Cubex Tubings Ltd

Concall tracker report · Q2 2027 (Sep 2026 quarter) · prepared 11 Nov 2026

1. Snapshot

Makes copper and copper-alloy products (tubes, rods, strips, flats and wires), including condenser and refrigeration tubes and copper-nickel tubes for desalination plants, for users in power, switchgear, motors, refrigeration, heat exchangers, autos, electrical equipment and shipbuilding.

- Market cap about Rs 279 cr: a small company.
- FY26 total revenue Rs 296 cr, up 10%; net profit Rs 7.45 cr, up 12%: thin margins, as with most metal processors.
- Operating margin about 2-4% for years, then 8.6% in the Sep 2026 quarter: a sharp, unexplained jump.
- Sep 2026 quarter: sales Rs 83 cr, up 12.6%; net profit Rs 4.57 cr vs Rs 1.74 cr a year ago.
- Borrowings about Rs 44 cr, up from Rs 10 cr in FY21. Promoters hold 44.4%, unchanged.

2. Concall coverage

No concall transcripts were available on Screener. This report is based on a global web deep-dive: the FY26 annual report's Management Discussion (via indiainfoline), FY26 results coverage (whalesbook) and Sep 2026 quarter results (jmfinancialservices, Capital Market data), plus Screener financials.

Quarter / source	Date	Read?
FY26 annual report, Management Discussion	2026	Yes
FY26 results (board approval 15 May 2026)	May 2026	Yes
Sep 2026 quarter results	23 Oct 2026	Yes
Screener financials to Sep 2026	Nov 2026	Yes

About a year of public filings and no calls, so there's no guidance to test.

Latest update highlights (results and annual report)

- Sep 2026 quarter: revenue Rs 83 cr, up 12.6%; operating margin 8.6% vs 4.4% a year ago; net profit Rs 4.57 cr, up about 163%. No reason given.
- The Mar 2026 quarter had an operating loss on Screener's numbers, and the Dec 2025 quarter's profit was helped by other income, so margins swing a lot.
- FY26 annual report: plans to expand capacity for specialised copper-nickel tubes for Middle East desalination plants, later Europe and the USA; says it's the only Indian maker of this tube type. A 'major capex plan' is planned but funding isn't finalised.
- The report sees demand for copper alloy tubes rising with power generation and says India is short of condenser and refrigeration tube capacity.

Business mix & capacity

- Domestic vs export: not disclosed; the annual report talks of 'huge export potential'.
- Capacity: installed capacity and utilisation are not disclosed.

3. Earning trigger thesis

The only named driver is a planned expansion in copper-nickel tubes for desalination plants, aimed at exports, with a capex plan whose funding isn't decided. Nothing of it is in the numbers yet. The latest quarter's margin jump is big but unexplained, and copper prices drive this business.

Trigger	What management said	Evidence so far	Time horizon	Strength
Copper-nickel desalination tubes	Expand capacity; target Middle East, then Europe and USA (FY26 annual report)	Plan only; funding not finalised	2+ years	Unproven
Power-sector demand	Demand for copper alloy tubes to rise with power generation	Sales up 10% in FY26, 12.6% in Sep 2026 quarter	Ongoing	Weak: general
Margin	Not explained	8.6% in Sep 2026 quarter vs 2-4% historically	Unclear	Unproven

3b. Trigger check

Trigger type	Yes/ No	What was said (date)
Debt cut	No	Not stated; borrowings up
New business	Yes	Plans to expand copper-nickel tubes for Middle East desalination plants, later Europe and the USA (FY26 annual report)
Margin up	No	Margin jumped in the numbers but no reason was given
New management	No	Not stated
New capacity	No	A capex plan is mentioned but not started or funded
Big orders	No	No specific orders named
Turnaround	No	Not applicable
Promoter buying	No	Promoter stake flat at 44.4%

Single concrete driver: A planned capacity expansion in copper-nickel tubes for desalination plants abroad, which the company says no other Indian maker produces.

3c. Margin bridge

Operating margin was 8.6% in the Sep 2026 quarter against 4.4% a year ago, after an operating loss in the Mar 2026 quarter. The company gives no reason; in copper products, inventory gains and losses on copper prices often swing margins (one-off until shown otherwise).

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
FY26 annual report	Expand copper-nickel desalination tube capacity; major capex plan	Funding not finalised; nothing started	Too early
FY26	Grow on power-sector demand	Revenue up 10%, profit up 12%	Delivered

With no calls and no targets, there's little to hold management to. The annual report names one specific plan, but without dates, amounts or funding.

5. Bottom line

Durable earning trigger? → MAYBE

The desalination tube plan is specific and could matter, but it's only a plan with no funding, and the recent margin jump has no explanation.

Management consistent? → MAYBE

No calls and no guidance, so there's no record to judge. Results have grown steadily, but the margin swings quarter to quarter.

6. Checkpoints for next quarter

- December quarter margin stays well above the old 2-4% range
- Funding and a timeline for the desalination tube capex are announced
- December quarter sales are higher than a year ago
