Mrs Bectors Food Specialities Ltd

Concall tracker report · Q2 2027 (Sep 2026 quarter) · prepared 11 Nov 2026

1. Snapshot

Punjab-based maker of Cremica biscuits (sold in India and exported to 70+ countries) and English Oven breads and buns, and a preferred bakery supplier to the largest quick-service restaurant (QSR) chains.

- Market cap about Rs 6,435 cr.
- FY26 revenue Rs 2,044 cr, up 9%: it crossed Rs 2,000 cr but grew slower than the 13-14% it had aimed for.
- FY26 EBITDA margin 12.6%, down from 14.9% in FY24: costs and brand spending ate into profit; FY26 profit Rs 141 cr, flat.
- Q2 FY27 (Sep 2026) revenue Rs 630.5 cr, up 14.3%; EBITDA Rs 82.5 cr, margin 13.1% vs 12.6%; profit Rs 45.7 cr, up 25.3% (investor presentation).
- Debt low: debt to equity about 0.1. Promoters hold 49.04%, unchanged.

2. Concall coverage

The Q2 FY27 call was held (Nov 2026) but its transcript was not yet published when this report was written. Q2 FY27 is covered from the company's investor presentation filed on 5 Nov 2026; the latest call read in full is Q1 FY27 (7 Aug 2026).

Quarter	Date	Transcript read?
Q3 FY25 → Q3 FY26 (5 calls)	Feb 2025 → Feb 2026	Skimmed for guidance and promises
Q4 FY26	May/Jun 2026	Key sections
Q1 FY27	7 Aug 2026	Yes, in full ★
Q2 FY27	Nov 2026	Transcript not yet out; investor presentation read

About two years of calls. 18 transcripts are on Screener going back to 2021.

Latest update highlights: Q2 FY27 presentation (5 Nov 2026) and Q1 FY27 call (7 Aug 2026)

- Q2 FY27 revenue +14.3%, EBITDA +19.1%, profit +25.3%. Biscuit segment Rs 383 cr (+9%), bakery Rs 237 cr (+22%). Gross margin 46.2% vs 44.2%.
- Q1 call: full-year target held at mid-teens growth; aim to reach a 14% EBITDA margin by Q4 FY27. Q2 was flagged as the hardest quarter for input costs, with price rises fully covering costs by Q3.
- New bakery plants at Kolkata (Q4 FY26) and Khopoli, Maharashtra (Mar 2026) now serving East and West; Khopoli expected to scale toward full capacity over coming quarters.
- Exports back to growth: US business back on track, a new peanut butter cracker SKU added with Walmart. Quick commerce grew 58% in Q1.
- New CFO: Anshul Rastogi joined (welcomed on the Q1 FY27 call), with finance leadership experience at multinational consumer companies.

Business mix & capacity

- Domestic vs export: not split by management in these calls; the US is about 23-25% of exports. In domestic general trade about half now comes from outside Upper North India.

- Capacity utilization (FY26): biscuits about 69% peak / 60% average; bakery about 82% peak / 75% average. Capacity 1,85,880 tonnes biscuits, 1,07,467 tonnes bakery, with more bakery capacity planned (Bengaluru expansion).

3. Earning trigger thesis

Bector's trigger is the bakery business growing into new cities from new plants (Kolkata, Khopoli) on the English Oven brand plus QSR supply, exports recovering with new SKUs at large US retailers, and margins being rebuilt through price increases and the Project IMPACT cost programme. Growth is now back in the mid-teens; the margin target has slipped before, so that is the part to watch.

Trigger	What management said	Evidence so far	Time horizon	Strength
New bakery plants (Kolkata, Khopoli)	Kolkata serving East encouragingly; Khopoli stabilising, scaling over coming quarters (Aug 2026)	Bakery revenue +22% in Q2 FY27	Next few quarters	Strong
Export recovery	Export to grow mid- to high-teens in FY27 (Feb 2026)	Healthy high-double-digit export growth in Q1 FY27; Walmart SKU added	FY27	Moderate
Margin rebuild to 14%	Reach 14% by Q4 FY27 (Aug 2026); earlier aimed for H1 FY27 (Feb 2026)	13.1% in Q1 and Q2 FY27, up from 12.6%	Q4 FY27	Moderate: target has slipped

3b. Trigger check

Trigger type	Yes/ No	What was said (date)
Debt cut	No	Not discussed; debt already low
New business	No	New products (Naturbaked, peanut butter) but no new business line
Margin up	Yes	'Our target still remains that by quarter 4 of this financial year, we get to our 14% EBITDA target' (Aug 2026); EBITDA margin up 80 bps in Q1
New management	Yes	New CFO Anshul Rastogi welcomed on the Q1 FY27 call (Aug 2026)
New capacity	Yes	Kolkata bakery commissioned Q4 FY26; Khopoli commissioned Mar 2026, scaling over coming quarters (Aug 2026)
Big orders	No	Not applicable
Turnaround	No	Not applicable
Promoter buying	No	Promoter stake flat

Single concrete driver: New bakery plants in Kolkata and Khopoli taking English Oven and QSR supply into East and West India, with exports recovering.

3c. Margin bridge

Q2 FY27 EBITDA margin 13.1% vs 12.6% a year ago, gross margin 46.2% vs 44.2%. Management credits price increases (about 2-2.5% in the consumer business), the Project IMPACT cost programme and a richer mix as faster-growing bakery earns above the company average; freight, fuel and more marketing offset part of it (lasting).

3d. Management changes

New CFO Anshul Rastogi, introduced on the Q1 FY27 call (Aug 2026), with finance leadership experience at multinational consumer companies. No changes he plans were discussed.

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Q4 FY25 call (Jun 2025)	FY26 growth around 13-14%; domestic biscuits low teens, exports mid-teens	FY26 revenue grew 9%	Missed
Nov 2025 / Feb 2026 calls	Get back to a 14% EBITDA margin, first by H1 FY27	H1 FY27 margin 13.1%; target now Q4 FY27	Missed / delayed
Feb 2026 call	Commission Khopoli plant in the next few months	Commissioned March 2026	Delivered
Q4 FY26 call (2026)	FY27 low- to mid-teens growth	H1 FY27 revenue +15.1%	Delivered so far

The core story (bakery expansion, exports, premium biscuits, back to 14% margin) has stayed the same, but the numbers attached have kept slipping: FY26 growth fell short and the margin target moved out twice. FY27 so far is tracking the guidance.

5. Bottom line

Durable earning trigger? → YES

New bakery plants and export recovery are named, concrete and already showing: bakery +22% and revenue +14% in Q2 FY27. The margin part is still catching up.

Management consistent? → MAYBE

Plants come on as promised, but growth and margin targets slipped in FY26 and the 14% margin goal has been pushed out more than once.

> ## 6. Checkpoints for next quarter
>
> - Revenue growth holds in the mid-teens range in the December quarter
> - EBITDA margin moves up from the September quarter level
> - Khopoli plant keeps ramping toward full capacity
