Shadowfax Technologies Ltd

Concall Tracker, Q2 2027 update | Screener ticker SHADOWFAX (BSE 544685) | India last-mile logistics | Covers calls up to the Q2 FY27 call (29 Oct 2026)

1. Snapshot

What it does: Shadowfax is India's biggest outsourced last-mile delivery company. When you order from an e-commerce site, a D2C (direct-to-consumer) brand or a 10-minute quick-commerce app, its gig riders often carry the parcel from the warehouse or dark store to your door, and it earns a fee per delivery. Three lines: Express Parcel (intercity e-commerce parcels, about 71% of revenue), Hyperlocal (quick commerce and food, about 22%) and Other Logistics (CriticaLog's time-critical deliveries plus its own dark stores).

Figure	Value	Plain read
Market value	Rs 16,911 cr	What the market values the whole company at, per Screener's snapshot.
Q2 FY27 revenue (Jul-Sep 2026)	Rs 1,538 cr	Sales in the quarter, up 57% on last year and 13% on June. The first quarter above Rs 1,500 cr, and the sixth in a row growing 55%+. (Screener shows Rs 1,501 cr of operating sales.)
Q2 FY27 net profit	Rs 67 cr	A new record, just above June's Rs 66 cr and up from about Rs 14 cr a year ago. Flat on the quarter because new sheds, rent and depreciation went in ahead of the festive rush.
Adjusted operating margin	5.0%	Rs 5 of every Rs 100 of sales kept as operating profit. Up from 4.9% in June and its first-ever 5% quarter. Thin, but still climbing.
H1 FY27 revenue	Rs 2,896 cr	First six months of the year, 60% ahead of last year.
P/E (price / earnings)	~75	You pay about 75 rupees for each rupee of the last twelve months' profit. Still a rich price.
Institutional holding	FIIs 16.3%, DIIs 28.8% (Sep 2026)	Foreign and domestic funds roughly added half again to their stakes in one quarter (from 8.8% and 19.1%). Big money is buying in.

2. Concall coverage

Quarter	Call date	Transcript read?
Q3 FY26 → Q4 FY26 (maiden call after Jan 2026 listing, then year-end)	12 Feb 2026, 14 May 2026	Carried forward from the Q4-2026 and Q1-2027 reports
Q1 FY27 (prior report's boundary)	31 Jul 2026	Carried forward from the Q1-2027 report
Q2 FY27 (Jul-Sep 2026)	29 Oct 2026	Newly deep-read in full ★

Only the Q2 FY27 call was read in full this time. The backstory comes from our earlier reports. Shadowfax listed in January 2026, so four calls is its whole public history.

2b. Latest concall highlights, Q2 FY27 (call 29 Oct 2026) ★

- **Strong quarter with no sale in it.** The big e-commerce festive sale fell in October this year, so none of it is in Q2. Revenue still grew 13% on June to Rs 1,538 cr, and orders hit 27.1 crore (+70% on the year). That's a clean read of underlying demand.
- **Hyperlocal took off.** Quick commerce spread to tier-2 cities and food delivery picked up. Hyperlocal revenue rose 88% on the year to Rs 341 cr, and what it earns per order went from about Rs 55 to over Rs 60, because food runs are longer trips.
- **Biggest capacity build in its history.** Floor space went from 53 to 69 lakh sq ft and the rider pool from 2.9 to 3.8 lakh. Two big automated sorters go live in Q4. Capex stays at the promised 3.8-4% of revenue.
- **Guidance held, not raised.** FY27's 38-40% growth guide from July stands. They'll wait for the festive quarter before touching it. Long-term growth is still 27-30% a year.

- **New bet: micro-fulfilment centres (MFCs).** 40,000-50,000 sq ft warehouses on city edges holding several brands' stock for 8-12 hour delivery. Room for about 50 cities over a few years. Revenue small this year. Tone: confident, and less dependent on its top customer.

2c. Business mix & capacity
Domestic vs export: 100% domestic. It's an India delivery network, so there's no export split.
Segments: Express ~71% (down from 73%), Hyperlocal ~22% (up from 20%), Other Logistics Rs 100 cr. Value-added services (same-day, returns, exchange etc.) are 35-40% of revenue.
Capacity: no utilisation figure given. Space jumped about 30% in one quarter, and about 5% of it is temporary festive pop-ups. So there's room to fill, and Q3 will show whether the build was sized right.

2d. Since our last report ★
Builds on the Q1-2027 report (boundary call 31 Jul 2026). Prior verdicts: **Trigger YES**, **Consistency YES** (upgraded from MAYBE).

