Butterfly Gandhimathi Appliances Ltd

Concall tracker report · Q2 2027 (Sep 2026 quarter) · prepared 11 Nov 2026

1. Snapshot

A Chennai-based kitchen appliance brand: mixer grinders, pressure cookers, gas stoves, wet grinders and small appliances, strongest in South India. Crompton Greaves Consumer Electricals owns 75%; a plan to merge it into Crompton was voted down by public shareholders in 2023, so it stays a separate listed company.

- Market cap about Rs 1,042 cr: what the market values the whole company at.
- FY26 sales Rs 943 cr, up 9%, after two years of decline (FY24 and FY25): back to growth but still below FY23's Rs 1,057 cr.
- FY26 EBITDA Rs 80 cr, margin 8.5%, up 0.9 points; profit Rs 46 cr, up 40%.
- Sep 2026 quarter: revenue Rs 331 cr, up 13%, profit Rs 20 cr, up 19%; EBITDA margin about 10%.
- Promoter (Crompton) holds 75%, unchanged.

2. Concall coverage

No usable concall transcripts: the last call on Screener was in 2021 and later entries are only presentations. This report is a global web deep-dive: the company's results press releases for Q4 FY26 and Q2 FY27 (via freepressjournal, dtnext), merger coverage from 2023 (businesstoday, dtnext), and Screener financials.

Quarter / source	Date	Read?
Merger vote with Crompton (rejected)	Oct 2023	Yes
Q4 FY26 and FY26 results press release	May 2026	Yes
Q2 FY27 results press release	15 Oct 2026	Yes
Screener financials to Sep 2026	Nov 2026	Yes

No calls since 2021, so there's no guidance to test; the consistency read is limited to what the press releases said.

Latest update highlights (Q2 FY27 press release, 15 Oct 2026)

- Revenue Rs 331 cr, up 13.1%; EBITDA Rs 32 cr, up 13.3%; profit Rs 20 cr, up 18.7%. First-half profit up 24%.
- Material margin down 1.6 points to 36.2% because of commodity inflation.
- Highest-ever quarterly revenue in retail channels.
- Launched what it calls India's first 5-star rated cooktop (Renz Pro); its Unicurve Triply pressure cooker won an award.
- Chief Business Officer Swetha Sagar pointed to brand investment, innovation, premium products and wider geographic reach, and a strong start to the festive season including Onam.

Business mix & capacity

- Domestic vs export: reported as a single domestic appliances segment; no export split given.
- Capacity: plant utilisation not disclosed.

3. Earning trigger thesis

The story is a recovery after two bad years, driven by a brand refresh, new product series (the 'Idea First Series'), premium products and cost control. Sales and margins are moving up again. But it's a slow climb, sales are still below FY23, and commodity costs are squeezing material margins. With no calls, the only voice is the press release.

Trigger	What management said	Evidence so far	Time horizon	Strength
Brand refresh and new products	FY26: restructuring, innovation roadmap, brand refresh; 'Idea First Series' a big contributor	FY26 sales up 9%, Q2 FY27 up 13%	Ongoing	Moderate
Margin from cost control and scale	FY26: cost optimisation and operating leverage	FY26 EBITDA margin up 0.9 points; Q2 FY27 about 10%	Ongoing	Moderate
Premium products	5-star cooktop, triply cookers	Too early to see in numbers	1-2 years	Unproven

3b. Trigger check

Trigger type	Yes/ No	What was said (date)
Debt cut	No	Not stated
New business	No	New products within existing categories only
Margin up	Yes	FY26 EBITDA margin up 90 basis points on 'cost optimisation and operating leverage' (May 2026 press release)
New management	No	Not stated
New capacity	No	Not stated
Big orders	No	Not applicable
Turnaround	No	Not described as one by the company
Promoter buying	No	Crompton stake flat at 75%

Single concrete driver: A brand refresh and new product series bringing sales growth back, with cost control lifting margins.

3c. Margin bridge

EBITDA margin was about 10% in the Sep 2026 quarter, roughly the same as a year ago, and 8.5% for FY26 against 7.6% in FY25. The FY26 gain came from cost optimisation and operating leverage; in Q2 FY27, commodity inflation cut material margin by 1.6 points (lasting, but under cost pressure).

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
FY26 (press releases)	Restructuring, brand refresh, innovation roadmap	Sales back to growth, profit up 40%	Delivered
Q2 FY27	Sustain a healthy growth trajectory	Revenue up 13%, profit up 19%	Delivered so far
2023	Merger into Crompton	Rejected by public shareholders; no plan to retry	Dropped

Since the merger fell through, the message has been simple: rebuild the brand, launch products, control costs. The numbers have followed for about a year and a half. With no calls and no targets, there's little to hold management to.

5. Bottom line

Durable earning trigger? → MAYBE

Growth and margins are recovering on a named plan, but it's early, sales are still below FY23 and commodity costs are biting.

Management consistent? → MAYBE

What the press releases said has broadly shown up, but there are no calls or targets, so the record is thin.

6. Checkpoints for next quarter

- December quarter revenue grows on a year ago after the festive season
- EBITDA margin holds near the September quarter level
- Full-year sales pass FY23's level
