Aeroflex Enterprises Ltd: Concall Tracker

Q1 FY27 update (Apr-Jun 2026 quarter) · Report date: 6 Nov 2026 · BSE: 511076 · AEROENTER

Not investment advice. Do your own due diligence. This company holds no earnings calls, so this report is a web deep-dive using sources published up to 30 Sep 2026.

> **Read this first:** Aeroflex Enterprises (the old SAT Industries, renamed May 2025) is a **holding company**. It owns about two-thirds of listed hose maker **Aeroflex Industries**, a majority of listed packaging firm **Aeroflex Neu**, a small lending arm and a start-up portfolio. Its own (standalone) books are nearly empty, so always judge it on the **group (consolidated)** numbers.

1. Snapshot

What it does: it buys or builds stakes in businesses, earns from the ones it runs, and books big one-off gains when it sells a stake (its "buy, build, sell" model). The quarter just reported is the one where the biggest of those sales landed.

MARKET CAP
≈₹1,356 cr
What the market values the whole group at (price about ₹120).

Q1 FY27 GROUP REVENUE
₹189 cr
Up about 41% on last year's ₹134 cr, almost all from the hose business.

Q1 FY27 GROUP PROFIT
₹103 cr
Up from ₹14 cr, but mostly the one-time gain on selling M.R. Organisation.

OTHER INCOME IN THE QUARTER
₹143 cr
The sale gain sits here. Without it, pre-tax profit would have been close to nil.

GROUP OPERATING MARGIN
9%
Down from 14% a year ago and 18% last quarter: costs at the parent jumped.

VALUATION
≈8× trailing group profit
Looks cheap, but the trailing profit is inflated by the one-off gain.

Read: a big headline quarter that is mostly a cash-in, not a jump in everyday earnings. The underlying hose business is growing fast; the rest of the group is flat or weak.

2. Coverage: no concalls, global web deep-dive

No concall transcripts were available on Screener. This report is based on a global web deep-dive. Aeroflex Enterprises does not hold earnings calls, and published no transcript for this quarter.

Period	Source	Read?
FY24 to Q4 FY26 (to May 2026)	Investor deck, filings, news	Carried forward from the Q4-2026 report
Q1 FY27 (results around 11 Aug 2026)	Screener consolidated and standalone results; results summaries (Arthneeti, Univest); Aeroflex Industries and Aeroflex Neu Q1 coverage (Quartr, MarketsMojo); promoter-buying filings (Whalesbook, Jun 2026)	Newly read in full ★

Only the Apr-Jun 2026 quarter and news up to 30 Sep 2026 were read fresh. The older backstory comes from the prior report.

★ Latest update highlights: Q1 FY27 results (Apr-Jun 2026)

- **Profit of ₹103 cr, up from ₹14 cr.** The driver is about ₹143 cr of other income, which is the gain on selling its stake in M.R. Organisation to Ingersoll-Rand (closed 30 Apr 2026). Read: this is the cash-in the last report flagged, now in the books. It won't repeat next quarter.
- **Revenue ₹189 cr, up about 41%.** Aeroflex Industries (hoses) brought in about ₹145 cr, up about 72%, with its own profit up about 162% to ₹18.8 cr on liquid-cooling demand from data centres. Read: the crown-jewel holding is firing.
- **Operating margin fell to 9%.** Standalone expenses jumped to about ₹26 cr in the quarter against a usual ₹1-2 cr, and the sources we read don't explain why. Read: a one-quarter cost spike at the parent; worth checking in the annual report.
- **Aeroflex Neu (packaging) is struggling:** sales ₹28 cr, down about 5%, and profit almost nil. Read: the second operating business isn't pulling its weight.
- **No guidance, no dividend with the results.** Promoter group kept buying shares on the open market in June 2026, taking its stake from about 7.1% to 7.3%. Read: small but a vote of confidence.

