Kabra Extrusion Technik Ltd

Concall Tracker · Q2 2027 (quarter ended Sep 2026) · first report

1. Snapshot

Long-time maker of plastic extrusion machinery (machines that make pipes, films and profiles) that has turned into mainly a lithium-ion battery-pack business through its Geon division (formerly Battrixx). Geon supplies packs to electric two- and three-wheeler makers and now builds grid battery-storage systems.

Number	Value	What it means
Market cap	Rs 2,605 cr	What the market values the whole company at.
Sales, Sep 2026 quarter	Rs 221 cr	Up about two-thirds on last year; the best quarter in three years.
Operating margin, Sep 2026 quarter	8%	Up from about 3% for FY26, but still thin; it keeps only 8 paise of each rupee of sales.
Net profit, last 12 months	Rs 6 cr	Barely profitable; FY26 was a small loss.
Borrowings (Mar 2026)	Rs 327 cr	More than doubled in a year to fund battery growth, and rose again in H1 FY27.
Return on capital	1%	Very poor today; the battery business has not yet earned back what's been put in.

2. Concall coverage

No concall transcripts were available on Screener. This report is based on a global web deep-dive.

Sources used:

- Screener.in financial and shareholding tables
- NSE/BSE filings: Sep 2026 quarter results and press release (Oct 2026), Rs 141 cr preferential issue (Aug-Sep 2026), LOI from a top-three two-wheeler maker (2 Sep 2026), Rs 750 cr battery expansion approval (5 Sep 2026)
- News: Geon's 2.88 GWh Khavda storage project (Jun 2026) and 10 MW/20 MWh Phalodi project (Sep-Oct 2026)
- Results summaries (Arthneeti, Univest, Sahi)

Quarter	Date	Transcript read?
Sep 2026 quarter	Oct 2026	No call held; results, press release and filings read

No earnings-call transcript is published for this company on Screener or with the exchanges for recent quarters.

Latest update highlights: Sep 2026 quarter (results Oct 2026)

- Sales Rs 221 cr, up 64%; battery division Rs 166 cr (about 3.5 times last year), machinery Rs 55 cr (down from Rs 89 cr).
- Operating profit roughly doubled and the half-year already beats all of FY26; net profit about Rs 4 cr.
- July floods hit the Daman machinery plant; insurance claim under review.
- Geon commissioned a 10 MW/20 MWh battery-storage system at Phalodi, Rajasthan, after the 2.88 GWh Khavda project in June.
- Set up a UAE subsidiary (Oct 2026) as part of a planned Rs 750 cr expansion in the UAE and Vietnam.

Business mix & capacity

Domestic vs export: Not disclosed for the battery business. The machinery arm has historically exported a meaningful share; batteries are mostly domestic.

Capacity use: Geon's installed battery-pack capacity is about 7 GWh (FY26 annual report). Utilisation not disclosed. A Pune plant was to start four-wheeler high-voltage packs in Sep 2026.

3. Earning Trigger thesis

The earning trigger is Geon. Battery packs and grid storage now make about three-quarters of sales, and the jump this quarter came from storage projects and two-wheeler packs. A letter of intent from a top-three two-wheeler maker, a Rs 141 cr equity raise and a Rs 750 cr overseas plan show where it's headed. The catch is profit: margins are thin, debt has more than doubled, and the old machinery business is shrinking.

Trigger	What management said	Evidence so far	Time horizon	Strength
Grid battery storage (BESS)	Completed Khavda (2.88 GWh) and Phalodi (20 MWh) projects	Battery sales about 3.5 times last year	Now	Moderate: lumpy, project-based
Two-wheeler battery packs	LOI from a top-three Indian two-wheeler maker for two pack programmes	LOI only, no value or volumes	FY27-28	Unproven
Vietnam and UAE plants	Up to Rs 750 cr approved	Subsidiary set up; no timeline	Unclear	Unproven
Extrusion machinery	No stated plan	Sales falling for three years	Ongoing	Weak

3b. Trigger check

Trigger type	Yes/ No	What was said (date)
Debt cut	No	Debt rising.
New business	Yes	Geon grid-storage projects (Khavda Jun 2026, Phalodi Sep 2026) and UAE/Vietnam subsidiaries (Sep-Oct 2026).
Margin up	No	Margin recovered from a weak FY26, but no management statement on why.
New management	No	None found.
New capacity	Yes	Pune four-wheeler pack line to start Sep 2026; Rs 750 cr India/Vietnam expansion approved 5 Sep 2026.
Big orders	Yes	LOI from a top-three two-wheeler maker for two battery-pack programmes (2 Sep 2026).
Turnaround	Yes	Back to profit after an FY26 loss, with H1 FY27 operating profit already above FY26.
Promoter buying	No	Rs 141 cr preferential issue went to outside investors; promoter stake edged down.

The single concrete driver: Geon's grid battery-storage projects and two-wheeler packs have made batteries three-quarters of sales and pulled the company back to profit.

3c. Margin bridge

Operating margin rose to about 8% from 2-3% through FY26, as battery volumes spread fixed costs and storage projects added scale. No call to confirm it holds, and FY26 showed how fast it can fall (one-off).

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Dec 2021	Rs 100 cr capex for battery unit	Battery business built, now about 7 GWh	Delivered
Jan 2025	Rs 300 cr domestic expansion incl. Chakan, Pune	Pune four-wheeler line due Sep 2026	Partly
FY25-26	Grow battery business profitably	Sales grew but FY26 ended in a loss	Missed
Aug-Sep 2026	Raise equity via preferential issue	Raised from Rs 120 cr to Rs 141 cr, approved	Delivered

Narrative drift: The company has swapped stories: from a machinery maker to an EV battery-pack maker to a grid-storage and overseas-plant story. Each pivot has some substance behind it, but profit has lagged every time and the plan keeps getting bigger before the last step has paid back.

5. Bottom line

Durable earning trigger? → MAYBE

Battery sales are surging and the company is back in profit, so something real is happening. But margins are thin, storage work is lumpy, and the two-wheeler win is only a letter of intent.

Management consistent? → NO

It builds what it announces, but it keeps announcing bigger plans while returns stay near zero and debt climbs. No calls means no stated targets to hold it to.

6. Checkpoints for next quarter

- Battery division keeps sales near this quarter's level
- Two-wheeler letter of intent turns into a supply order
- Operating margin stays above last year's level
