Tanla Platforms Ltd

Concall Tracker · Q2 2027 · first report

1. Snapshot

Hyderabad company that sends business messages (SMS, WhatsApp, RCS) for over 3,200 enterprises such as banks through its Karix arm, and sells software platforms to telecom companies, like Wisely.ai, which blocks spam and scam messages. It earns a thin margin on each message sent for enterprises and a very high margin on its platform licences.

Number	Value	What it means
Market cap	Rs 9,216 cr	What the market values the whole company at (Screener).
Q2 FY27 revenue	Rs 1,352 cr	Sales for July to September 2026, up about a quarter on last year and a tenth on the June quarter.
Q2 FY27 profit after tax	Rs 146 cr	Up about a sixth on last year, slower than sales because margins slipped.
EBITDA margin	15.9%	Operating profit per Rs 100 of sales, down from 16.5% a year ago. It's been sliding since FY22, as investors on the calls kept pointing out.
Cash	Rs 1,447 cr, zero debt	A big cash pile and no borrowings, so the balance sheet is very safe.
Platform share of revenue	7.7%	The high-margin software side is still a small slice; most sales are low-margin messaging.

2. Concall coverage

Quarter	Date	Transcript read?
Q1 FY25	Jul 2024	Yes (key passages)
Q2 FY25	Oct 2024	Yes (key passages)
Q3 FY25	Jan 2025	Yes (key passages)
Q4 FY25	Apr/May 2025	Yes (key passages)
Q1 FY26	Jul 2025	Yes (key passages)
Q2 FY26	Oct 2025	Yes (key passages)
Q3 FY26	Jan 2026	Yes (key passages)
Q4 FY26	27 Apr 2026	Yes, read in full
Q1 FY27	22 Jul 2026	No transcript or call recording filed. Shareholder letter, press release and presentation read instead
Q2 FY27	27 Oct 2026	No transcript or call recording filed. Shareholder letter and press release read in full ★

Eight earnings calls across two years (Jul 2024 to Apr 2026), plus the two latest shareholder letters. For Q1 and Q2 FY27 Screener shows a presentation but no transcript, and the NSE filings carry no call transcript or audio link, so the latest read comes from the company's own shareholder letters, not a call.

Latest update highlights: Q2 FY27 shareholder letter (27 Oct 2026)

- Revenue Rs 1,352 cr, up 25.3% on last year and 10.2% on the June quarter; profit Rs 146 cr, up 17.1%. Sales grew sixth quarter in a row, but profit grew slower than sales.
- Enterprise messaging grew 27.2% on last year. WhatsApp volumes doubled both on the quarter and on the year as companies move their message budgets to it. The biggest customers (over Rs 50 cr a year each) grew 42.5% and now bring nearly 43% of revenue, led by banks.
- ValueFirst's overseas business (Middle East and Southeast Asia) was bought and added Rs 28.5 cr in two months. It runs at lower profit, which pulled EBITDA margin down to 15.9%.
- The platform side grew only 6.4%, 'below our expectations'. The delay in India's consent rules held back the Consent platform. RCS pricing changed sharply from September 2026 and was a partial drag.

- Free cash flow Rs 232 cr (158% of profit), cash Rs 1,447 cr, no debt, Rs 6 interim dividend. Tone: confident on enterprise, frank that margins and the platform side need work.

Business mix & capacity

Domestic vs export: Not broken out as domestic vs export. Most revenue is Indian enterprise messaging; the ValueFirst purchase adds Middle East and Southeast Asia customers, and Wisely.ai runs at Indosat in Indonesia.

Capacity use: Not applicable. It's a software and messaging business, not a plant. Capex runs at about Rs 100-150 cr a year, which management confirmed in the Apr 2026 call.

3. Earning Trigger thesis

The trigger is the shift of enterprise messaging from plain SMS to WhatsApp and RCS. Tanla is the biggest RCS partner of Google and a Meta growth partner, and banks and other large customers keep giving it a bigger share of their message budgets. That growth is now clearly in the numbers: six straight quarters of rising sales and EBITDA growing at about the 20% a year management aimed for in Jul 2025. The second story, high-margin platforms (Wisely.ai anti-scam, Trubloq, Consent), keeps being called the future but is still under a tenth of sales and grew slowly. The catch is that messaging margins are thin and set by Meta and telcos, so overall margin keeps slipping.

