Suratwwala Business Group Ltd

Concall tracker · Q2 FY27 (quarter ended 30 Sep 2026) · filed under Q2-2027 · NSE: SBGLP · BSE: 543218

1. Snapshot

A small Pune property developer (the "Surat" in the name is the family name, not the city). It builds homes, offices and IT-park space in Pune, mostly by redeveloping old housing societies in the central city, and has completed projects in Hinjewadi, Baner and Narayan Peth. Since FY25 a subsidiary, Suratwwala Natural Energy Resource, also builds solar power plants for others (EPC: it designs, buys the equipment for and builds the plant).

Number	Value	Plain read
Market cap	₹407 cr	A small company; the whole business is valued at about ₹400 cr.
FY26 revenue (consolidated)	₹143 cr	Roughly four times FY25, which was a weak year with few flats handed over; solar work added to it.
FY26 profit (consolidated)	₹38 cr	Back above the FY24 level after the FY25 dip.
Q2 FY27 revenue / profit (consolidated)	₹61 cr / ₹10 cr	Sales more than double the same quarter last year; profit up by about a quarter, so margins are thinner as solar grows.
Operating margin, property arm (standalone, Q2 FY27)	~41%	Very high, typical of redevelopment where land comes cheap through the society deal.
Borrowings (consolidated, Mar 2026)	₹83 cr	Up from ₹73 cr a year earlier; modest against yearly profit.
ROE (3-year)	~41%	Earns a lot on shareholders' money, though property profits come in lumps.

2. Coverage

No concall transcripts were available on Screener. This report is based on a global web deep-dive. Screener lists a single investor presentation from August 2024 and no transcript since; the company holds no regular earnings calls. NSE/BSE filings and the company website were checked for any later call: none found.

Sources used: Screener.in standalone and consolidated tables; NSE filing of 27 Jan 2026 (Prabhat Road redevelopment); news reports on the solar orders (Aliceblue, Apr 2026; SAHI and Investment Guru India, 17 Sep 2026); Geosquare (Jun 2026, FY26 profit and expansion plan); company website (project list).

Latest update highlights · Q2 FY27 results (approved 4 Nov 2026)

- Group sales ₹61 cr in the September quarter, up from ₹26 cr a year ago; profit ₹10 cr against ₹8 cr. Sales rose much faster than profit, a sign the lower-margin solar work is a bigger share.
- 17 Sep 2026: the solar subsidiary got a ₹69 cr letter of intent from Shree Tatyasaheb Kore Warana sugar co-operative to build a 20 MW solar plant in Kolhapur/Sangli, plus ₹50 lakh a year of upkeep work. That is about half of last year's whole group revenue.
- April 2026: an earlier 15 MW solar order (~₹19 cr) from Bondada Engineering under Maharashtra's farm-solar scheme (MSKVY 2.0).
- 27 Jan 2026: signed a Prabhat Road, Pune redevelopment (~11,250 sq ft plot, ~55,000 sq ft of flats to sell) for about ₹12.6 cr paid to existing owners plus three flats.
- Screener flags that customer dues are taking longer to collect (debtor days up from ~57 to ~95).

Business mix & capacity
Domestic vs export: all revenue is from India (Pune property and Maharashtra solar plants). Split between property and solar is not broken out publicly; the gap between standalone (property) sales of ₹27 cr and group sales of ₹61 cr in Q2 suggests solar is now around half.
Capacity: not a factory business, so no utilisation figure. Growth depends on how many redevelopment sites it signs and how many solar orders it wins.

3. Earning trigger thesis

Two things could grow profit. First, the solar construction arm, which has won its two largest orders this year, the Warana one alone worth about half of last year's revenue. Second, the steady flow of central-Pune redevelopment sites like Prabhat Road, which carry very high margins when flats are sold. The solar side is new and lower-margin; the property side is lumpy and depends on when projects are handed over.

Trigger	What the company said	Evidence so far	Time horizon	Strength
Solar EPC orders	Letters of intent for 15 MW (Bondada) and 20 MW (Warana)	Group sales up sharply over FY26 and H1 FY27	FY27-28	**Moderate**: real orders, but letters of intent and low margin
Pune redevelopment pipeline	Prabhat Road deal signed; plans to grow beyond city limits	Property arm sales up year on year at ~40% + margins	FY28 onward for Prabhat Road	**Moderate**: proven model, lumpy timing
Villa projects near Pirangute and Lavasa	Listed as upcoming on website	No launch dates	Unclear	**Unproven**

3b. Trigger check

Trigger type	Yes/ No	What was said (date)
Debt cut	No	Not stated; borrowings rose in FY26.
New business	Yes	Solar EPC vertical started in FY25 and is now winning larger orders (Apr and Sep 2026 filings).
Margin up	No	Not stated; group margin is falling as solar grows.
New management	No	No new CEO/MD in the period.
New capacity	No	Not a factory business.
Big orders	Yes	₹69 cr letter of intent for a 20 MW solar plant from Warana sugar co-operative (17 Sep 2026).
Turnaround	No	FY25 dip was timing of handovers, not a loss.
Promoter buying	No	Promoters flat at 73.4% for three years.

Single driver: the solar subsidiary's new plant-building orders, led by the Warana sugar co-operative's 20 MW plant, on top of central-Pune redevelopment projects.

3c. Margin bridge

Group profit grew much slower than sales this quarter (sales more than doubled, profit up about a quarter). The property arm still earns around 40% operating margin, but solar construction earns far less, so the more solar there is, the lower the group margin. This is the business mix, not a one-time cost. (lasting)

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
FY25	Launch solar EPC as a growth driver (per news reports)	Solar arm formed, two orders won by Sep 2026	Delivered
FY25-26	Keep signing Pune redevelopment sites	Prabhat Road deal signed Jan 2026	Delivered
Jun 2026	Expand property beyond Pune city limits in FY27	No new site outside the city announced yet	Too-early
Sep 2026	Build the Warana 20 MW plant	Letter of intent only; no completion date given	Too-early

Narrative drift: there's very little on the record to hold management to. It holds no calls and gives no guidance, so there are no missed targets, but also nothing to check. The story has moved from pure property to property plus solar, which is a real shift in the business.

5. Bottom line

Durable earning trigger? → MAYBE

The solar orders are real and big for a company this size, and they're already lifting sales. But they're letters of intent at thin margins, and property income depends on the timing of handovers. It's plausible, not proven.

Management consistent? → MAYBE

No calls and no guidance mean there's no promised-vs-delivered record. What it did say it would do, it has broadly done. Slower collection of customer dues is the thing to watch.

> **Checkpoints for next quarter**
>
> - Warana 20 MW solar letter of intent turns into a signed order and work starts
> - Prabhat Road redevelopment gets approvals or opens bookings
> - Debtor days stop rising
