Hindustan Copper Ltd: Concall Tracker

State-owned copper miner · Screener ticker HINDCOPPER · Quarter folder Q1-2027 · Builds on the Q4-2026 report · Latest update read: Q1 FY27 results (10 Aug 2026)

This is not investment advice. Do your own due diligence. NO NEW CONCALL TRANSCRIPT: WEB DEEP-DIVE

1. Snapshot

What the business does: Hindustan Copper is India's only company that both mines copper ore and turns it into copper concentrate (a copper-rich powder) for smelters. It's a Government of India company. Its selling price follows the world copper price on the London Metal Exchange, so profits move with that price and with how much ore it can dig.

Number	Value	Plain read
Q1 FY27 revenue	₹936.5 cr	Up 81% on a year ago (a weak, shutdown-hit quarter) but down 19% from the record March quarter, which is normal: Apr-Jun runs into the monsoon.
Q1 FY27 EBITDA (operating profit before interest, tax, depreciation)	₹507.5 cr	More than double a year ago.
EBITDA margin	54.2%	₹54 of operating profit on every ₹100 of sales, same as last quarter. Management had promised "40% plus" for FY27.
Q1 FY27 net profit	₹352.6 cr	Up 163% on a year ago, down about 21% from the March quarter.
FY26 net profit (full year)	₹921 cr	The record year this report builds on.
Market value / P/E (Screener, at writing)	~₹40,700 cr / ~34	About ₹34 for each ₹1 of yearly profit. Lower than the ~49 at the last report, but still pricey for a miner.

2. Coverage

No new concall transcript was available on Screener, so this update is based on a global web deep-dive. Screener has only ever carried one Hindustan Copper transcript (investor meet, 18 Sep 2025). No transcript for the Q1 FY27 quarter could be found; one data site says the company didn't publish one. The prior report was also web-filled for its latest quarters.

Period	Date	Source
Investor meet + Q3/Q4 FY26 results	Sep 2025 → 15 May 2026	Carried forward from the Q4-2026 report
FY27 guidance comments (CMD)	May 2026	Media coverage of the FY26 results discussion
Q1 FY27 results + investor presentation	**10 Aug 2026**	**Newly read ★** (results filing and media coverage)

Sources: Q1 FY27 results coverage on PSU Watch, NewKerala/IANS, Quartr, Cofacto/CompoundingAI, Arthneeti (investor-presentation summary), Multibagg (FY27 guidance, May 2026), Sahi, Kotak Neo; Screener.in financial tables. Only information published up to 30 Sep 2026 used.

2b. Latest update highlights: Q1 FY27 results (10 Aug 2026)

- **Price-led jump again.** Revenue ₹936.5 cr (+81%), net profit ₹352.6 cr (+163%). Coverage credits higher copper prices and a weak base a year ago when mines were shut for maintenance and expansion work.
- **Seasonal dip.** Versus the March quarter, sales and profit fell about a fifth on monsoon disruption, while margin held at 54%.
- **One new clearance.** Forest clearance for the Chandmari copper mine came on 23 Jun 2026, which helps the Khetri (Rajasthan) side of the expansion.
- **Plan restated, not advanced.** The investor deck repeats the ₹7,189 cr, five-year plan to take ore capacity from about 4.2 to 12.2 million tonnes a year by FY30. A Gujarat copper project with Lohum Materials (revenue share) is slated to start by Q4 FY27.
- **Governance flags.** The auditor's note says the company has had no independent directors since Nov 2024 and no woman director since Mar 2025. A ₹92 cr water-charges claim from Jharkhand sits unprovided.

2c. Business mix & capacity

- **Domestic vs export:** Effectively all sales are in India now; management stopped exporting concentrate because Indian smelters are short of it.
- **Capacity:** Ore capacity about 4.2 million tonnes a year in FY26. FY27 guidance (May 2026): about 4.7 million tonnes of ore and 33,000-34,000 tonnes of metal in concentrate, roughly a quarter more than FY26. Q1 ore output was reported at about 0.97 million tonnes by one source, a slowish start, though the second half is usually stronger.

2d. Since our last report (builds on Q4-2026, results 15 May 2026)

Prior verdicts: **Trigger MAYBE**, **Consistency MAYBE**.

Prior read	What we said then	What's new	Movement
Trigger: triple ore output by FY30	Finally unblocked, years away	Plan repeated; one new forest clearance; no tonnes from new mines yet	On-track (slow)
Profits are price-led	Commodity tailwind, not volume	Same again: price drove the jump; margin flat	Confirmed
Rakha reopening (not before Q4 FY27)	Operator appointed	No public update found	No news
Malanjkhand shaft equipment tender	Slipped once before	No public update found	No news
FY27 guidance (ore ~4.7 MT, margin 40%+)	New	Margin well above; volume not yet clear	On-track

Verdict change: None. Nothing in the quarter proves or breaks the expansion story. The board-composition gap is a new governance point the last report didn't cover.

3. Earning-trigger thesis ★

The trigger is still the plan to roughly triple ore output by FY30 by reopening old Jharkhand mines, equipping the Malanjkhand shafts and using outside mine operators. That would let profits grow on volume, not just on copper prices. Today's numbers are still almost all price.

Trigger	What management said	Evidence so far	Horizon	Strength	Change since last report
Ore to 12.2 MT/yr	₹7,189 cr over five years	Clearances in hand; capex rising this year; no new-mine tonnes yet	FY27-FY30	Moderate	unchanged
FY27 volume step-up	Ore ~4.7 MT, ~25% growth	Q1 slow, monsoon ahead	FY27	Unproven	new
High copper price	Not a management promise	Margin 54%	Now	Strong but not in their control	unchanged

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Many years	Reopen Jharkhand mines, reach 12 MT	Stuck for two decades on clearances	Missed (historically)
FY25-FY26	Clearances, leases, mine operator	All done	Delivered
FY26	Margins above 40%	48% for the year	Delivered
FY27 (May 2026)	Margin 40%+, profit over ₹1,000 cr	Q1 margin 54%, profit ₹353 cr	On-track
Vision 2030	Triple capacity by FY30	Plan repeated, building begun	Too-early

Narrative drift: The direction hasn't changed and recent near-term promises were met. But the company barely talks to investors: one transcript ever on Screener, none for this quarter. That makes it hard to check the big promises call by call, and the missing independent directors don't help.

5. Bottom line: two verdicts

Durable earning trigger? → MAYBE vs last quarter: unchanged

Nothing moved it. The expansion is real and funded, but this quarter's profit was again copper price, not new ore. Until new mines produce, it's a plausible driver, not a proven one.

Management consistent? → MAYBE vs last quarter: unchanged

Short-term targets keep getting met, and the long-stuck paperwork did clear. Against that, the flagship target has a long history of slipping, there's no fresh call to test the promises against, and board governance is thin. Still a MAYBE.

Based on Screener.in financials and a web deep-dive of public results coverage up to 30 Sep 2026. No Q1 FY27 transcript was available. Figures rounded. Not investment advice.
