Jash Engineering Ltd

Concall Tracker · Q2 2027 · first report

1. Snapshot

Maker of water-control equipment (sluice gates, penstocks, valves), screening equipment and process equipment for wastewater treatment, water infrastructure and industrial plants. It has grown by buying companies abroad: Rodney Hunt (gates, USA), Mahr Maschinenbau (screens, Germany), Waterfront Fluid Controls (UK) and Shivpad / Jash Process Equipment. Group figures below are consolidated, as management reports them.

Number	Value	What it means
Market cap	Rs 3,490 cr	What the market values the whole company at (Screener).
FY26 consolidated income	Rs 757 cr	Up only 1% on FY25's Rs 746 cr; management called it 'quite disappointing', blaming US tariffs that cut exports to its US arm by about Rs 50-60 cr.
Q2 FY27 revenue (consolidated)	Rs 192.5 cr	July to September 2026 operating revenue, up 22% on last year.
Q2 FY27 EBITDA	Rs 27.3 cr, 14.0% margin	Operating profit up 23%; margin flat on last year but up from 9.1% in Q1.
H1 FY27 profit after tax	Rs 19.6 cr	More than three times H1 FY26's Rs 5.8 cr, though the PAT margin (5.6%) is still far below the 12-13% guided for the year.
Order book (1 Nov 2026)	Rs 955 cr	Pending orders, more than a full year of sales; Rs 625 cr is from outside India.

2. Concall coverage

Quarter	Date	Transcript read?
Q4 FY24	May 2024	Yes (key passages)
Q1 FY25	Aug 2024	Skimmed
Q2 FY25	Nov 2024	Skimmed
Q3 FY25	Feb 2025	Skimmed
Q4 FY25	May 2025	Yes (key passages)
Q1 FY26	Aug 2025	Yes (key passages)
Q2 FY26	Nov 2025	Yes (key passages)
Q3 FY26	Feb 2026	Yes (key passages)
Q4 FY26	Jun 2026	Yes (key passages)
Q1 FY27	Aug 2026	Yes (key passages)
Q2 FY27	Nov 2026	Transcript not yet filed (presentation and recording only). Investor presentation (Nov 2026) read in full ★

Ten transcripts across about two and a half years, plus the Q2 FY27 presentation; the Q2 FY27 transcript is not out yet. Screener holds transcripts back to 2020.

Latest update highlights: Q2 FY27 investor presentation (Nov 2026)

- Total income Rs 194.9 cr, up 22%; EBITDA Rs 27.3 cr, up 23%; profit Rs 14.3-14.5 cr, up about 30%. H1 FY27 income up 20% to Rs 351 cr, EBITDA up 75%.
- Order book Rs 955 cr on 1 November 2026 (Rs 625 cr international, Rs 330 cr India), up from Rs 899 cr on 1 May. Projects executed this half across India, USA, UK, Saudi Arabia, Hong Kong, Vietnam and Thailand.
- FY27 consolidated sales outlook kept at Rs 875 cr; the chairman expects H2 'in line with our projections made at the beginning of the year'. H1 was Rs 342 cr of operating revenue, so H2 must be much bigger.
- Subsidiaries: Rodney Hunt (US) revenue up 8% in dollars but still loss-making in H1; Jash Process Equipment revenue down 19% and loss-making; Waterfront (UK) up 17%.

• Gross margin improved to 60% from 55% in H1.

Business mix & capacity

Domestic vs export: Outside India is the larger part: of the Rs 875 cr FY27 outlook, Rs 555 cr is outside India and Rs 320 cr within India. Order book: Rs 625 cr outside India / Rs 330 cr within.

Capacity use: Foundry and gate/valve manufacturing expansions were commissioned in Q1 FY27, adding up to 30% capacity (Aug 2026 call). Utilisation not given.

3. Earning Trigger thesis

The trigger is a large, mostly overseas order book (Rs 955 cr) for water-control and wastewater equipment, with new capacity from Q1 FY27 to execute it, after a flat FY26 hit by US tariffs. H1 FY27 shows the recovery starting. But the full-year outlook needs a very heavy second half, and the earlier Rs 1,000 cr FY27 target has already been cut to Rs 875 cr.

