Lumax Auto Technologies Ltd

Concall Tracker: reading the earnings calls to judge the earning trigger and management consistency

Report date: 6 Nov 2026 | Quarter: Q1 FY27 (Apr-Jun 2026) | Screener: LUMAXTECH | BSE 532796 | Builds on the Q4-2026 report

1. Snapshot

What it does: Lumax is an auto-parts maker that supplies vehicle companies (Mahindra, Maruti Suzuki, Bajaj, Tata, Honda two-wheelers), not the public, plus a spare-parts business. Its plan is to earn more per vehicle by moving into higher-tech parts through joint ventures and buyouts: plastic interiors and cockpits, gear shifters, CNG fuel kits, sensors, antennas and telematics.

Number	Value	Plain read
Market value	₹15,876 cr	What the stock market values the whole company at today.
Revenue, Q1 FY27	₹1,364 cr	Sales for Apr-Jun 2026, up 33% on last year. Another big quarter on top of FY26's record.
Operating profit (EBITDA), Q1	₹205 cr, 15.1% margin	Profit before interest, tax and depreciation, up 51%. About 15 paise of each sales rupee, the highest it has run.
Net profit, Q1	₹99 cr	Up 83% on last year. Profit grew more than twice as fast as sales.
Order book	₹1,600 cr	Yearly sales from new business already won but not yet running, up from ₹1,450 cr. Most of it starts in FY28.
Debt to equity	0.32	Long-term debt of ₹508 cr is about a third of shareholders' money, with ₹415 cr of free cash on hand. Comfortable.
P/E	56.4	The share price is about 56 times a year's profit, near its 52-week high. Expensive.

2. Concall coverage

Quarter	Call date	How it was read
Q1 FY24 to Q3 FY26 (11 calls)	Aug 2023 - Feb 2026	Carried forward from the Q4-2026 report
Q4 FY26 (prior boundary)	1 Jun 2026	Read in the Q4-2026 report
Q1 FY27	**11 Aug 2026**	**Newly deep-read in full ★**

Only the Q1 FY27 call was read in full this time. The backstory comes from the prior report. The Q2 FY27 call (Nov 2026) is out of scope for this report.

★ Latest concall highlights: Q1 FY27 (call held 11 Aug 2026)

- **Strong start.** Revenue ₹1,364 cr (+33%), EBITDA ₹205 cr (+51%) at a 15.1% margin, profit ₹99 cr (+83%). Industry production was up 22% helped by lower GST, so part of this is the market.
- **Guidance held, not raised.** Still ~20% growth a year over FY27-28 and ~15% margin for FY27, ~15.5-16% in FY28. Management warned growth will slow in the second half because last year's post-GST surge makes the base much higher.
- **New wins.** Order book up to ₹1,600 cr. Mahindra signed on as a new CNG-kit customer (new Nashik plant). First advanced electronics product (a body control module) launched. A telematics order with the top four truck makers is close.
- **Soft spots.** Spare-parts sales grew only 6% because Lumax had to pass on price hikes that rivals absorbed. CNG-kit margin of 23% included a one-off ~₹3 cr tooling gain; normal is 19-20%.
- **Tone:** confident and measured. They pushed back on analysts' bigger numbers and clarified that "20% margin" is a direction, not a target; 17-17.5% would make them "fairly happy".

Business mix & capacity

India vs exports: not broken out; exports are small and mostly indirect through vehicle makers. Effectively an India-demand story.

By division (Q1): advanced plastics ₹769 cr (+47%, ~56% of sales), structures and controls ₹220 cr (+21%), CNG kits ₹111 cr (+17%), spare parts ₹104 cr (+6%), mechatronics ₹84 cr (+56%, only 6-7% of sales so far).

Capacity: no group utilisation figure given. FY27 capex plan ~₹300 cr (only ₹23 cr spent in Q1), mostly for a big Manesar mechatronics plant due in Q3 that brings four JVs under one roof, and a new Chakan plant for Mahindra interiors.

Since our last report (builds on Q4-2026 report, call of 1 Jun 2026)

Prior verdicts: earning trigger **YES**, management consistent **YES (with caveats)**.

