Mazda Ltd

Concall Tracker · Q2 2027 · first report

1. Snapshot

Ahmedabad engineering company that makes vacuum systems, evaporators, condensers and air-pollution equipment for edible-oil, power, chemical, pharma and refinery plants, and builds equipment for its US partner Croll-Reynolds. A smaller food division exports drink mixes and dessert products, mostly abroad.

Number	Value	What it means
Market cap	Rs 570 cr	What the whole company is worth on the market.
Q2 FY27 revenue	Rs 83 cr	Sales for the quarter to Sep 2026, up about two-thirds on a year ago: a record quarter.
Q2 FY27 operating margin	27%	Operating profit per Rs 100 of sales; well above its usual mid-to-high teens.
Q2 FY27 profit	Rs 16 cr	More than double the same quarter last year.
Last 12 months revenue	Rs 275 cr	Above the Rs 150-250 cr band it sat in for five years.
P/E	14.8x	Not expensive for a debt-free company, if the new level of profit holds.
Debt	Nil	No borrowings; ICRA counted about Rs 75 cr of cash and liquid investments in Sep 2025.

2. Concall coverage

No concall transcripts were available on Screener. This report is based on a global web deep-dive.

Sources used:

- Screener.in company page and results tables for Mazda Ltd (standalone, to Sep 2026)
- ICRA rating rationale, 28 Nov 2025 (ratings reaffirmed at A Stable / A1)
- Results news for Q2 FY27 (quarter to Sep 2026): multibagg.ai, univest.in, arthneeti.com
- The company's two investor-meet transcripts on Screener: 21 Sep 2023 and 5 Sep 2024 (read for backstory)

Quarter	Date	Transcript read?
Investor meet	21 Sep 2023	Yes (backstory)
Investor meet	5 Sep 2024	Yes (backstory)
Q1 FY25 to Q2 FY27	none	No call held

Mazda doesn't hold quarterly earnings calls. Only two yearly investor meets are on file, the latest from September 2024, so the recent read comes from the rating report and results news.

Latest update highlights: Q2 FY27 results (Nov 2026, from filings and news)

- Record quarter: revenue Rs 83 cr, up 64% on a year ago; profit Rs 16 cr, up 113%.
- Operating profit more than doubled to about Rs 23 cr; margin jumped to 27% from about 21% a year ago.
- Second strong quarter running: Q1 FY27 sales were also up about three-fifths.
- The company gave no breakdown of what drove the jump. ICRA had flagged a Rs 92 cr Riyadh export order (King Salman Park), the largest in its history, as the growth driver for the following periods.

Business mix & capacity

Domestic vs export: Not disclosed for the whole company. The food division is mainly export (domestic was about 18% of food sales in FY23); food is 10-20% of total revenue.

Capacity use: In Sep 2024 management said the current engineering setup can do about Rs 250-260 cr a year of revenue, and the food plant about Rs 60 cr on a single shift. Trailing sales are now close to that ceiling.

3. Earning Trigger thesis

The driver on record is a much bigger order book: about Rs 240 cr in Sep 2025, more than a year of sales, anchored by a Rs 92 cr export order for a project in Riyadh at about 14% margins. The last two quarters show a clear break-out from five flat years. What's missing is management's own word on what drove it, how long it lasts, and whether the plant needs expanding.

Trigger	What management said	Evidence so far	Time horizon	Strength
Riyadh export order	Largest single contract in its history, favourable margins (ICRA)	Results jumped in Q1 and Q2 FY27; link not confirmed by the company	FY26-FY27	Moderate
Order book	About Rs 240 cr in Sep 2025, up from about Rs 116 cr in Sep 2024	Revenue now above its old range	Next few quarters	Moderate
New products (Smart Rod, ion-exchange membrane, CO2 capture equipment)	Could add a fifth to growth in five years (Sep 2024)	No update since	Long term	Unproven

3b. Trigger check

Trigger type	Yes/No	What was said (date)
Debt cut	No	Already debt-free.
New business	No	New products talked about in Sep 2024; no update since.
Margin up	No	Margin rose in results, but there's no management statement on it.
New management	No	None found.
New capacity	No	Sep 2024: 'we might need a larger setup'; no plan announced.
Big orders	Yes	ICRA, Nov 2025: order book about Rs 240 cr, anchored by a Rs 92 cr Riyadh export order.
Turnaround	No	None.
Promoter buying	No	None found.

The single concrete driver: A record order book, led by a large Riyadh export order, is now flowing into results.

3c. Margin bridge

Operating margin was about 27% in Q2 FY27 against about 21% a year ago and a long-run average in the mid-to-high teens. No reason was given; higher sales over a mostly fixed cost base and the better-priced export order are the likely causes, but the company hasn't said. Its orders are mostly fixed-price, so steel prices can squeeze margins (one-off until shown otherwise).

4. Management consistency scorecard

Period	What was promised	What actually happened	Verdict
Sep 2023	Good year, but cautious on the future	FY24 sales grew about a sixth	Delivered
Sep 2024	FY25 to match or beat FY24	FY25 sales fell about 14%	Missed
Sep 2024	Food division to hit its FY25 target after reaching Rs 30 cr in FY24	Not separately disclosed	Too-early
Sep 2024	New products, chemical-free dairy cleaner by late 2026, CO2 capture by 2027	No update found	Too-early

Narrative drift: The little management has said is plain and cautious, with no big targets. The one firm call, matching FY24 in FY25, was missed. Since then the company has been silent while results improved, so there's nothing to judge it against.

5. Bottom line

Durable earning trigger? → MAYBE

The order book doubled and two record quarters show something real is happening. But the company hasn't confirmed what's driving it, a big part looks like one export order, and the plant is near the size management called its ceiling.

Management consistent? → MAYBE

Too little to judge. Two investor meets in three years, one missed sales call, and no word on the current surge. Conservative and debt-free, but not talkative.

6. Checkpoints for next quarter

- Q3 FY27 sales stay well above the same quarter last year
- Operating margin stays above its old range
- The company says whether it needs a bigger plant