Trigger	What management said	Evidence so far	Time horizon	Strength
Order book execution	Rs 875 cr FY27 sales outlook	Order book Rs 955 cr; H1 revenue up 20%	H2 FY27	Moderate: back-loaded
Capacity expansion (foundry, gates and valves)	Up to 30% more capacity	Commissioned Q1 FY27	Now	Moderate
Profit margin recovery	PAT margin 12-13% for FY27	H1 PAT margin 5.6%	FY27	Weak: far off
Subsidiary turnarounds (Rodney Hunt, Waterfront, Process Equipment)	Waterfront to break even; Rodney Hunt to improve	Waterfront growing; Rodney Hunt and Process Equipment still loss-making in H1	FY27	Weak

3b. Trigger check

Trigger type	Yes/ No	What was said (date)
Debt cut	No	Not discussed.
New business	No	Same products; no new vertical in the period.
Margin up	Yes	Gross margin 60% vs 55% in H1; EBITDA margin up to 11.8% from 8.1% for H1 (Nov 2026 presentation).
New management	No	Chairman & MD Pratik Patel throughout.
New capacity	Yes	'We also commissioned our foundry expansion as well as our gate and valve manufacturing expansion, this increases our capacity up to 30%' (Aug 2026).
Big orders	Yes	Consolidated order book Rs 955 cr on 1 Nov 2026, Rs 625 cr international (Nov 2026).
Turnaround	Yes	After a flat FY26 hit by US tariffs, 'whatever shortfall we had met last year will more than make up in this year' (Jun 2026).
Promoter buying	No	Not discussed.

The single concrete driver: A record Rs 955 cr order book, mostly overseas water-control projects, with up to 30% new capacity commissioned in Q1 FY27.

3c. Margin bridge

H1 FY27 EBITDA margin is 11.8% versus 8.1% a year ago, with gross margin up to 60% from 55%. Better-priced orders and recovery from the tariff hit helped; management guides PAT margin of 12-13% but warns rising raw material prices could limit it (lasting, if H2 delivers).

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
May 2024	PAT margins to grow to 12-14% in time	PAT margin 5.6% in H1 FY27; FY26 target cut to 9-10%	Missed
May 2025	Waterfront to break even this year; Mahr to contribute	Waterfront growing in H1 FY27; Mahr in the order book	Partly
Nov 2025	Rs 1,000 cr revenue by FY27	FY27 outlook now Rs 875 cr	Missed
FY26	Growth year (before tariffs)	FY26 consolidated income up only 1%	Missed
Jun 2026	FY27 sales Rs 875 cr, PAT margin 12-13%	H1 operating revenue Rs 342 cr, PAT margin 5.6%; outlook kept	Too early
Aug 2026	Capacity expansion commissioned	Done in Q1 FY27	Delivered

Narrative drift: The core story (order book growth, global water-control franchise, subsidiaries turning around) has stayed steady, but the numbers keep slipping: margin targets set in 2024 aren't met, the Rs 1,000 cr FY27 goal became Rs 875 cr, and FY26 was flat. US tariffs are a real excuse for FY26, but subsidiary problems (Rodney Hunt labour shortages, Process Equipment execution delays) recur year after year.

5. Bottom line

Durable earning trigger? → YES

A record Rs 955 cr order book and fresh capacity are concrete, and H1 FY27 revenue growth of 20% and much higher profit show it starting. The year is heavily back-loaded, so H2 execution decides it.

Management consistent? → MAYBE

Capacity and order book promises were kept, but revenue and margin targets have slipped repeatedly (Rs 1,000 cr cut to Rs 875 cr, PAT margin far below guidance), and loss-making subsidiaries have been 'about to turn' for a while.

6. Checkpoints for next quarter

- H2 revenue puts the Rs 875 cr outlook within reach
- Rodney Hunt turns profitable for the half
- Order book stays above Rs 900 cr
