Orkla India Ltd

Concall tracker · filed under Q2-2027 · 11 Nov 2026

1. Snapshot

Orkla India owns the MTR and Eastern food brands. It sells spices (pure ones like chilli and coriander, and blended masalas) and convenience foods (breakfast mixes, ready meals, sweets), rooted in South Indian foods, with Kerala a key spice market, plus exports with the GCC (Gulf) as the main overseas market.

- Market cap about Rs 7,722 cr: a mid-sized listed FMCG company.
- Q2 FY27 revenue from operations Rs 776 cr, up 19.4%; sale of products up 18.4% with volumes up only 2.9%: most growth came from price rises.
- Q2 FY27 EBITDA Rs 124 cr, up 12.6%, margin 15.9%, down about 100 basis points: costs rose faster than prices.
- H1 FY27 revenue Rs 1,435 cr, up 15.1%; EBITDA up 7.8% at a 16.6% margin.
- Q2 FY27 PAT up 19.2%, helped by PLI (production-linked incentive) benefits and interest on surplus cash.
- Spice input costs up about 48% year on year in the quarter, mainly chilli and coriander; Orkla raised spice prices by about 20%.

2. Concall coverage

Orkla India listed recently; Screener has 5 transcripts (Q2 FY26 to Q2 FY27), all read. The latest call (4 Nov 2026) was read in full. With only five calls, the consistency read is limited.

Quarter / call	Date	Transcript read?
Q2 FY26	Nov 2025	Yes
Q3 FY26	Feb 2026	Yes
Q4 FY26	19 May 2026	Yes
Q1 FY27	Aug 2026	Yes
Q2 FY27	4 Nov 2026	Yes, read in full

2b. Latest concall highlights: Q2 FY27 (4 Nov 2026)

- Revenue growth sped up to 18.4% from 11.5% in Q1, and volume growth of 2.9% was the best of the last three quarters. Spices grew 25.1%, convenience foods 7.7%.
- Domestic up 20%, led by Eastern; international up 11.7%, with the GCC up 22.7%.
- Project Bolt (quick commerce push in the top 28 cities) enters its final quarter. Digital commerce rose to 10% of the domestic business from 8.9% in Q1, and its sales outside the home states grew 33.6%.
- Kerala distribution restructuring on plan: convenience food bills per salesman up to 1.27 times Q4 FY26 levels; standalone modern trade spice volumes up 16% quarter on quarter. Spice outlet rollout continues to March 2027.
- Festive season (Dussehra, Diwali) moved into Q3 this year, which hurt Q2 comparisons and should help Q3.

2c. Business mix & capacity

- Domestic vs export: international grew 11.7% in Q2, GCC the main market; the exact split was not stated on the call.
- Capacity utilisation: not discussed. Digital commerce is 10% of domestic sales.

3. Earning trigger thesis

Growth is back after eight quarters held down by falling spice prices, but this time most of it is price, not volume. The levers management controls are Project Bolt (taking MTR and South Indian foods to young city buyers through quick commerce) and fixing distribution in Kerala. Both are showing early numbers. Margins are being

squeezed by chilli and coriander inflation, and management says about half the past margin gain came from cheap commodities.

Trigger	What management said	Evidence so far	Time horizon	Strength
Project Bolt digital commerce	Build quick commerce in top 28 cities, Gen Z products	Digital share up to 10% of domestic; rest-of-India digital sales up 33.6%	Through FY27	Moderate: early but real
Kerala distribution restructuring	Better coverage and productivity in Kerala	Bills per salesman 1.27x; modern trade spice volumes up 16% q-o-q	To March 2027	Moderate
Price-led spice growth	Pass on commodity inflation	Spices up 25.1%, prices up about 20%	While inflation lasts	Weak: not durable, hurts volumes

3b. Trigger check

Trigger type	Yes/ No	What was said (date)
Debt cut	No	Company holds surplus cash
New business	No	Innovations launched (38 in H1) but no new line of business
Margin up	No	EBITDA margin 'moderated by around 100 basis points' (4 Nov 2026)
New management	No	No change announced
New capacity	No	Not discussed
Big orders	No	Consumer business
Turnaround	Yes	'After 8 quarters of subdued deflation-driven growth, Quarter 1 FY27 delivered a strong double-digit revenue growth' (Aug 2026)
Promoter buying	No	Not said

Single concrete driver: Revenue growth has returned after eight slow quarters, mostly from spice price rises, with Project Bolt's quick-commerce push and the Kerala distribution fix starting to add volume.

3c. Margin bridge

EBITDA margin fell about 100 basis points to 15.9% in Q2 FY27 as chilli and coriander prices jumped and Orkla priced blended spices cautiously to protect volume. Some price rises came mid-quarter, so their full effect lands in Q3. Management says about half of the FY23-FY26 margin gain came from commodity deflation, which has now reversed. (one-off)

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Q4 FY26 call (May 2026)	Launch Project Bolt to scale digital commerce	Digital share up; in final quarter of rollout	Delivered (so far)
Q1 FY27 call (Aug 2026)	Kerala restructuring progressing as planned	Modern trade and convenience metrics up; spice rollout started in two northern districts	Delivered (on track)
Q1 FY27 call	Double-digit revenue growth continues	18.4% in Q2	Delivered
Since Q3 FY26	Hold healthy margins	Margin down about 100 bps on inflation	Partly

The story has been consistent across five calls: brands, distribution fixes, digital commerce. No hard numerical guidance is given, which limits what can be scored. Management is open that volume growth is thin and that part of past margin gains came from cheap spices.

5. Bottom line

Durable earning trigger? → MAYBE

Revenue is growing again, but mostly from pricing in a spice inflation cycle. The volume levers, Project Bolt and the Kerala fix, are real and measured but still small. It needs volumes to pick up to call it durable.

Management consistent? → YES

Over five calls management did what it said on its projects and was upfront about thin volumes and margin pressure. The record is short.

6. Checkpoints for next quarter

- Volume growth improves in the festive December quarter
- EBITDA margin recovers as mid-quarter price rises flow through
- Kerala spice distribution rollout stays on plan
