Tara Chand Infralogistic Solutions Ltd

Concall Tracker · Q2 2027 · first report

1. Snapshot

Rents out heavy cranes (up to 900 tonnes), piling rigs and aerial platforms for power, renewable, cement, steel and metro projects, and runs steel stockyards, handling and transport for steel makers such as SAIL. Despite the logistics tag, most revenue now comes from crane rental.

Number	Value	What it means
Market cap	Rs 369 cr	What the market values the whole company at; a small company.
Q2 FY27 revenue	Rs 83 cr	Sales for the quarter, up 27%.
Q2 FY27 EBITDA margin	34.7%	Operating profit per Rs 100 of sales, up from Q1 but below 39% a year ago. High because crane rental is a high-margin, capital-heavy business.
Q2 FY27 profit	Rs 9 cr	Highest quarterly profit so far.
Net debt to equity	About 1x	At the ceiling management set, after heavy crane buying.
Stock P/E	About 15x	Modest, reflecting the debt and lumpy growth.

2. Concall coverage

Quarter	Date	Transcript read?
Q2 FY25	Oct 2024	Yes (key passages)
Q3 FY25	Jan 2025	Yes (key passages)
Q4 FY25	19 May 2025	Yes (key passages)
Q1 FY26	1 Aug 2025	Yes (key passages)
Q2 FY26	31 Oct 2025	Yes (key passages)
Q3 FY26	30 Jan 2026	Yes (key passages)
Q4 FY26	7 May 2026	Yes (key passages)
Q1 FY27	7 Aug 2026	Yes (key passages)
Q2 FY27	30 Oct 2026	Yes, read in full ★

Nine calls across two years, from NSE filings. The company moved to the main board; it is not on the NSE SME list.

Latest concall highlights: Q2 FY27 (call held 30 Oct 2026)

- Revenue Rs 83 cr, up 27%; profit Rs 9 cr, a record. Margin 34.7%, recovering from a weak Q1 but below last year's 39%.
- Equipment rental and projects up 57%. Crane rental margin 55% at 82% fleet use. Power and renewables now 53% of rental revenue.
- Rs 107 cr of capex in H1, more than the full-year plan: nine big cranes including two 900-tonne and two 800-tonne crawlers, mostly commissioned in Q3. Fleet now 436 machines.
- Steel warehousing back in profit after the Vizag (RINL) contract ended; the new Dankuni yard in West Bengal is ramping up.
- Order book Rs 164 cr, all for FY27. Revenue guide cut to the lower end of 20-25%; full-year margin about 35% against the earlier 37-38% band.
- Net debt to equity at the 1x ceiling. Receivables still above the 80-day target as renewable clients pay slowly.

Business mix & capacity

Domestic vs export: All India. H1 FY27: equipment hiring and projects 72%, warehousing and transport 28%, steel trading negligible.

Capacity use: Crane fleet utilisation 82%; nine new heavy cranes arriving through Q3.

3. Earning Trigger thesis

The driver is heavy-crane rental for India's power and renewable build-out. Tara Chand keeps buying the biggest cranes, which few rivals own, and rents them at about 55% margins. Rental revenue is growing fast, but overall targets keep missing, debt is at the limit and clients pay slowly.

Trigger	What management said	Evidence so far	Time horizon	Strength
High-tonnage crane rental	Grow rentals with power and renewable projects	Rental up 56% in H1; renewables and power over half of rental revenue	Ongoing	Strong
New cranes	Nine machines deployed in Q3	Bought; commissioning now	Q3-Q4 FY27	Moderate
Company growth	25-30% in FY26, 20-25% in FY27	FY26 up 13%; FY27 now lower end	FY27	Weak
Warehousing	Renewed growth in FY27	Back to profit, still down on a year ago	FY27	Weak

3b. Trigger check

Trigger type	Yes/No	What was said (date)
Debt cut	No	Debt at ceiling
New business	No	
Margin up	No	Margin below last year
New management	No	
New capacity	Yes	Nine heavy cranes added in H1, mostly commissioned in Q3 (30 Oct 2026)
Big orders	Yes	Order book Rs 164 cr, executable within FY27 (30 Oct 2026)
Turnaround	No	
Promoter buying	No	

The single concrete driver: New 800-900 tonne cranes for power and renewable projects, rented at high margins, coming into service in Q3.

3c. Margin bridge

EBITDA margin is 34.7% against 39% a year ago. Monsoon rain slowed the low-margin specialised service projects, and the warehousing base shrank after the Vizag contract ended. Management expects the gap to narrow as new cranes deploy. (one-off)

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
May 2025	FY26 revenue growth 25-30%	Total income up 13%	Missed
Jan 2026	Q4 FY26 revenue above Rs 100 cr	Missed; about Rs 10 cr slipped into Q1	Missed
May 2025	Renewables 15-20% of rental	Over half with power by H1 FY27	Delivered
May 2026	Receivables back to about 80 days	Still well above	Missed
May 2026	FY27 growth 20-25%, margin 37-38%	Lower end of growth, margin cut to about 35%	Partly

Narrative drift: The crane rental story is steady and the shift to power and renewables has worked. But revenue targets have missed two years running and each call trims the guide. Management is open about the misses.

5. Bottom line

Durable earning trigger? → YES

Crane rental is growing fast at high margins with new heavy cranes arriving. The rest of the business and the balance sheet hold it back.

Management consistent? → MAYBE

The strategy holds, but growth, margin and receivable targets keep missing.

6. Checkpoints for next quarter

- New heavy cranes deployed and earning by Q3
- Full-year revenue growth reaches at least the lower end of the guide
- Receivable days start to fall
