Gujarat Kidney & Super Speciality Ltd

Concall Tracker, Q2 2027 · NSE: GKSL · BSE: 544666 · written 6 Nov 2026 · builds on our Q1-2027 report · web deep-dive plus the Q2 FY27 investor presentation (first earnings call held 5 Nov 2026, transcript not yet published)

This is not investment advice. Do your own due diligence.

> **Plain-word key. Standalone**: the parent company's own original hospitals only. **Consolidated (group)**: parent plus the hospitals it has bought stakes in. **EBITDA**: operating profit before interest, tax and depreciation. **Occupancy**: share of beds filled on an average day. **IPO**: the company's first sale of shares to the public, in December 2025.

1. Snapshot

A chain of mid-sized hospitals in central Gujarat (Vadodara, Godhra, Anand, Borsad, Bharuch, Ankleshwar, Ahmedabad), rooted in kidney care and urology. It grows mainly by buying controlling stakes in local hospitals with its IPO money. This quarter it also stepped outside India with a Dubai clinic.

Number	Value	What it means
Market value	₹1,216 cr	What the market says the company is worth (share price ₹156; IPO price was ₹114).
Q2 FY27 group sales	₹38.1 cr	Jul-Sep 2026. Almost three times last year's ₹12.9 cr and up 11% on June. Nearly all of the jump is bought hospitals.
Q2 FY27 group EBITDA	₹10.2 cr	About double last year's ₹5.1 cr. Unlike last quarter, profit moved with sales this time.
Group operating margin	26.8%	₹27 of operating profit per ₹100 of sales. Up from 24.4% in June, still far below 39.6% a year ago.
Q2 FY27 group profit after tax	₹6.6 cr	Up 129% on last year's ₹2.9 cr and 24% on June. First real profit growth since the buying spree started.
Parent's own sales	₹8.0 cr	The original hospitals alone, down 17% on last year. Third quarter in a row of shrinking or slipping.
Net cash (Sep 2026)	~₹15 cr	Cash ₹32 cr against ₹17 cr of borrowing (leases excluded). Down from about ₹56 cr of cash and bank in March, as money went into deals.

Group figures from the company's Q2 FY27 investor presentation (unaudited, limited review) and Screener.in's consolidated table, which match. Parent figure from Screener.in's standalone table. Market value from Screener.in today.

2. Coverage

No concall transcripts were available on Screener — this report is based on a global web deep-dive. One change matters: GKSL held its **first-ever earnings call on 5 Nov 2026**. Only the audio recording and the investor presentation are out so far. The written transcript hadn't been filed when this was written, so the call's Q&A is not covered here. The next report should read it.

Sources used:

- Q2 FY27 investor presentation filed with BSE/NSE on 4 Nov 2026 (33 pages, read in full) and its re-filed copy of 5 Nov.

- Screener.in consolidated and standalone quarterly tables and filing list (results, call notice, audio recording, statement of deviation for IPO money, 4-5 Nov 2026).

★ Latest update highlights: Q2 FY27 (results and presentation, 4 Nov 2026)

- **Profit finally followed sales.** Group sales ₹38.1 cr (+195% on a year ago), EBITDA ₹10.2 cr, profit ₹6.6 cr (+129%). Last quarter sales doubled and profit stood still, so this is a real change.
- **Margin crept up.** 26.8% from 24.4% in June. The company says other costs fell while revenue grew. Staff costs jumped 47% in one quarter as it hires doctors for the bigger network.
- **Network nearly doubled.** Eleven hospitals now (from about seven) with 700 beds, 690 running, up from roughly 490 beds and 340 running. New names: Patel Multispeciality in Ankleshwar (51%), Apex 1 and Apex 2 in Bharuch. About ₹16.7 cr went into acquisitions in the half-year.
- **Dubai.** Bought 51% of a Dubai polyclinic (Blue Tree Clinics, about ₹20-25 cr a year in sales) and is buying the rest. Pitched as a medical-tourism funnel into the Gujarat hospitals.
- **The old hospitals are still shrinking.** Parent sales ₹8.0 cr, down 17% on last year.
- **First call held.** A real step on disclosure, though the transcript isn't out. Still no CEO named that we could find.

Business mix & capacity

India vs abroad: still nearly all domestic. The Dubai clinic adds a small overseas slice from this quarter (its yearly sales are roughly a seventh of the group's current yearly run). Read: a Gujarat business with a small toe in Dubai.

