eMudhra Ltd

Concall tracker · filed under Q2-2027 · 11 Nov 2026

1. Snapshot

eMudhra sells digital identity and security software: digital signature certificates and eSign in India (its 'trust services'), plus its own enterprise platforms such as emSigner, CertiNext (certificate management) and SecurePass, sold to banks, governments and companies worldwide. It owns acquired businesses including CRYPTAS in Europe and Ikon and Two95 International in the US.

- Market cap about Rs 2,999 cr at a P/E of about 73: priced for strong growth.
- Q2 FY27 total income Rs 209 cr, up about 20%; EBITDA Rs 51.3 cr at a 24.5% margin; PAT Rs 33.4 cr, up 26%: a good quarter before the incident.
- H1 FY27 total income Rs 402 cr, up 23%; PAT Rs 65.4 cr, up 27%.
- Enterprise solutions on its own five platforms grew 36% and are now about two-thirds of revenue; international markets are also about two-thirds.
- FY27 guidance cut to about Rs 800 cr revenue and Rs 125 cr PAT, from Rs 825 cr and Rs 137 cr, after a TLS certificate incident in October.
- Operating cash flow was weak in H1 as receivables grew with the business and creditors were paid down.

2. Concall coverage

Screener lists 22 eMudhra transcripts. This report reads the last 12 (Q4 FY24 to Q2 FY27, about three years), with the latest call (5 Nov 2026) read in full and earlier calls read for guidance and what was delivered.

Quarter / call	Date	Transcript read?
Q4 FY24 to Q4 FY25 (6 calls)	Apr 2024 - May 2025	Yes, read for promises
Q1 FY26	25 Jul 2025	Yes
Q2 FY26 to Q4 FY26	Nov 2025 - May 2026	Yes
Q1 FY27	Aug 2026	Yes
Q2 FY27	5 Nov 2026	Yes, read in full

2b. Latest concall highlights: Q2 FY27 (5 Nov 2026)

- On 17 Oct 2026 a researcher reported weak keys in eight intermediate certificates in one public TLS hierarchy. eMudhra revoked them the next day; browsers distrusted the related root. KPMG appointed as external reviewer.
- eMudhra is exiting the sale of publicly trusted TLS (website) certificates, about 1% of revenue. Digital signatures, eSign and the five enterprise platforms are not affected, management says.
- FY27 guidance cut by about Rs 20-25 cr of revenue and Rs 10-12 cr of PAT, mostly in H2. Management expects the hit to last about two quarters.
- New wins: national PKI for Nigeria's certifying-authority regulator, a first Kazakhstan defence client, clients in Indonesia, the Philippines, Germany, Qatar and Abu Dhabi; a first DPDP (data privacy law) deal with an NBFC.
- Trust services (classic digital signatures) seen growing only about 8-10%; eSign volumes up to about 7-8 lakh a day from 1-2 lakh a year ago.

2c. Business mix & capacity

- Domestic about one-third (about Rs 275 cr of an Rs 800 cr year) / international about two-thirds (about Rs 520-525 cr).
- Capacity utilisation: not applicable (software). Planned incremental capex about Rs 23 cr this year, mainly to finish the data privacy product and add AI to emSigner.

3. Earning trigger thesis

The earnings driver is the shift from Indian digital signature certificates to its own enterprise software sold abroad. That shift shows in the numbers: enterprise solutions grew 36% and are now two-thirds of revenue. Next up are data privacy (DPDP) compliance in India and post-quantum certificate migration, both with deadlines that push customers to buy. The October TLS incident costs about two quarters of growth and some reputation in the US and Middle East.

Trigger	What management said	Evidence so far	Time horizon	Strength
Enterprise platforms abroad	Growth from own five product platforms and international markets	Enterprise solutions up 36%, two-thirds of revenue	Now	Strong
DPDP data-privacy stack	Aim for 40-50 clients next year at Rs 40 lakh to Rs 2 cr each	First NBFC deal won	FY28	Unproven
Post-quantum migration	Deadlines around 2029; POCs ongoing	One POC turned into an order	FY28 onwards	Unproven

3b. Trigger check

Trigger type	Yes/ No	What was said (date)
Debt cut	No	Not discussed
New business	Yes	Won national PKI for Nigeria's certifying authority regulator, 'our entry into that market'; first DPDP deal (5 Nov 2026)
Margin up	Yes	'The margins YoY expanded on both lines' (5 Nov 2026)
New management	No	No change announced
New capacity	No	Software business
Big orders	No	Several wins named, no order-book figure given this call
Turnaround	No	Not applicable
Promoter buying	No	Not said

Single concrete driver: eMudhra's own enterprise security platforms, sold mostly outside India, grew 36% and now make up two-thirds of revenue.

3c. Margin bridge

H1 FY27 EBITDA margin was 25.3% and grew faster than revenue (EBITDA up 30% vs income up 23%), helped by the higher-margin solutions business. Management aims to hold about 25% EBITDA margin from here. (lasting)

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
FY25 (Jul 2024 call)	Revenue around Rs 500 cr	FY25 total income Rs 527.8 cr	Delivered
FY26 (Jul 2025 call)	Revenue Rs 675-700 cr, PAT margin about 15.5-16%	FY26 total income Rs 713.2 cr	Delivered
Q1 FY27 call (Aug 2026)	Trust services disruption from FIPS token rules eases from Q3	Token supply resumed mid September; DSC seen flat to slightly up	Too early
FY27 (May/Aug 2026)	Revenue about Rs 825 cr, PAT about Rs 137 cr, 25% PAT growth	Cut to Rs 800 cr and Rs 125 cr after the TLS incident	Missed (cut)

The story has been steady for three years: move up from Indian digital signatures to own platforms sold globally, helped by acquisitions. Two years of guidance were met. This year's cut came from a self-inflicted security lapse, which management quantified quickly and openly. The real worry is reputational in a trust business, not drift in the story.

5. Bottom line

Durable earning trigger? → YES

The shift to enterprise platforms abroad is concrete, named on every call and already two-thirds of revenue, growing fast. DPDP and post-quantum add more runway. The TLS incident dents FY27 but doesn't touch the core platforms, per management.

Management consistent? → YES

Management met FY25 and FY26 revenue guidance and its story hasn't moved. The FY27 cut follows one incident, explained in detail with numbers on the call. A second slip like this would change the view.

6. Checkpoints for next quarter

- Revised full-year revenue guidance of about Rs 800 cr is held
- KPMG review of the certificate incident is completed and shared
- Enterprise solutions keep growing faster than the company as a whole