Prior read	What we said then	What the new call shows	Movement
Trigger: YES	More tech content per vehicle, already in the numbers	Sales +33%, margin at a new high, order book up to ₹1,600 cr	**Confirmed**
Consistency: YES (caveats)	Beat targets; guidance swings; dividend cut	Held guidance despite a hot quarter, honest about the second-half slowdown and one-offs	**Confirmed**
Margin toward 15%	FY26 14.5%	15.1% in Q1; ~15% guided for FY27	**Improving**
Mechatronics as growth leg	+150% in FY26	+56% in Q1; ~₹400 cr expected this year, ~₹1,000 cr by FY30-31	**On-track**
CNG kits (Greenfuel) ramp	₹383 cr in FY26	+17%, Mahindra won as a new customer	**On-track**
Spare-parts growth	Finally +15% in FY26	Only +6% in Q1; full-year goal "intact"	**Slipping**
Dividend payout	Cut sharply in FY26	Not discussed on the call	**Unresolved**

Verdict change: both verdicts unchanged.

3. Earning Trigger thesis ★

Lumax isn't waiting for car sales to grow. It keeps adding pricier parts per vehicle (interiors, CNG kits, sensors, antennas, electronics) and winning more of each customer's spend. That's still working: the plastics arm grew 47%, Maruti business grew 48%, Bajaj sales jumped on new frames, and roughly a quarter to a third of the new order book is brand-new technology that carries better margins. The aim is ~₹10,000 cr of revenue by FY31.

Trigger	What management said	Evidence so far	Horizon	Strength	Change since last report
More content per vehicle / wallet share	~20% growth a year to ₹10,000 cr by FY31	Q1 +33%; order book ₹1,600 cr	To FY31	**Strong**	Unchanged
Mechatronics (sensors, telematics, ECUs)	~₹400 cr FY27, ~₹1,000 cr by FY30-31; 14-15% margin in 12-24 months	+56%; order book ~₹400-500 cr; BCM launched	Medium-long	**Strong**	↑ new product launched
CNG kits (Greenfuel)	18-20% margin; localisation gains	+17%; Mahindra won	Medium	**Moderate**	↑ new customer
Margin expansion	~15% FY27, 15.5-16% FY28, ~₹1,000 cr EBITDA FY28	15.1% in Q1	To FY28	**Strong**	↑ ahead of last year
Spare parts	15%+ growth with new retail push	+6% in Q1	FY27	**Weak for now**	↓ soft quarter

4. Management Consistency scorecard

Period	What was promised	What actually happened	Verdict
FY25-26 (prior report)	~20% growth, then raised to 30% in FY26	FY25 +29%, FY26 +34%	**Delivered**
Jun 2026	~20% growth for FY27	Q1 +33%; guidance held, H2 slowdown flagged	**On track**
Jun 2026	Margin toward 15%	15.1% in Q1	**Delivered so far**
FY26	Finish IAC and Greenfuel mergers, exit loss-making JV	Done; only one small JV still slightly loss-making at PBT	**Delivered**
Jun 2026	FY27 capex ~₹275-300 cr	₹23 cr in Q1; ₹300 cr still guided, Manesar plant due Q3	**Too early**
Jun 2026	Spare parts keeps growing double digits	+6% in Q1	**Partly**
Earlier years	Alps Alpine JV to ₹500 cr	Date slipped FY29 → FY31 (not updated this call)	**Partly**

Narrative drift: none worth flagging. It's the same "more tech per vehicle, become a system supplier" story it has told for years, and this call added proof rather than new promises. What we liked: after a 33% quarter they didn't raise guidance, they called out the one-off in CNG margins themselves, and they walked back analysts' reading of a 20% margin goal. The open sore from last time, the dividend cut, simply didn't come up.

5. Bottom line: two verdicts

Durable earning trigger? → YES (vs last quarter: unchanged)

Nothing new weakened it. Growth, margin and order book all moved up again, a new customer came into the CNG business, and the first advanced electronics product shipped. The honest caveats: Q1 got a lift from a strong industry and a low base, second-half growth will slow, and at about 56 times earnings the stock already prices in a lot.

Management consistent? → YES (vs last quarter: unchanged)

Another quarter where they did what they said and didn't oversell. The caveats from last time haven't gone away: spare parts missed again, some JV timelines have drifted, and the dividend question was never addressed. Steady story, steady delivery.