Capacity: 700 beds, 690 running, occupancy steady at about 55% with patients staying about six days on average. Read: nearly half the beds sit empty on a normal day, so there's lots of room to grow without building anything. Filling them is the job.

★ Since our last report

Builds on the Q1-2027 report (written 6 Nov 2026, covering Apr-Jun 2026 and news to 30 Sep 2026). Prior verdicts: trigger **MAYBE**, management **MAYBE**.

Prior read	What we said then	What's new	Movement
Trigger: MAYBE	Sales without profit; growth bought	Profit up 24% on the quarter and margin up. Still bought growth	Improving
Management: MAYBE	No CEO, no guidance, no calls	First earnings call and a detailed presentation. CEO still not named	Improving (slightly)
Own hospitals shrinking	Parent sales -19%	Parent sales -17%	Unchanged (still bad)
Thin margins at bought hospitals	Group margin 24%	26.8%	Improving
Deploy leftover IPO cash	No new deal Jul-Sep found	Three new Gujarat hospitals plus Dubai; IPO-money statement shows an "approved variation"	Confirmed, with a new direction

Occupancy not disclosed	Couldn't judge	~55%, flat		Now visible

Verdict change: both stay MAYBE. The trigger is less weak than last quarter because profit grew, but it's still growth bought with IPO money while the original hospitals shrink.

3. The earnings trigger

Same plan as at the IPO: buy controlling stakes in local hospitals and run them as one network with shared doctors, diagnostics and pharmacies. This quarter it finally showed a little operating leverage, with profit up faster than sales on the quarter. The other side of the story is that the founder's own hospitals keep shrinking, and nearly half the beds are empty. The Dubai buy is a new angle, not something promised at the IPO.

Driver	What the record says	Evidence so far	Horizon	Strength	Change since last report
Buy hospitals with IPO cash	Asset-light: lease or take majority stakes	11 hospitals, 700 beds; group sales nearly tripled	Now-2 yrs	Moderate	↑ profit now growing too
Fill the empty beds	More specialities and equipment to lift revenue per bed	Occupancy flat ~55%	1-3 yrs	Unproven	new (first disclosure)
Kidney and urology core	Specialist reputation draws patients	Parent sales down 17%	Ongoing	Weak	unchanged, still shrinking
Dubai polyclinic	Gateway for medical-tourism patients	51% bought; rest in process	2-3 yrs	Unproven	new this quarter

4. Has management been consistent?

Still judged from the public record. The first call's transcript isn't out yet.

Period	What was promised or stated	What actually happened	Verdict
IPO (Dec 2025)	Use IPO money to buy and build hospitals in Gujarat	Several deals done; IPO uses changed via postal ballot; Dubai added	Partly
FY22-FY24 (carried forward)	Clean pre-IPO accounts	Had to revise three years of reports through the company-law court	Missed
Feb-Mar 2026 (carried forward)	Follow stock-exchange disclosure rules	Board had to ratify actions after a rules slip-up	Missed
May 2026	Appoint a CEO	No appointment found by early Nov	Slipping
Q2 FY27	Scale lifts margins	Margin up on the quarter; profit +24% on the quarter	Partly
Disclosure	(Nothing promised)	First earnings call and a detailed deck with occupancy data	Better than expected

Has the story drifted? The core story (buy and integrate in central Gujarat) is steady. Dubai is a stretch away from the "central Gujarat" pitch, and the IPO money keeps finding uses that weren't in the original plan. Small things in the deck are sloppy too: its disclaimer still talks about a coming IPO, and the staff figure is dated a year back. Not alarming on their own, but it fits a pattern of a company still learning to be listed. The first earnings call is the most useful thing it has done for shareholders yet.

5. Bottom line

Durable earning trigger? → MAYBE vs last quarter: unchanged (leaning better)

What moved it: profit grew this time, not just sales, and margins ticked up. That's what we said was missing. But it's one quarter, the growth is still bought with IPO cash, the original hospitals shrank again, and half the beds are empty. It becomes a YES if group margins keep rising and the parent hospitals stop shrinking.

Management consistent? → MAYBE vs last quarter: unchanged

A step forward on disclosure with the first earnings call and occupancy numbers. Against that, still no CEO six months after the search started, the IPO money keeps being re-pointed, and the move into Dubai wasn't part of the original pitch. The earlier restatement still hangs over it. Read the call transcript once it's out before changing this.

Built from the Q2 FY27 investor presentation and public sources up to 6 Nov 2026; the 5 Nov call transcript was not yet available. Figures rounded. Not investment advice.
