CCL Products (India) Ltd

Concall tracker report · Q2 2027 (Sep 2026 quarter) · prepared 11 Nov 2026

1. Snapshot

One of the world's big private-label instant coffee makers: it turns green coffee into spray-dried and freeze-dried instant coffee for global brands, from plants in India (including Tirupati) and Vietnam. It also sells its own Continental coffee brand in India, which management calls the number three brand in the country.

- Market cap about Rs 13,169 cr at about 63 times standalone profit: priced as a quality compounder.
- FY26 consolidated turnover Rs 4,466 cr, up 43% (much of it higher coffee prices passed through); EBITDA Rs 741 cr, up 32%; net profit Rs 388 cr, up 25%.
- Sep 2026 quarter (consolidated): turnover Rs 1,216 cr, up 7.8% on double-digit volume growth; EBITDA up 9.5%; net profit Rs 130 cr, up about 29%.
- Net debt about Rs 742 cr at Sep 2026, down from about Rs 1,073 cr in March and much lower than a year before: the balance sheet has been cleaned up fast.
- Return on capital about 21%: good.

2. Concall coverage

Quarter / source	Date	Read?
Q3 FY24 to Q4 FY25 (7 calls)	Feb 2024 - May 2025	Yes (scanned for guidance)
Q1 FY26	Aug 2025	Yes (scanned)
Q2 FY26	Nov 2025	Yes (scanned)
Q3 FY26	Feb 2026	Yes (scanned)
Q4 FY26	8 May 2026	Yes
Q1 FY27	Jul 2026	Yes (scanned)
Q2 FY27	16 Oct 2026	Yes, in full

Thirteen calls over about three years; the latest was read in full.

Latest concall highlights - Q2 FY27 (16 Oct 2026)

- Volume grew 10-15%, but value only 7.8% because green coffee prices have fallen; EBITDA up 9.5%, net profit up about 29%.
- Guidance held: about 15% volume growth and similar EBITDA growth for FY27. Management said the Q3 and Q4 order book looks robust.
- Domestic branded sales about Rs 140 cr in the quarter, growing about 25% on volume, across general trade, modern trade and e-commerce.
- Overall plant utilisation about 70%; freeze-dried runs higher and could be close to full in a year to a year and a half, so it's weighing a new expansion or a short-term partnership.
- Long-term contracts are coming back as coffee prices steady; gross debt Rs 1,192 cr, net Rs 742 cr, within guidance.

Business mix & capacity

- Domestic vs export: domestic gross turnover about Rs 210 cr of Rs 1,216 cr in Q2, so roughly a sixth of sales are in India and the rest exports.

- Capacity: overall about 70% used; spray-dried has room for two to three years, freeze-dried may be near full in a year to a year and a half. Management starts expanding at about 80-85% utilisation.

3. Earning trigger thesis

Earnings growth comes from three things management keeps repeating: more freeze-dried coffee (higher value, demand ahead of spray-dried), the Vietnam freeze-dried capacity now fully running, and the fast-growing Continental brand in India. Falling coffee prices cut reported revenue but bring back long-term contracts. Freeze-dried will need new capacity soon.

Trigger	What management said	Evidence so far	Time horizon	Strength
Freeze-dried demand and Vietnam FD plant	Better FD mix lifts EBITDA per kg	FD utilisation high; mix benefit now in the base	Now	Strong, but maturing
Continental brand in India	Keep growing about 25%	Brand sales growing about 25% on volume	Ongoing	Moderate: small share of total
Debt reduction	Gross debt Rs 1,000-1,200 cr, net about Rs 800 cr	Net Rs 742 cr at Sep 2026	FY27	Strong
Next FD expansion	Evaluate capacity or partnership	Not yet decided	1-1.5 years	Unproven

3b. Trigger check

Trigger type	Yes/No	What was said (date)
Debt cut	Yes	Net debt down over Rs 750 cr in FY26; net debt to EBITDA 1.45 from 3.1 (May 2026)
New business	Yes	Continental brand growing about 25% across channels (Oct 2026)
Margin up	No	EBITDA now expected to move in line with volume as the FD mix gain is in the base (Oct 2026)
New management	No	-
New capacity	No	Expansion being evaluated, nothing announced
Big orders	Yes	Q3 and Q4 order book looks robust; long-term contracts coming back (Oct 2026)
Turnaround	No	-
Promoter buying	No	-

Single concrete driver: Steady double-digit volume growth in instant coffee, led by freeze-dried demand and the Vietnam plant, plus the fast-growing Continental brand in India.

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Feb - May 2024	FY24 volume growth 18-20%	About 14%	Partly
May 2025	FY26 EBITDA growth 15-20%	FY26 EBITDA up 32%	Delivered
Aug - Nov 2025	Net debt Rs 1,500 cr by Sep 2025	Ahead of guidance by Nov 2025	Delivered
May 2026	FY27: 10-20% volume, 15-20% EBITDA growth	H1 EBITDA up about 15%; guidance held at about 15%	On track
Oct 2026		Already there at Sep 2026	Delivered

	Gross debt Rs 1,000-1,200 cr, net about Rs 800 cr		

The story has been steady for years: grow volumes around fifteen percent, push freeze-dried, build the brand, and lately cut debt. The FY24 volume miss was the main slip; FY26 beat. Tone is calm and specific. One shift: management now says EBITDA will track volume rather than beat it, since the freeze-dried mix gain is already in the base.

5. Bottom line

Durable earning trigger? → YES

A concrete, repeated driver that is showing in results: double-digit volumes, freeze-dried demand and a growing brand, with debt falling. The caveat is that the easy mix gain is done and freeze-dried will need new capacity soon.

Management consistent? → YES

Management has mostly delivered or beaten what it promised (FY26 EBITDA, debt), and the guidance has stayed steady. The FY24 volume miss is the exception.

6. Checkpoints for next quarter

- Full-year volume growth near the guided level holds at the Q3 call
- Net debt stays around the guided level through the Vietnam buying season
- Management announces a plan for new freeze-dried capacity
