Vascon Engineers Ltd

Concall tracker report · Q2 2027 (Sep 2026 quarter) · prepared 11 Nov 2026

1. Snapshot

A building contractor (EPC: engineering, procurement and construction) that puts up hospitals, IT parks, offices and government buildings, plus a smaller real estate arm doing mostly redevelopment and joint-venture housing in Mumbai and Pune. It also holds a large land parcel in Thane.

- Market cap about Rs 726 cr: a small company.
- FY26 sales Rs 949 cr, down 12%: EPC revenue has been stuck near Rs 1,000 cr for two years.
- Operating margin fell from about 12% (FY23) to about 6% (FY26).
- Q2 FY27 consolidated revenue about Rs 252 cr, up 12%; EBITDA Rs 23 cr, up 18%; profit Rs 13 cr, up 14%. H1 revenue Rs 404 cr vs Rs 447 cr a year ago.
- Net debt about Rs 156 cr. Promoters hold only about 30%.

2. Concall coverage

Quarter / source	Date	Read?
Q4 FY24	May 2024	Yes (skimmed)
Q4 FY25	May 2025	Yes (skimmed)
Q2 FY26	Nov 2025	Yes (skimmed)
Q3 FY26	Feb 2026	Yes (skimmed)
Q4 FY26	13 May 2026	Yes
Q1 FY27	Aug 2026	Yes
Q2 FY27	4 Nov 2026 (transcript on company website, filed 11 Nov 2026)	Yes, in full

Seven calls across about two and a half years. The Q2 FY27 and Q4 FY26 transcripts came from the company's website; the rest from Screener.

Latest concall highlights - Q2 FY27 (4 Nov 2026)

- EPC order book about Rs 3,400 cr, about 3.7x FY26 EPC revenue; external book up from Rs 2,387 cr at FY26 end. About Rs 1,200 cr of new orders in H1, including a Qualcomm IT park in Bangalore (Rs 660 cr), RBI and SBI projects and a government hospital in Wardha. Target Rs 1,500-2,000 cr for FY27.
- EPC revenue rose from about Rs 148 cr in Q1 to Rs 251 cr in Q2 as two stuck government projects (Suphal and Sindhudurg) started getting paid again. Qualcomm and SBI work in full flow only from January.
- Real estate bookings Rs 152 cr in H1 vs about Rs 100 cr for all of FY26, led by Tranquil Heights (Powai) and Orchids (Santacruz West). Prakash CHS approvals in; full launch targeted for January. FY27 booking target Rs 250-350 cr.
- FY27 revenue now seen about 5-10% above last year, lower than the Rs 1,200 cr top line targeted in May 2026. EPC growth of 15-20% a year targeted for the next 3-4 years; real estate sales of Rs 1,200-1,500 cr by FY31.
- A Rs 131 cr Reliance Jamnagar order was cancelled after a design change; the Royal Rides order hasn't started in a year and may be dropped from the order book. No movement on the Thane land.

Business mix & capacity

- Domestic vs export: all domestic. Government projects about 60-63% of the order book; management is fine at 50-65%.
- Capacity: not a plant business. Management says bank guarantee limits and execution capability need to grow with orders.

3. Earning trigger thesis

The earnings story is a much bigger EPC order book, now with more private clients like Qualcomm and SBI, plus a real estate arm that is finally selling more. Margins on EPC are about 10%. It looks better than a year ago, but the big new orders only start in earnest in January, government clients have stalled payments before, and Vascon has missed its own targets several years running.

Trigger	What management said	Evidence so far	Time horizon	Strength
EPC order book	Order book 3.7x EPC revenue; Rs 1,500-2,000 cr inflow target	About Rs 1,200 cr won in H1; Q2 EPC revenue up about 70% on Q1	FY27-FY28	Moderate
Real estate redevelopment	Rs 250-350 cr bookings in FY27; Rs 1,200-1,500 cr by FY31	Rs 152 cr booked in H1	FY27-FY31	Moderate: early
Thane land	Medium-term monetisation (said since 2024)	No movement; no revenue expected for at least a year	Unclear	Weak

3b. Trigger check

Trigger type	Yes/No	What was said (date)
Debt cut	No	Cash flows going into 'debt repayment as well as into construction' (real estate), but no target
New business	No	Real estate is an existing segment
Margin up	No	EPC margin about 10% vs 9%; no structural change claimed
New management	No	Raveesh Rao joined as CEO of the real estate segment (not CEO/MD/CFO); background not given
New capacity	No	Not applicable
Big orders	Yes	Order book about Rs 3,400 cr, about 3.7x FY26 EPC revenue; Qualcomm IT Park Rs 660 cr (Nov 2026)
Turnaround	No	Not stated
Promoter buying	No	Promoter stake slipped to about 30.4%

Single concrete driver: An EPC order book of about 3.7 times last year's EPC revenue, with new private orders like the Qualcomm IT park and SBI project starting full work from January.

3d. Management changes

Raveesh Rao is CEO of the real estate segment; management said he joined and spent about six months understanding the business before setting the FY31 sales target. His background wasn't discussed on the call. Group CEO and CFO unchanged.

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
FY25 (May 2025)	Order booking target for FY25	Management: 'we did not achieve our order booking target'	Missed
FY26 (Nov 2025)	20% annual growth in EPC; Rs 1,500 cr order target	FY26 sales down 12%; order booking short by about Rs 400-500 cr; EPC Rs 1,100 cr target missed	Missed
May 2024	Thane land a medium-term monetisation	Still no movement in Nov 2026	Slipping
May 2026	FY27 top line about Rs 1,200 cr	Now about 5-10% above last year	Cut
FY27	Rs 1,500-2,000 cr new orders	Rs 1,200 cr by Sep 2026	On track

The strategy is steady (EPC growth, more private clients, asset-light real estate), but the numbers keep falling short of what's said: order targets missed two years running, EPC revenue flat, the FY27 top-line target already lowered, and the Thane land always 'medium term'.

5. Bottom line

Durable earning trigger? → MAYBE

The order book is genuinely bigger and better in client quality, and Q2 execution picked up. But most new orders only ramp up from January, revenue is still below last year for the half, and the order book has included projects that never started.

Management consistent? → NO

Targets have been missed repeatedly: order booking in FY25 and FY26, EPC growth, and now the FY27 top line. Management is candid about the misses, but the record is poor.

6. Checkpoints for next quarter

- Qualcomm and SBI projects in full work by the Q3 call
- Order wins for FY27 reach at least the low end of the inflow target
- Prakash CHS launches in January as planned
