Urja Global Ltd

Delhi-based small company that sells solar power systems, off-grid and rooftop solar kits and lead-acid and lithium batteries under the Urja and I-volt brands, mostly through dealers in India.

Concall-tracker report, filed under Q2-2027. Prepared 11 Nov 2026.

1. Snapshot

Number	Value	Plain read
Market cap	Rs 500 cr	What the market values the company at
FY26 revenue	Rs 58.5 cr	Tiny, and well below the Rs 128 cr of FY21
Q2 FY27 revenue	Rs 18.9 cr	Up about a fifth on a year ago
Q2 FY27 operating margin	4%	Thin: about 4 rupees of operating profit per Rs 100 of sales
FY26 profit	Rs 1.9 cr	Very small for a Rs 500 cr company
P/E	about 192	Extremely pricey: the market price isn't backed by profit
Promoter holding	17.2%	Low and drifting down from 20.3% three years ago
Credit rating	CARE BB-	Below investment grade (reaffirmed Jan 2026)

2. Concall coverage

No concall transcripts were available on Screener. This report is based on a global web deep-dive: Screener financials and shareholding, the NSE board-meeting outcome (5 Aug 2026), Kotak Neo, Sahi, Simply Wall St and askfuzz results coverage, and CARE's Jan 2026 rating note as reported. The company publishes no guidance and holds no calls.

Quarter	Date	Transcript read?
Q4 FY26 results	May 2026	Press coverage
Q1 FY27 results	5 Aug 2026	NSE filing and press coverage
Q2 FY27 results	Nov 2026	Screener numbers

Latest concall highlights: Latest update highlights: Q2 FY27 numbers (Screener, Nov 2026)

- Revenue Rs 18.9 cr, up about 22% on a year ago; profit Rs 0.8 cr.
- Margins have crept up from under 1% to about 4% over two years, still very thin.
- No new product, plant, order or strategy announced in the results that we could find.
- Press sources disagree on Q1 FY27 numbers (consolidated vs standalone), so the filings should be checked directly.

Business mix and capacity

- Almost all sales are in India. Split not disclosed.
- Capacity utilisation not disclosed; the business mostly trades and assembles solar and battery products.

3. Earning trigger thesis

There is no identifiable earnings trigger. The company sells solar kits and batteries in a market crowded with far larger players, revenue is half what it was five years ago, and profit is close to zero.

Trigger	What management said	Evidence so far	Time horizon	Strength
None identified	No guidance or plan published	Revenue growing from a low base, margin about 4%	-	Unproven

3b. Trigger check

Trigger type	Yes/No	What was said (date)
Debt cut	No	-
New business	No	-
Margin up	No	No statement; margin up only from near zero
New management	No	-
New capacity	No	-
Big orders	No	-
Turnaround	No	-
Promoter buying	No	Promoter stake has fallen from 20.3% to 17.2%

Single concrete driver: None: no named product, plant or customer is driving earnings.

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
FY24-FY27	No promises made	Revenue up about 16% a year from a low base; profit tiny	Too-early

With no calls and no guidance, there's nothing to hold management to. The one clear signal is promoters slowly reducing their stake.

5. Bottom line

Durable earning trigger? NO

No driver, near-zero profit and a price that assumes much more than the business earns.

Management consistent? NO

Nothing promised, nothing to check, and promoters keep selling down.

6. Checkpoints for next quarter

- Quarterly revenue stays above Rs 18 cr
- Operating margin rises above 5%

- Promoter stake stops falling
