EPack Prefab Technologies Ltd

Concall tracker report · Q2 2027 (Sep 2026 quarter) · prepared 11 Nov 2026

1. Snapshot

Makes pre-engineered steel buildings (PEB: factory sheds, warehouses, large industrial structures) and insulated sandwich panels for cold stores and clean rooms, designing, supplying and erecting them for industrial, logistics and renewable customers across India. Listed in late 2025.

- Market cap about Rs 2,069 cr.
- FY26 consolidated sales Rs 1,525 cr, up 35%; net profit Rs 93 cr. Operating margin steady at about 10%.
- H1 FY27 revenue Rs 867 cr, up 19%; Q2 FY27 Rs 501 cr, its biggest quarter ever (call). Profit grew only 2% in H1 and operating cash flow was negative.
- Order book Rs 1,462 cr, about 8-9 months of revenue; H1 order inflow Rs 1,124 cr, up 71%.
- Net cash positive; ICRA A+ rating reaffirmed. IPO money being used for capex.

2. Concall coverage

Quarter	Date	Transcript read?
Q1 FY26 → Q4 FY26 (3 calls)	Oct 2025 → May 2026	Skimmed for guidance and promises
Q1 FY27	3 Aug 2026	Key sections
Q2 FY27	4 Nov 2026	Yes, in full ★

Five calls since listing, about one year.

Latest concall highlights: Q2 FY27 (4 Nov 2026)

- Record revenue, but steel and input costs rose faster than they could be passed on for orders in progress: gross margin down about 2.3 points. EBITDA margin recovered to 10.1% from 9.4% in Q1 as escalations were won on existing orders.
- Working capital rose to about 60 days vs the 40-55 day guidance: Rs 144 cr more receivables (backed by letters of credit, expected to normalise in Q3) and Rs 92 cr of deliberate steel inventory.
- FY27 guidance held: Rs 1,900 cr+ revenue at 10-10.5% EBITDA margin; 25-30% growth aimed for the next couple of years. FY27 order booking target Rs 2,000 cr, Rs 1,124 cr done in H1.
- New capacity: 13,000 tonnes of steel processing and a sandwich panel line commissioned at Ghiloth, Rajasthan on 30 Oct 2026; Gujarat greenfield (50,000 tonnes first phase) due Q4 FY27. Total capacity then supports Rs 2,800-3,000 cr of revenue.
- First data-centre structural steel order coming this quarter.

Business mix & capacity

- Domestic vs export: domestic business; split not given.
- Capacity utilization: prefab division about 75%+ (Q1); Mambattu sandwich panel line rose from about 35% in Q1 to 47-48% in Q2, with more than 5 lakh sq m of panel orders pending.

3. Earning trigger thesis

EPACK's trigger is volume: a fast-growing order book from warehousing, auto, renewables and now data centres, and new plants (Mambattu, Ghiloth, Gujarat) to execute it. The risk is margins and cash, since steel price spikes hit fixed-price orders and receivables have stretched.

Trigger	What management said	Evidence so far	Time horizon	Strength
Order book growth	Rs 2,000 cr order booking target in FY27	H1 inflow Rs 1,124 cr (+71%); order book Rs 1,462 cr	8-9 months visibility	Strong
New plants	Ghiloth sandwich panels and steel (done Oct 2026); Gujarat Q4 FY27	Ghiloth commissioned on time	Q4 FY27	Strong
Margin band 10-10.5%	Pass through steel on new orders; escalation on old	Q1 9.4%, Q2 10.1%	H2 FY27	Moderate

3b. Trigger check

Trigger type	Yes/ No	What was said (date)
Debt cut	No	Already net cash
New business	No	Data-centre orders are within the existing PEB business
Margin up	No	Gross margin fell about 2.3 points on steel costs; recovery expected, not yet shown on a yearly basis
New management	No	Only a restructured sales team for sandwich panels
New capacity	Yes	Ghiloth Unit 5: 13,000 tonnes steel processing and sandwich panel line commissioned 30 Oct 2026; Gujarat plant in Q4 FY27 (Nov 2026)
Big orders	Yes	Order inflow in H1 up about 71% to Rs 1,124 cr; order book Rs 1,462 cr, 8-9 months of revenue (Nov 2026)
Turnaround	No	Not applicable
Promoter buying	No	Not discussed

Single concrete driver: A swelling order book from warehousing, renewables and data centres, executed through new plants at Ghiloth and Gujarat.

3c. Margin bridge

EBITDA margin about 10.1% in Q2 FY27, below about 12% a year earlier and the FY26 average of about 10.5%. Steel prices rose about 17-18% and could not be passed on fully on orders already being executed, cutting gross margin about 2.3 points. New orders are priced at current costs and a steel inventory was built, so management expects H2 margins to improve back to the 10-10.5% band (one-off).

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Pre-IPO and Jan 2026	EBITDA margin 10-10.5% this year and next	FY26 about 10%; H1 FY27 about 9.8%	Partly
May 2026	Utilise a substantial portion of the Mambattu sandwich panel line this year	35% in Q1 to 47-48% in Q2	On track

Jan 2026	Ghiloth sandwich panel line	Commissioned 30 Oct 2026	Delivered
FY27 start	Rs 1,900 cr revenue; Rs 2,000 cr order booking	H1 revenue Rs 867 cr; H1 booking Rs 1,124 cr	On track
Always	Working capital 40-55 days	About 60 days at Sep 2026	Missed

The story has been steady since listing: grow 25-30% on capacity and orders at a 10% margin. Management has been open about misses (Mambattu panel line, working capital, steel squeeze) and set out fixes.

5. Bottom line

Durable earning trigger? → YES

A concrete, visible driver: order inflow up sharply, an order book covering most of a year, and new plants starting on time.

Management consistent? → YES

Plants, growth and the margin band have largely come through as said, and the MD flagged the working-capital slip himself. The working-capital miss is the thing to watch.

6. Checkpoints for next quarter

- Working capital comes back inside the guided range
- EBITDA margin moves back above ten percent in the December quarter
- Gujarat plant starts production in the March quarter