Trigger	What management said	Evidence so far	Time horizon	Strength
WhatsApp/RCS shift in enterprise messaging	OTT channels becoming the preferred medium (Oct 2024); WhatsApp demand strong (Jan 2026)	Enterprise revenue +27.2% YoY in Q2 FY27, WhatsApp volumes doubled	Now	Strong, showing in sales
20% EBITDA CAGR over two years	'Aspire to grow at 20% CAGR from an EBITDA perspective' (Jul 2025)	H1 FY27 EBITDA Rs 415 cr vs Rs 341 cr, up about 22%	FY26-FY27	Moderate, on track so far
Platform business (Wisely.ai, MaaP, Consent)	Platform 'would play a story for us for FY26 and beyond' (Apr 2025); a 'gigantic platform' to launch in Q1 FY27 (Apr 2026)	Grew 6.4% in Q2 FY27, below expectations; Consent held up by regulation; no new launch announced in the letters	FY27-FY28	Weak, keeps slipping
ValueFirst acquisition	Approvals awaited since 2023, no date given (Jan 2025)	Overseas part completed in Q2 FY27, Rs 28.5 cr revenue in two months, lower margin	Now	Moderate, adds sales not margin

3b. Trigger check

Trigger type	Yes/ No	What was said (date)
Debt cut	No	Already debt-free; nothing to cut.
New business	Yes	ValueFirst overseas acquisition completed, adding Middle East and Southeast Asia (Q2 FY27 letter, Oct 2026).
Margin up	No	EBITDA margin fell to 15.9% from 16.5%; management says improving operating leverage 'continues to be a priority' (Oct 2026).
New management	No	No change named. Uday Reddy remains Founder Chairman and CEO.
New capacity	No	Not a plant business.
Big orders	No	No order book given. Large bank deployments of Wisely.ai cited as case studies only.
Turnaround	Yes	Revenue went from flat or slightly falling in FY25 to six straight quarters of growth (Q2 FY27 letter: 'growth momentum we have sustained over the past six quarters').
Promoter buying	No	Not mentioned. A Rs 175 cr buyback was announced in Jul 2025.

The single concrete driver: Enterprises moving their message spend to WhatsApp, where Tanla's Karix arm is growing far faster than the market, with large bank customers leading.

3c. Margin bridge

EBITDA margin is 15.9% now versus 16.5% a year ago and 17.5% two years ago (Q2 FY25). Gross margin dipped because more of the mix came from low-margin enterprise messaging, the newly bought ValueFirst overseas business runs at lower profit, and the company keeps spending on sales teams, marketing and new platforms. Management says it wants margins to improve with scale but gave no target. The acquisition drag may ease, but the mix pressure looks set to stay (lasting).

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Jul 2024	RCS platform live, revenue from Q2, 'meaningful by end of this financial year'	RCS is growing, but by Oct 2026 the price change made it a partial drag; still a small part of sales	Partly
Jan 2025	ValueFirst approvals from RBI and regulators, no date	Overseas part completed only in Aug-Sep 2026, three years after the 2023 announcement	Partly
Apr 2025	Gross margin held in a 25-27% band; pricing bottomed out	Gross margin stayed between 25.0% and 27.6% every quarter since	Delivered
Apr 2025	Platform to drive the story for FY26 and beyond	Platform revenue grew single digits in FY26 and 6.4% in Q2 FY27, 'below our expectations'	Missed
Jul 2025	20% EBITDA CAGR over two years	EBITDA up about 22% in H1 FY27 on last year	Delivered so far
Apr 2026	Launch 'one gigantic platform this quarter'	No such launch named in the Q1 or Q2 FY27 letters	Missed
Apr 2026	EBITDA margin to hold or improve as sales-team spend bears fruit	Margin slipped to 15.9% in Q2 FY27	Missed

Narrative drift: The enterprise story has stayed the same for two years and is now delivering. The platform story keeps getting pushed out: first RCS, then Wisely.ai, then Consent, then an unnamed 'gigantic platform', each one promised to lift the high-margin side, and that side still grows slowly. The company has also stopped publishing call transcripts for the last two quarters, leaning on written shareholder letters, which gives investors less chance to question it.

5. Bottom line

Durable earning trigger? → YES

Enterprise messaging on WhatsApp is a real, named driver that is already in the results: sales have grown six quarters in a row and EBITDA is growing at the pace management set. It is a low-margin driver though, and the high-margin platform side isn't pulling its weight yet.

Management consistent? → MAYBE

They hit the EBITDA aspiration and kept gross margin in the band they promised. But platform promises keep slipping, the ValueFirst deal took three years, the 'gigantic platform' hasn't shown up and margins went the wrong way. Mixed record.

6. Checkpoints for next quarter

- Platform revenue grows faster than in Q2 FY27
- EBITDA margin climbs back above sixteen percent
- ValueFirst overseas business adds a full quarter of sales with better profit