Prior read	What we said then	What the new call shows	Movement
Earning trigger	Share gains plus D2C mix, margins thin but rising	Revenue +57%, margin hit 5%, D2C share up 2 points to 14%+	Confirmed
Consistency	Three calls of met or beaten promises	Fourth call: dark stores, bulky goods and capex all on or ahead of plan	Confirmed
Raised FY27 guide (38-40%)	Needs to hold through the festive quarter	H1 at +60%. Analysts say H2 needs only about 25%. Not raised again yet	On-track
Lost-shipment cost	5.5%, target 3.5-4%	Easy gains are done. Next stop 4% "in a few quarters", slower from here	On-track (slowing)
Capex intensity	Front-loaded, Rs 60 cr in Q1	Biggest build ever, but still guided 3.8-4% of revenue, MFCs included	On-track
Amazon ramp	Top-10 customer	Now top-5. Express volume jump only expected next year	Improving
100 dark stores in FY27	47 live by June	70 live across 9 cities	On-track
Thin margin vs big-customer pricing	Main risk	Top-customer share down 3-4 points. Aim to bring it well below 40%	Improving

Verdict change: none. Both stay YES. The quarter added proof without a festive sale to flatter it, and the top-customer risk eased a bit.

3. Earning trigger thesis ★

Same story, more evidence. Shadowfax keeps winning share in a delivery market that's down to two national players, and it's moving into work that pays better: same-day delivery for D2C brands and small sellers, bulky goods, dark stores, and now micro-fulfilment. Management's pitch this time was speed. Price can be matched in a quarter, but a same-day network takes years to build, and same-day jobs pay 15-20% more per parcel. The new wrinkle is that growth came mostly from customers outside the top 10, so the business leans less on one marketplace.

Trigger	What management said	Evidence so far	Horizon	Strength	Change since last report
Market-share gains	Express to grow 27-28% a year on share gains	Express +55%, shipments +72%. FY27 guide 38-40% held	Now	Strong	unchanged, still delivering
D2C / small sellers (Prime, SF360)	Long tail is the top priority for the next 4-8 quarters	D2C more than doubled. Prime +36% on June. 6,700 SF360 sellers in 200 days	1-3 yrs	Strong	↑ fastest-growing part now

Margin expansion	Slow climb, extra profit reinvested	Adj. margin 4.3% → 4.7% → 4.9% → 5.0%	To FY28	Moderate	unchanged, small step up despite heavy build
Quick commerce	Industry to compound 30%+, Shadowfax keeps share	Hyperlocal +88%, better pay per order. Amazon Now scaling	1-3 yrs	Moderate-Strong	↑ big jump this quarter
New lines (Prime Large, dark stores, MFCs)	Experiments that scale	Prime Large past Rs 100 cr run-rate. 70 dark stores. MFCs just announced	FY27+	Moderate	↑ on plan, plus a new bet

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Feb 2026 (Q3)	Q4 at 90-95% of festive Q3	Q4 beat Q3	Delivered
May 2026 (Q4)	FY27 growth 27-30%	Raised to 38-40% in July. H1 grew 60%	Delivered (beat)
Feb-Oct 2026	Margin up about a point a year	4.3% → 5.0% over four quarters	Delivered
May-Jul 2026	Lost-shipment cost toward 4%	Fast drop to 5.5% by June. Now flagged as slower from here	Partly (honest about pace)
May 2026	100 dark stores in FY27	70 by September	On track
May-Jul 2026	Prime Large scaling	Past Rs 100 cr run-rate, +33% on June	Delivered
Jul 2026	Capex 3.8-4% of revenue for FY27	Reaffirmed after the biggest build ever, MFCs included	On track
Jul 2026	Amazon Express jump comes next year, not now	Repeated word for word. Amazon now top-5 overall	On track

Narrative drift: none. Share gains, D2C mix and a slow margin climb run through all four calls. This call added the "speed" framing and the MFC plan, which are extensions of the same Prime network, not a new story. Two things to watch. First, they declined to raise guidance again, which is sensible caution before the festive quarter but means Q3 is the real test. Second, MFCs are a capital-hungry warehouse business bolted onto a light delivery model. They say it fits inside the capex guide, so that's the promise to hold them to. Tone on hard questions (flat Express pay per parcel, rising partner costs) was clear and not defensive.

5. Bottom line

Durable earning trigger? → YES vs last quarter: unchanged

Nothing weakened. A quarter with no festive sale still grew 13% on the last one, Hyperlocal nearly doubled on the year and the margin edged up to 5% while the company built more capacity than ever. The driver is real and in the numbers. The risks are the same: margins are thin, a big customer cutting rates or a weak festive season would bite, and the stock already prices in a lot.

Management consistent? → YES vs last quarter: unchanged

A fourth call where the numbers matched what they said. Dark stores, Prime Large, capex and margin all on or ahead of plan, and they told investors straight that lost-shipment savings will slow. Holding guidance rather than raising it again looks like discipline, not a wobble. If Q3 lands the festive season and MFC spending stays inside the capex guide, this read holds.
