and-terminal network. Idle capacity in the yards, a fast-growing train fleet run under Indian Railways' private-train schemes, and cheap terminals built on leased railway land all feed it. In two years the network went from 3 to 8 locations and trains from 8 to 78. The proof this quarter mostly showed up in the rail business, where margins run near 90% because only the premium and rebate count as revenue. Navkar's own yards grew sales but not profit.

Trigger	What management said	Evidence so far	Horizon	Strength	Change since last report
Rail train fleet	110 by March 2027, about 267 long term	42 to 78 in one quarter; 72 running from October	Now to FY30	Strong: ahead of plan	↑ improving
Filling yard capacity	Higher use lifts margins	Record sales, but margin fell to 15% and profit was flat	Now	Moderate: stalled this quarter	↓ weakening
New terminals and ICDs	More terminals mean more trains	Ballari ICD approved, Kulipalaiyam terminal won, NCR Rail bought	FY27-30	Moderate: pipeline growing	↑ improving
Group cargo and network	Ports plus logistics make cargo sticky	Domestic up 16%, EXIM up 12%	To FY30	Moderate: steady, slower	unchanged

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Old owners (to FY24)	Profit to improve as Morbi ICD matured	Two loss years, asset sales	Missed
Q3 FY25 (JSW debut)	Make Navkar the logistics base; lift utilisation	Utilisation and profit rose right away	Delivered
FY26	Turn profitable; buy 25 trains; first Gati Shakti terminal	Profit every quarter; trains bought; Arakkonam live	Delivered
Q1 FY27	Carry momentum into FY27	Record quarter, margin up	Delivered
Q2 FY27	Grow the fleet; hold ₹400 cr logistics profit	Fleet nearly doubled; target held but H1 at ₹153 cr	Partly / too early

Narrative drift: none. The same ports-plus-logistics story, told the same way on every JSW call. The revenue guidance change is an accounting switch, and the profit target was left alone, which is the honest way to do it. The things to watch are smaller: Navkar's own margin stalled, management stopped quoting utilisation, and the long-term train target is now called "fluid". That's a target being raised, not dodged, but it's less precise than before.

5. Bottom line - two verdicts

Durable earning trigger? → YES vs last quarter: unchanged

The train build-out moved faster than promised, and most of it lands in H2. Navkar's yards had a record sales quarter. The dent is that Navkar's own profit didn't grow with sales and its margin slipped, so the near-term gains sit more in the rail business than in Navkar's yards. Return on capital is still tiny.

Management consistent? → YES vs last quarter: unchanged (JSW era, still short)

JSW has done what it said on trains and terminals again, and kept the profit target in place while explaining the revenue change openly. It's a short record, two years, and the full-year logistics target now needs a big second half. If Q3 doesn't show the jump, this becomes a MAYBE.