Business mix & capacity
Domestic vs export split: not disclosed at the group level. Capacity: no single plant figure for a holding company; the packaging arm reports about 9,120 tonnes a year of bag-making capacity across Aeroflex Neu and Fibcorp. Read: the useful number is the hose business's growth, not group capacity.

★ Since our last report (builds on the Q4-2026 report, coverage through the FY26 results of May 2026)
Prior verdicts: **Trigger MAYBE · Consistency MAYBE**

Prior read	What we said then	What Q1 FY27 shows	Movement
Trigger	Buy-build-sell is real but lumpy; hose stake is the real value	MRO gain booked; hose business up sharply	Confirmed
Consistency	Did what the model says, but thin disclosure and no targets	Still no guidance; unexplained parent cost spike	Unchanged
MRO sale cash	₹227 cr deal closed 30 Apr 2026	Gain of about ₹143 cr shows in other income	Confirmed
Dev IT warrants (digital bet)	Announced Oct 2025, nothing earned	No update found up to 30 Sep 2026	On-track (silent)
	Promotional, unverifiable	No new audited value disclosed	Unchanged

Start-up portfolio value			

Verdict change: both verdicts unchanged. The sale gain proves the model again but doesn't make earnings recurring.

3. Earning trigger thesis

The group's earnings engine is still two things: one-off stake sales, and the growing value of its stake in Aeroflex Industries. This quarter showed both. The MRO sale turned into a large booked gain, and the hose business grew fast on data-centre cooling demand. What's still missing is a steady, recurring profit stream at the group level beyond the hose company; packaging is close to break-even and the parent's own costs jumped.

Trigger	What the record shows	Evidence so far	Horizon	Strength	Change since last report
Buy-build-sell stake sales	Build, then sell to a strategic buyer or via IPO	Third proof point: MRO gain booked in Q1 FY27	Event-driven	MODERATE real but lumpy	Unchanged: delivered, but no next sale named
Aeroflex Industries stake	About two-thirds of a fast-growing hose maker	Its Q1 sales up about 72%, profit up about 162%	Ongoing	STRONG	↑ improving: liquid-cooling demand showing in numbers
Aeroflex Neu packaging	Moving into higher-end bulk bags	Sales down, profit near nil	Uncertain	WEAK	↓ weakening
Start-ups and Dev IT bet	Early-stage bets to exit later	No new disclosure	Multi-year	UNPROVEN	Unchanged

4. Management consistency scorecard

Period	What was promised / the model	What actually happened	Verdict
FY24	Monetise Aeroflex Industries via IPO	IPO done, large gain booked	Delivered
FY26 to Q1 FY27	Sell MRO to Ingersoll-Rand for ₹227 cr	Closed 30 Apr 2026; gain in Q1 FY27 profit	Delivered
FY23 to Q1 FY27	Grow the operating group	Group sales up about 41% this quarter, led by hoses; packaging slipping	Partly
Oct 2025	Enter digital via Dev IT warrants	No update to 30 Sep 2026	Too early
Ongoing	Disclosure and guidance	No call, no targets, parent cost spike unexplained	Weak

Narrative drift: the story hasn't changed. It's still "build and sell", and they keep doing it. The issue is the same as last time: no numbers to hold them to, a promotional start-up pitch, and thin explanations when something odd shows up in the accounts, like this quarter's expense jump. Promoter buying in June is a small positive.

5. Bottom line: two verdicts

Durable earning trigger? → MAYBE vs last quarter: unchanged

Nothing moved the verdict. The MRO gain was expected and is now booked, and the hose stake keeps getting more valuable. But this quarter's profit is a one-time sale, the packaging arm is close to break-even, and the next exit isn't named. Real value, not a recurring earnings engine.

Management consistent? → MAYBE vs last quarter: unchanged

They did what they said on the MRO sale and the promoters are buying shares. Against that, there's still no guidance or call, and a sudden cost jump at the parent went unexplained in public sources. Steady on strategy, weak on disclosure.
