Tenneco Clean Air India Ltd (TENNIND)

Concall tracker, Q2 2027 (Jul-Sep 2026) · Indian arm of US-based Tenneco: makes exhaust and emission-control systems for trucks and cars, shock absorbers and struts, and spark plugs.

1. Snapshot

Number	Value	Plain read
Market cap	₹17,742 cr	A large auto parts company by stock-market value.
Q2 revenue	₹1,718 cr, up 34%	Its fastest growth since listing in November 2025.
Q2 operating margin (on value-added revenue)	17.2%	Strong for an auto parts maker; a bit lower than last year due to costlier commodities.
Q2 net profit	₹173 cr, up 15%	Grew slower than sales because of input costs and a one-off gain in the base.
P/E	50.4	Investors pay a premium for the growth and the parent's technology.
Balance sheet	Debt-free, net cash	Funds its new plants from its own cash.

2. Concall coverage

Quarter	Date	Transcript read?
Q2 FY26	Dec 2025	Yes (first call after listing)
Q3 FY26	Feb 2026	Skimmed
Q4 FY26	3 Jun 2026	Yes
Q1 FY27	6 Aug 2026	Yes
Q2 FY27	5 Nov 2026	Yes, in full ★

Five calls, about a year since listing. The consistency read is limited to that.

Latest concall highlights — Q2 FY27 (5 Nov 2026)

- Value-added revenue (excluding pass-through catalyst costs) up 32% on 25% volume growth.
- Truck clean-air market share up to 59%; car shock absorber share about 55%, from 48% eighteen months ago.
- Lifetime order book about ₹16,500 cr, more than all of the FY30 revenue target; exports ₹875 cr of it.
- New wins: three-wheeler suspension, CNG exhaust for a European carmaker, spark plugs, India's first locally made semi-active suspension.
- A new clean-air plant in West India (about ₹45 cr), start of production around September 2027. Margins hurt by steel, rubber, plastic and wage costs; recovery talks with carmakers ongoing.

Business mix & capacity

- Domestic vs export: mostly domestic; exports are ₹875 cr of the order book and about half the export target for FY30.
- Capacity: new West India plant adds 12-14% hot-end capacity; two other plants announced earlier.

3. Earning trigger thesis

Stricter emission rules make exhaust systems bigger and costlier, and Tenneco India already has most of the truck market. Suspension share keeps rising with new technology from the parent. The order book already covers the FY30 revenue goal, so the question is execution and margins, not demand.

Trigger	What management said	Evidence so far	Time horizon	Strength
Order book	More than FY30 target covered	₹16,500 cr, up from ₹12,400 cr in March	FY27-30	Strong
Market share gains	Truck clean air and car suspension	59% and 55%, both rising	Now	Strong
Exports	Make India an export hub	Export order book ₹875 cr, half of FY30 goal	FY28-30	Moderate
New plants	Capacity ahead of orders	West India plant SOP Sept 2027	FY28	Moderate

3b. Trigger check

Trigger type	Yes/No	What was said (date)
Debt cut	No	Already debt-free.
New business	Yes	Entry into three-wheeler suspension and CNG exhaust (Nov 2026).
Margin up	No	Margins dipped on commodity and wage costs (Nov 2026).
New management	No	No change mentioned.
New capacity	Yes	New West India clean-air plant, SOP around September 2027 (Nov 2026).
Big orders	Yes	Lifetime order book about ₹16,500 cr, over 100% of FY30 target (Nov 2026).
Turnaround	No	Not applicable.
Promoter buying	No	Parent holds its stake; no buying mentioned.

The single concrete driver: A lifetime order book bigger than its FY30 revenue goal, plus rising share in truck emission systems and car suspension.

3c. Margin bridge

Margin on value-added revenue slipped as steel, lube oil, plastic and rubber costs rose, minimum wages went up, the rupee weakened and freight cost more. Steel is recovered with a quarter's lag; the rest is being negotiated (one-off).

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Dec 2025	Lifetime bookings growing, exports a focus	Order book up from ₹12,400 cr to ₹16,500 cr in six months	Delivered
Jun 2026	Mid-teens growth needed for order book	H1 value-added revenue up 25%	Delivered
2025-26	Gain market share	Truck clean-air 57% → 59%, suspension 48% → 55%	Delivered
Jun 2026	Hold record margins	Margin dipped on input costs	Partly

In a year as a listed company the story has stayed the same: emission rules, share gains, exports. Every number management offered has moved the way it said.

5. Bottom line

Durable earning trigger? → YES

Growth is already in the numbers and the order book is larger than the FY30 target.

Management consistent? → YES

Short record, but every promise checked has been kept, and they don't sugar-coat the cost pressure.

6. Checkpoints for next quarter

- Suspension margin recovers as cost talks with carmakers close
- Order book keeps growing at the full-year update
- West India plant stays on track for September 2027
